# WILTSHIRE TRACTOR EVENT WILL CELEBRATE THE BLUE CENTURY!

**It's definite! Bank Holiday Monday, 1 May, will see a sensational gathering of tractors to celebrate a century of Ford and New Holland. Taking place at Rowde, just a couple of miles from the T H WHITE Group Office, the event is expected to showcase many memorable tractor models.**

Co-ordinated with help from the Big Ford Tractor Register and hosted by kind permission of A J Butler, the gathering is supported by T H WHITE and New Holland, as well as the Devizes and Malmesbury Young Farmers Club, and is being planned as a super day out for the whole family. Alongside ploughing and cultivation demonstrations there will be vintage and classic tractor working areas, while the Tractor Ted bouncy castle will be in attendance with balloons and stickers for the kids. Food stalls will also be on site.

The event will raise funds for charity, with

collections during the day for the Dorothy House Hospice, Julia's House Children's Hospices and the Royal Agricultural Benevolent Institution.

Many classic tractors are already promised, but we are still looking for more. If you have a tractor you would like to bring along, all you have to do is register it by emailing the details to [plm@thwhite.co.uk](mailto:plm@thwhite.co.uk), or by searching on Facebook for 'Century of Ford & New Holland'. We are aiming to make this one of the biggest gatherings of its type and all models will be welcome

– Fordson, Ford, New Holland and Ford conversions, so please do take part if you can.

**When:** Monday 1 May, 10am-3pm  
**Where:** Close Lane, Rowde, Devizes, Wiltshire SN10 2QG (Just off A342)

**News and information from the T H WHITE Group**

**PROJECTS**

# RETIRING FROM ACTIVE SERVICE

Errol Cook, well known to many customers of T H WHITE Projects, celebrated his retirement on 16 February at a surprise event held at the Group office in Devizes.

Upon reaching his 65th birthday, having given 31 years loyal and committed service to T H WHITE and its agricultural customers, it was finally time for Errol to hand in his keys. He was presented with a large card full of messages from his work colleagues and a gold wrist watch to remind him of T H WHITE. For Errol's wife Gill, there was a bouquet of flowers.

Errol started with the company in 1985 and, apart from a year away in 1989 has been ever present since, having moved down from Marlborough to Devizes with the team and built some strong relationships while establishing himself as a very trusted and admired individual for whom no job was too difficult. His ever-present smile and sense of humour, as well as his willingness to tackle the day-to-day challenges soon earned him the tag of the 'go-to man' for grain store breakdowns and maintenance - with his knowledge and experience the solution

to the problem was never far away!

More than 50 work colleagues and friends attended the event and enjoyed an excellent buffet - it was a great send off for a highly valued member of the team. Errol will be missed by everyone who knows him in the business and we all join in wishing both Errol and Gill a long, healthy and enjoyable retirement together.

## STOCKBRIDGE OPEN DAY

In conjunction with Case IH, T H WHITE will be holding an open day at our newest branch at Stockbridge.

We are proud of the progress we have made in developing the capabilities of the branch since it opened at the beginning of last year, so on Thursday 27 April we will be opening our doors to let you see for yourself.

Please do come and join us between noon and 5pm. You will be able to meet our key suppliers, including representatives from Case IH, Manitou, Pottinger, McConnell and Warwick. Hot food will be served and we will have a bar. There will be presentations at 1.30pm and 3.30pm.

The branch is located at Windyridge, Salisbury Road, Houghton Down, Stockbridge, Hants, SO20 6JR.

If you would like to attend, please call 01264 811260, or email your name and contact number to ajs@thwhite.co.uk.

# T H WHITE IS CERTIFIED INSTALLER FOR TESLA POWERWALL

Tesla is renowned for its electric cars which have proved that battery-powered vehicles can offer the same type of performance, range and convenience as their petrol and diesel counterparts. Now, the same Tesla advanced battery technology that made it possible can be used to store power in the home or workplace.

T H WHITE is proud to have achieved the standards necessary to become a Certified Tesla Powerwall Installer, which means we can offer customers the opportunity to take advantage of one of the most remarkable battery power systems in the world. Tesla Powerwall has now released the much anticipated Powerwall 2, designed to help customers with solar systems consume more of their solar energy on site.

Benefiting from the incredible technological advances achieved with Tesla automotive products, Powerwall can power your property safely and

TESLA  
POWERWALL  
CERTIFIED INSTALLER

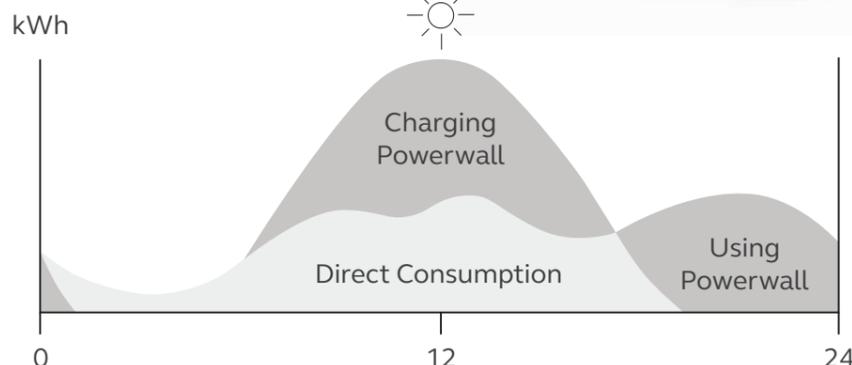

economically. In fact, Powerwall is the leading weatherproof small scale battery with liquid cooling controls that can maximise battery life and safety.

Until now, a problem facing customers with a solar energy installation has been the inability to store energy when solar panels produce more power than a property needs. The only option was to feed surplus power back to the grid, but now Powerwall enables a homeowner to capture and store the excess power for use at times when the solar panels are not generating. The result is greater self-consumption of your solar generation and reduced energy costs.

On a practical level, Powerwall 2 can work with a range of inverters and up to nine Powerwall units can be stacked and connected together to increase capacity.

To find out more about this exciting development, or to register your interest, please call 01380 726656 or email energy@thwhite.co.uk.

Tesla Powerwall is charged at times of high solar exposure, enabling you to spread the availability of your solar energy across a 24 hour period.

# OIL GUARD™ PROTECTS ENGINES AND REDUCES COSTS

In another industry first, Ferris IS2100Z and IS3200Z zero-turn commercial mowers are the first models to be fitted with the Vanguard Oil Guard™ system. This revolutionary technology results in extended maintenance intervals, faster oil changes and prolonged engine life.

The system continuously exchanges oil between the engine and an external oil reservoir. It's a revolutionary design for a commercial mower that protects the engine oil from thermal breakdown, which makes it possible to extend oil change intervals and produces a cooler-running engine. Furthermore, because operators have direct access to the oil

filter (positioned immediately beneath the filler cap) and drain tube, changing the oil is quicker, easier and mess-free. The result is a more productive and cost-efficient mower.

The basis of the system is a 'dry sump' engine. This holds a minimum amount of oil in the sump and a larger quantity in the separate oil reservoir, thus protecting the oil from thermal breakdown. Thermal breakdown occurs when engine heat triggers a chemical reaction in the engine oil, which causes the oil viscosity to change. Correct viscosity is crucial in ensuring the oil flows smoothly while properly coating metal engine components to prevent metal-on-metal contact.

The external oil reservoir is made from aluminium which disperses the heat and helps to extend oil maintenance intervals to a recommended 500 hours instead of the typical 100 hours. The reservoir is made from 3.2mm thick aluminium which has a very good corrosion resistance and is extremely robust.

A pump at the base of the engine circulates oil from the engine to the reservoir where it passes through the filter and then flows from the base of the tank back to the engine by gravity.

An external oil reservoir keeps the oil cooler, protecting it from thermal breakdown.

Oil changes are faster and easier than ever, as the engine oil can be changed without tools. The oil is drained via a valve at the rear of the machine. The oil reservoir cap is removed by a quarter-turn, revealing the oil filter which is also removed with a quarter turn. The wide-mouth tank opening easily takes five litre oil bottles for no mess and no need for a funnel.

The Vanguard™ Oil Guard™-system will be exclusively available on Ferris® mowers and is a factory-integrated technology, not an aftermarket add-on.

Operator-focused design means the engine oil can be changed without tools.

AGRICULTURE

We are pleased to invite you to New Holland's 'Winning Team' Tour 2017, where you will have the opportunity to ride and drive the latest New Holland T7 LWB and T7 HD tractors with cultivation equipment.

Taking place on Wednesday 5 April and Thursday 6 April at Puckshipton Dairy, Hilcott, Pewsey SN9 6HG (by kind permission of Mark Noble of Puckshipton Farms Ltd), the events will provide a forum for information on all New Holland equipment, as well as the driving opportunities. Gates open at 8.30am each day, with bacon rolls, coffee, tea and other refreshments available.

If you would like to join us it would be helpful if you could RSVP to [vmw@thwhite.co.uk](mailto:vmw@thwhite.co.uk), or just turn up on the day.

**When:** Wednesday 5 April & Thursday 6 April, from 08.30  
**Where:** Puckshipton Dairy, Hilcott, Pewsey, SN9 6HG  
**RSVP:** [vmw@thwhite.co.uk](mailto:vmw@thwhite.co.uk)

MACHINERY IMPORTS

## NEW DEALER FOR CORNWALL

Vincent Tractors Sales Manager Matthew Hodge (left) Laurence White from T H WHITE and Managing Director Paul Vincent.

The latest dealer to sign up with T H WHITE Machinery Imports for the distribution of Ferris, Wright and Spider grounds care machines, is Vincent Tractors Of Fraddon, St Columb, Cornwall.

Having just celebrated its 50th anniversary, Vincent Tractors is a well established business in the South West both in the agriculture and grounds care sectors. The company handles several major grounds care brands and has two full-time grounds care salesman, John Scott and Johnathan Day. Founder Kenny Vincent is still active in the business today.

Being located right by the main A30 in the centre of Cornwall is a big plus in terms of offering excellent back-up and support to their customers. Vincent Tractors has nine grounds care engineers based at Fraddon, several of whom are fully mobile for on-site support.

Like T H WHITE, Vincent Tractors is firmly committed to outstanding customer service and we are delighted to welcome the business as a strong addition to our Machinery Imports network. If you would like to consider becoming a dealer for the Ferris, Spider and Wright brands, in the first instance please contact [clive Carter@thwhite.co.uk](mailto:clive Carter@thwhite.co.uk).

# KEEPING YOU SAFE & SECURE

## Access Control systems

Simple pinpad entry units to PC programmed swipe readers can control access on any size of property with restricted areas to secure goods rooms. There are simply no restrictions. 1 door to 1000, we have the system to suit.

## Intruder Alarms

From bells only to fully policed, monitored systems. We can install the right system tailored to you or your insurance company's requirements. Already have a system? T H WHITE can carry out your annual tests, with a friendly face and a service you can trust.

## Fire Alarms

Business owner? Landlord? Health and safety manager? Our surveyors are fully accredited in system design and can work with you on any project to make sure you comply to the latest regulations.

## Fire Extinguishers

We offer supply and maintenance of fire fighting equipment. Together with honest and accurate advice to keep you safe and compliant to the latest regulations. To add to this we offer safety signage and accessories such as cabinets, vehicle boxes and escape ladders.

## CCTV & IP Cameras

For security, health and safety or machinery monitoring, we have the system for you. From fully HD conversions of existing systems to IP set ups we can future proof your CCTV installation. Coupled with our smart phone technologies you can monitor your system from anywhere in the world.

## Electric Gates & Barriers

From bespoke domestic style electrical gates to commercial barriers and bollards. Physical security combined with security systems enhance the protection of sites and stop would-be intruders in their tracks.

Call us today for a free, no obligation survey

## MOTOR GROUP

# JEEP'S ALL-NEW COMPASS BLAZES THE TRAIL

The 2017 Geneva Motor Show was the venue for an exciting and important new launch from Jeep.

The all-new Jeep Compass features a striking new design and takes Jeep straight to the top of the league for off-road capability in the rapidly-growing compact SUV segment. When the Jeep Compass arrives in the UK this summer it will be offered with a choice of diesel or petrol engines and eight different powertrain combinations including a six-speed manual and nine-speed automatic.

Four trims will be available: Sport, Longitude, top-of-the-range Limited, and Trailhawk, offering best-in-class Trail-Rated 4x4 capability.

The new Jeep's considerable abilities are matched by user-friendly technologies and a full array of active driver assist systems to ensure a safe, comfortable and connected everyday driving experience.

Inside the new Jeep Compass refined materials set the tone, while the centre stack houses either 5.0, 7.0 or 8.4-inch touchscreen displays of the Uconnect system. This delivers communication, entertainment and navigation features that enhance both the driving experience and passengers' on board comfort, while

new Apple CarPlay and Android Auto (standard on the Limited and Trailhawk models) enable hands-free phone, navigation and voice-texting.

But the most remarkable aspect of the all-new Jeep Compass is its off-road capability, made possible by two advanced, intelligent full-time 4x4 systems: the Jeep Active Drive and the Jeep Active Drive Low. Both can

send 100 per cent of available torque to any one wheel when needed and include the Jeep Selec-Terrain system, providing up to five modes for different surfaces, while Jeep Active Drive Low has an additional 20:1 'crawl' ratio.

Customers who would like an interactive preview of the new Compass will shortly be able to try an innovative experience at our Swindon Fiat

Group Brand Centre. Based on Tango – Google's smartphone augmented reality technology – the easy-to-use application will allow customers to discover and virtually interact with the all-new Compass.

Call in at Hillmead, Swindon, phone 01793 393523 or email fga-sales@thwhite.co.uk to register for updates and the chance to be among the first to try the new Jeep Compass.

## AirWash

# Plus

**AirWash Plus is a unique dip and rinse system that can be installed in ANY parlour with ANY make of cluster or liners**

**1** The cows are milked as normal. When the automatic cluster remover gives the signal that milking has finished, the AirWash Plus programme is initiated.

**2** As the process begins a special Y-joint releases a measured amount of teat dip which is mixed with compressed air.

**3** The compressed air propels the dip through the system towards the milking cluster where it is injected into the short milk tube.

**4** The blast of air creates a fine spray of teat dip inside the injector spray-nozzle in the short milk tube of the liner. The dip goes on while the teat is extended and coats the teat end, while both the skin pores and the teat canal are open and receptive to disinfectant and emollients.

**5** After the cluster is removed from the cow it returns to the 'park' position and the teat cup is sanitised and rinsed repeatedly with compressed air and water. Dip residue on the inside of the liner is rinsed out and the entire liner is sanitised.
