

ENERGY, FIRE & SECURITY

GENERATE MORE FROM SOLAR PV

T H WHITE has always taken a long-term view of the benefits, cost savings and even profits that customers can derive from solar photovoltaic installations. For that reason we have always supplied high quality panels with premium inverters and professionally installed systems.

More to the point, and unlike many companies that have already disappeared, we are in the business for the long term and will be here for many years to come, to supply, install and service your solar PV systems.

Like any other electrical installations, regular checks and maintenance are essential to ensure that solar PV units deliver optimum performance and remain safe in use. It's obvious that dirt and dust on the panels will reduce the amount of light falling on them and consequently the amount of power generated. In cases where panels are badly soiled this can cost you the savings that the system was expected to give you, as well as your feed-in tariff income. Even in a normal British summer panels are likely to become dusty and impair performance, so T H WHITE

can carry out regular cleaning for you using specialist equipment. However, cleaning is just one aspect of our service programme, so what else can you expect?

We have devised a number of service programmes to suit different needs, but on a typical visit the technician will carry out an electrical test and

check-up, a yield analysis to determine whether the system is functioning at its best, as well as a fault-finding regime. Where repairs are necessary, these can often be carried out on the spot.

If your system is under warranty we can carry out any necessary replacements or repairs and if the company that installed your system is no longer trading we can take over the maintenance.

Depending on which maintenance package you choose, we can also offer remote monitoring solutions that enable us to keep an eye on your system to ensure it will repay your investment.

Our service packages are a great way to gain peace of mind and get the most out of your solar PV installation. To discuss what's right for you call us on 01380 726656 or take a look at our website, www.thwhiteenergy.co.uk.

THREE OF THE BEST AT STUNNING PRICES

- Euro Stage 5 ready diesel engine
- Mowing speed up to 11mph for high productivity
- Foot operated deck lift
- Briggs & Stratton Vanguard™ EFI petrol engine
- 3 year engine warranty
- Now featuring Oil Guard™
- Small size, maximum productivity
- Briggs & Stratton petrol engine

For a limited period we are pleased to offer three of the most popular Ferris mowers at very special prices PLUS a free service kit with each mower.

Ferris mowers are the only zero-turn mowers with full suspension, allowing each wheel to move independently. This

means you have a more comfortable ride, increased productivity, higher mowing speeds and extended mower life.

All these mowers feature iCD rear-discharge cutting decks and are available now from your local T H WHITE Groundcare branch.

AGRICULTURE
NEW HOLLAND'S TEMPTING T7 AT 0%

The New Holland T7 series tractors are among the most capable and versatile tractors available today and the process of acquiring one is being made even more attractive by a great 0% finance offer.

Until 30 June 2018 finance is available on the basis of 1+3 at 0% on New Holland T7 SWB and LWB models, while the T7.290 and T7.315 are offered at 1+2 at 0%.

These finance packages are in addition to the T7 Service Plus Platinum Upgrade (see below) which provides two additional years of Service Plus insurance cover at the Platinum level. There has never been a better moment to go for a new T7 tractor.

Terms and conditions apply to these offers, so for all the details just contact your nearest T H WHITE Agricultural branch.

AGRICULTURE

GLORIOUS GRASSLAND

The first thing to hit you about GRASSLAND UK is the sheer size of the event. For 2018 the show was held at the Bath & West Showground near Shepton Mallet, where large fields on adjacent farms had been made available for growing, mowing and clamping demonstrations.

Forming a fantastic showcase for the latest equipment and technology, the 10 May event was a 'must-see' for all grassland professionals and benefited from glorious early summer sunshine. T H WHITE was based in Field Three where the entire exhibit was dedicated to New Holland equipment with accessories from T H WHITE's other leading suppliers. Although our patch was a good 30-minute walk from the show entrance, the thousands of people who came to see us were rewarded with some impressive demonstrations, including the first outing of our new FR650 Forage Cruiser demonstrator.

The FR650 is one of five models in a new line-up that have been designed to up the game in terms of capacity, comfort and economy. For example the FR650 has five per cent increased capacity while consuming 21 per cent less fuel than its larger FR700 predecessor, thus reducing costs and increasing profit. Advanced MetaLoc™ technology protects the FR from potentially fatal metal ingress. The patented Variflow™ system crop

Above: The New Holland FR650 Forage Harvester is one of five new FR machines designed to combine comfort with productivity and economy.

Below: The GRASSMEN, Gareth (Donkey), Garry and Nicolle (who clearly is not a man) with their New Holland T7.315 brought back from Ireland.

processor can be changed from maize to grass position in less than two minutes without the need for tools.

The cab has been completely redesigned to put the operator at the heart of the machine, giving an uninterrupted view for accurate pick-up and crop discharge. A new armrest design places all controls naturally to hand including an ultra-wide screen IntelliView™ IV colour touchscreen monitor. The IntelliFill™ feature fills the trailer for you so you can concentrate on the serious business of pick-up.

A highlight in the T H WHITE field was the presence of THE GRASSMEN - the charismatic charity video bloggers from Northern Ireland who came over to reluctantly hand back their beloved New Holland T7.315 Blue Power tractor which, for the last year, they have used as part of their initiative to raise more than £250,000 for the Make-A-Wish cancer charity. But, before handing over the keys they gave one final demonstration which showed off the massive power and capability of the T7.315; fitted with Kuhn mowers front and rear the T7 powered across a huge swathe of standing grass in seconds, reducing it to a uniformly mown crop and filling the air with the heady aroma of cut grass.

Don't worry if you missed GRASSLAND - we can arrange a demonstration of the New Holland Forage Cruiser or tractor. Just contact any of our agricultural branches.

KEEPING YOU SAFE & SECURE

Access Control systems

From simple pinpad and swipe units to fingerprint biometric entry modules we can control access to any size of property, including those with restricted areas or secure rooms.

Intruder Alarms

From bells only to fully policed, monitored systems. We can install the right system tailored to you or your insurance company's requirements. Already have a system? T H WHITE can carry out your annual tests, with a friendly face and a service you can trust.

Fire Alarms

Business owner? Landlord? Health and safety manager? Our surveyors are fully accredited in system design and can work with you on any project to make sure you comply with the latest regulations.

Fire Extinguishers

We supply and maintain fire fighting equipment, and offer advice to keep you safe and compliant with the latest regulations. We also offer safety signage and accessories such as cabinets, vehicle boxes and escape ladders.

CCTV & IP Cameras

For security, health and safety or machinery monitoring, we have the system for you. From fully HD conversions of existing systems to IP set ups we can future proof your CCTV installation. Coupled with our smart phone technologies you can monitor your system from anywhere in the world.

Electric Gates & Barriers

From bespoke domestic style electrical gates to commercial barriers and bollards. Physical security combined with security systems enhance the protection of sites and stop would-be intruders in their tracks.

AGRICULTURE

CASE IH AGRICULTURE **T H WHITE** PRO-AGRI

RED POWER ON TOUR

The Case IH Red Power On Tour 2018 roadshow came to the West Country on 26 April when T H WHITE hosted an impressive array of red tractors, combine harvesters and machinery at the Compton Manor Estate, Kings Somborne.

Star of the show was the latest Maxxum Multicontroller tractor fitted with the new ActiveDrive 8 semi-powershift transmission. This offers eight powershift steps in each of the three ranges, giving a total of 24 speeds in both forward and reverse, and is available on all Maxxum Multicontroller models.

Covering speeds up to 10.2 km/h, range one is specifically designed for heavier draft work. For special applications requiring very low speeds, such as vegetable crop work, ActiveDrive 8 is also available with additional creep speeds. Range two, the main working range, covers 90 per cent of all field, grassland and loader

application requirements, allowing the tractor to work under full load, without any torque disruption, from 1.6-18.1 km/h. For road travel, the transmission is designed to start in range three, and a skip-shift function allowing quick progress through the powershift speeds. A clutch pedal is not required, meaning this transmission is suited to power-hungry tasks where momentum is important.

Guests at the Red Power event certainly enjoyed their chance to test drive the Maxxum MC Active Drive 8. If you would like to try it yourself please contact the Case IH specialists at our Stockbridge branch on 01264 811260.

TRAILER CENTRE

TRAILERS, TRAILERS, TRAILERS

Horse trailers, general purpose trailers, flatbeds, box vans, vehicle trailers, beaver tails, tipper trailers, livestock trailers and more...

One of T H WHITE's unintentionally best-kept secrets is our extensive Ifor Williams Trailer Centre just outside Reading. Quite often our customers have struggled to find it, but when they do they are usually amazed at what we have there.

We didn't mean it to be so obscure, but as the Trailer Centre is located in

The Arborfield workshop deals with trailers and Groundcare machinery.

a very pleasant and largely residential part of Berkshire we have to respect our neighbours. We are on the A327 just south of Arborfield Cross (RG2 9PJ) and the site is best spotted by the large grassy verge with a steel fence running across the entrance. There is a T H WHITE sign but it's not huge - it's the biggest we are allowed. Don't be put off by the metal fence - it does look daunting but it will open automatically as

you drive up to it and the team, led by branch manager Nick Brown and trailer specialist Graham Martin, are ready to give you a warm welcome.

A selection of new trailers is always in stock and the team is happy to help if you wish to place an order for a bespoke trailer if you have a specific requirement. Added to that, the Trailer

Well-stocked with Ifor Williams trailer parts, the parts counter also offers accessories.

Centre occasionally has high quality used trailers, although these are so popular they usually go quickly.

The large workshop at Arborfield offers highly competitive trailer servicing and repair, while the parts department carries a large range of Ifor Williams parts. To find out more about our Reading Trailer Centre go to www.thwhitetrailercentre.co.uk, or call the team on 0118 976 0088.

Yes, this is it! It's easy to miss but the entrance to the T H WHITE Reading Trailer Centre is on the A327 at Arborfield. The sliding gate opens automatically.

GROUND CARE

NEW RANSOMES AND JACOBSEN ARRIVALS

Building on the huge success of the MP Series, Ransomes has introduced the all-new HM600 wide area mulching flail mower, while Jacobsen's new TR320 workhorse replaces the TR3. Both are in our 2018 demo fleet waiting for you to try.

The HM600 (above) has been built in collaboration with Mühling to deliver a robust, reliable mower with the ability to tackle the toughest jobs. From a clean, fine, rolled finish across sports pitches to routine cuts, the HM600 leaves an even spread of mulched clippings. It also tackles the irregular cuts, bringing the lesser maintained areas back under control. The HM600 can visit one work site with the versatility to do it all, the productivity to do it fast and the flail technology for superior presentation. Its light weight (2009kg) and 2.1-metre transport width make it easy to move from site to site. You can lift and lower individual decks, or run all three at the impressive 3.2m maximum cutting width to suit your needs.

The Jacobsen TR320 (below) is a triplex cylinder mower that has been created

with usability in mind. The three-wheel-drive configuration utilises a 24.8hp Kubota diesel engine, while the cutting units can be raised to a vertical position giving it the narrowest transport width in its class.

The TR320 also features a switch-operated lift and lower system for the cutting unit and an easy-to-use transmission pedal with a mechanical interlock for transport and mow speed control, and an analogue display screen.

We would be happy to tell you much more about the HM600 and the TR320, but there's really no substitute for trying them yourself to see just how efficient they are, no matter how demanding the job. To get in the driving seat just contact your nearest T H WHITE Groundcare branch and we'll do the rest!

JACOBSEN

DON'T FORGET... If you are not necessarily in the market for a new Groundcare machine, we always have an extensive selection of pre-owned equipment, ranging from mowers to tractors, chippers and much else besides. You can view it all at thwhitegroundcare.co.uk.

AGRICULTURE

BUSY BADMINTON

The Mitsubishi Motors Badminton Horse Trials this year was blessed with amazing weather and we welcomed many new and existing customers to the T H WHITE stand.

With much of equestrian interest for paddock maintenance, orders were taken for new Honda ATVs, Logic mowers, sprayers, rollers and trailers.

A highlight was a visit by world class event rider Mary King MBE, who was there to sign her latest book.

Launched at Badminton, was the all-new Logic Surface Pro LSP150P manege grader. Designed to provide a professional finish for modern sand and fibre sand arenas, this is an all-in-one rake, rolling and compacting attachment for your ATV, UTV or tractor. It's designed to be very easy to use without endless adjustments.

It features a split compacting rear roller, adjustable level bar, three settings for the Einbock spring tines, as well as electric raise and lower with depth gauge. A kickboard perimeter plough guides loose material back onto the surface.

To arrange a demonstration please contact Tim Rochfort on 07973 911934 or Simon Knight on 07860712963.

HARVEST BREAKDOWN & SERVICE

There's enough to think about at harvest time without worrying whether your equipment is going to let you down.

T H WHITE Projects can help with regular servicing and maintenance of driers, cleaners, conveyors,

augers and elevators to ensure they are ready for the busy period. We can supply and fit parts for most makes of equipment, new or old.

If you do suffer a breakdown we can be on the spot fast to get you back in action. Just call our hotline.
