TRAILER CENTRE

NEW HORSEBOXES SET THE PACE IN STYLE AND CONSTRUCTION

In the nine years since T H WHITE gained its Ifor Williams franchise, we've seen many exciting products added to the company's range of world-leading trailers.

The latest Ifor Williams horse trailers, launched in September, set completely new standards and really do have the 'wow' factor. Scheduled for late 2018-early 2019 release the two phenomenal new horseboxes – the HBX and HBE – will be available in 403, 506 and 511 models. The HBX and HBE are both constructed from aluminium planking, meaning they no longer contain any wood components, making

The new Ifor Williams HBX horsebox on the road and with awning set up.

them lighter to tow and more economical to maintain.

The HBX incorporates a 'first' for Ifor Williams – an inflatable enclosed awning. This provides owners with shelter from the elements, as well as giving additional space and flexibility to make the experience of getting out and about with your horses even more comfortable and enjoyable.

Both the HBX and HBE will be available in black, silver and red, with the red being a real colour-pop – it looks even better in reality than in our photos. If you want to stand out from the crowd, this is the horse box for you.

Speaking about the HBX and HBE, horseboxes, T H WHITE managing director Alex Scott said: "We

PROFIHOPPER 1250 SMARTLINE

Amazon has launched a completely new design of self-propelled mower in its Profihopper range, the Profihopper 1250 SmartLine.

Featuring an updated hydrostatic drive system, it is available in two models: the iDrive with front-wheel drive, or the 4WDi with all-wheel drive capability making it ideal even for the most difficult working conditions.

The compact design provides zero turn for greater manoeuvrability and safety on any terrain and on slopes. With its 1.25m wide, out-front mowing unit, the Profihopper 1250 SmartLine provides an excellent cut in both short and long grass.

Both models are equipped with the SmartCut precision cutting rotor, which has a chevron-shaped blade arrangement for improved cutting and pick-up quality. The robust PowerCompactor auger conveyor system incorporates both a longitudinal and a transverse auger. With

a diameter of 150mm, the longitudinal auger has a particularly high conveying capacity which enables the Profihopper to have higher conveying rates, and thus forward speeds, even in long grass.

Grass cuttings are compacted immediately after being picked up by the PowerCompactor system and forced into the 730-litre collecting hopper which can hold more than 1,000 litres of uncompressed grass. Less time is thus spent emptying the hopper, increasing productivity. Simple unloading into high-sided transport vehicles is also possible by utilising the Profihopper's hydraulic high-tip emptying at 2.10 metres.

The Profihopper 1250 SmartLine is ideal for mowing, mulching, scarifying or collecting and can accommodate wide variations in cutting height, weather and vegetation conditions. The mulch flap is inserted for cutting and dropping, ensuring the grass is evenly distributed

over the mown area so that important nutrients are returned to the soil. The scarifying blades can be mounted quickly and without tools. Scarifying improves the exchange of light, air, water and nutrients, resulting in a substantial improvement in soil structure.

Even picking up cans, paper and other rubbish is no problem for the Profihopper. The ability to mow, mulch, scarify or collect leaves in one operation saves valuable time.

Find out more about this latest, versatile Profihopper, or book a demo at any T H WHITE Groundcare branch.

HORSEBOXES SET NEW STANDARDS Continued from front page

The new Ifor Williams HBE horsebox fitted with silver roller shutter blind.

believe that the outstanding engineering, unrivalled features and eye-catching appearance will make the HBX and HBE the trailers of choice for horse owners everywhere."

Celebrating the company's 60th anniversary, Ifor Williams has also added new models to the GH range of plant trailers – a log splitter and new catering trailers.

At the September launch, held at Ifor Williams' Sandycroft headquarters in North Wales, guests were able to view these new products and tour the company's new manufacturing facility built around state-of-the-art engineering facilities that are certain to keep the brand at the forefront of the trailer

market. Reflecting after the launch day, T H WHITE director Tim Lane said, "Ifor Williams trailers is a key brand for us. Its range of trailers, now even more impressive thanks to these new products, complement so many other machines that we sell, helping to ensure that T H WHITE can continue to provide the solutions that our customers need."

The new horseboxes and plant trailers will be available from our Trailer Centre in Reading and Frome. To find out more about these fantastic new products and to pre-order, contact our trailer specialist Graham Martin on 0118 976 0088, or email graham.martin@thwhite.co.uk.

T H WHITE GROUND CARE WINTER SERVICE DISCOUNTS 2018-19

10% OFF LABOUR
10% OFF PARTS
For orders placed before 30 November 2018

Book in your groundcare machinery for servicing in the quieter winter months to take advantage of our discounts.

Servicing your machinery in the winter months when the pressure is less will give you peace of mind that your machinery will be ready to go in the 2018 season. Because it also allows us to plan our workload it enables us to offer you worthwhile discounts. To qualify for the discounts, servicing must be booked before the end of November this year.

To make a booking, or to find out more, please contact your T H WHITE Groundcare branch.

Terms & conditions apply to all Winter Service bookings.

BOOK YOUR SERVICE BEFORE THE END OF NOVEMBER AND WE WILL ENTER YOU IN A PRIZE DRAW TO WIN A LUXURY CHRISTMAS HAMPER!
The winner will be drawn in the first week of December.
Terms apply – available on request

ENERGY, FIRE & SECURITY

MINISTER LAUNCHES SUSTAINABLE BUSINESS CONFERENCE

The Rt Hon Claire Perry, MP for Devizes and Minister of State for Energy and Clean Growth, was the opening speaker at the North Wiltshire Sustainable Business Conference. T H WHITE was a key sponsor of the event, held at Chippenham Town Hall on 19 October.

Addressing a packed hall, Ms Perry set out the Government's thinking and targets for addressing climate change and building long-term sustainability in which business will need to play a crucial part.

The just-published IPCC report on climate change stresses that we only have a maximum of 12 years to make fundamental changes before climate change will be irrevocably out of control. An impressive line-up of speakers then showed how a sustainable approach to energy use by business makes sound economic sense.

Paul Allen, representing Zero Carbon Britain and the Centre for Alternative Technology underlined the importance of rapid action and he presented a Zero Carbon manifesto to Claire Perry. Then, citing interesting examples of business leaders who are already implementing sustainable policies, Dr Dominic Tantram – a founding partner of Terrafiniti – explained why a sustainable approach should be regarded as a source of business value rather than a simply a cost of business.

Colin Curtis said that if the UN's goals for sustainable development are met it could halt climate change by 2030, while Dr James Beard from Mott MacDonald spoke of the important CSR implications of sustainable business. Paddy Bradley, director of the Swindon & Wiltshire Local Enterprise Partnership, explained how local businesses could grow in the low carbon economy. Delegates were able to see technologies on offer from T H WHITE including solar energy, EV charging and battery storage. It is hoped to repeat and develop the conference next year.

Paul Allen

Dr Dominic Tantram

Dr James Beard

Alex Lockton, divisional manager of T H WHITE Energy, Fire & Security, amplifying a point made by Claire Perry.

KEEPING YOU SAFE & SECURE

Access Control systems

From simple pinpad and swipe units to fingerprint biometric entry modules we can control access to any size of property, including those with restricted areas or secure rooms.

Intruder Alarms

From bells only to fully policed, monitored systems. We can install the right system tailored to you or your insurance company's requirements. Already have a system? T H WHITE can carry out your annual tests, with a friendly face and a service you can trust.

Fire Alarms

Business owner? Landlord? Health and safety manager? Our surveyors are fully accredited in system design and can work with you on any project to make sure you comply with the latest regulations.

Fire Extinguishers

We supply and maintain fire fighting equipment, and offer advice to keep you safe and compliant with the latest regulations. We also offer safety signage and accessories such as cabinets, vehicle boxes and escape ladders.

CCTV & IP Cameras

For security, health and safety or machinery monitoring, we have the system for you. From fully HD conversions of existing systems to IP set ups we can future proof your CCTV installation. Coupled with our smart phone technologies you can monitor your system from anywhere in the world.

Electric Gates & Barriers

From bespoke domestic style electrical gates to commercial barriers and bollards. Physical security combined with security systems enhance the protection of sites and stop would-be intruders in their tracks.

DAIRY AGRICULTURE

T H WHITE Case IH dealer principal Rob Iddeson and the Maxxum 145 ActiveDrive 8 at the show.

MAXXUM 145 ACTIVE DRIVE 8 STEALS THE DAIRY SHOW

T H WHITE put on a strong showing at the 2018 Dairy Show in October for both Case IH and New Holland, together with the wide variety of equipment brands offered by our Agriculture and Dairy divisions.

A real eye-catcher on Avenue B at the Bath & West Showground was the gleaming line of red Case IH tractors, ranging from the compact Farmall to a mighty 200hp Puma. Impressive stuff, with a tractor to meet every need, but for many farmers the stand-out tractor was the Case IH Maxxum 145 with ActiveDrive 8 transmission. This new semi-powershift transmission offers eight powershift steps in each of three ranges, providing a total of 24 speeds in both forward and reverse, and is available on all Maxxum Multicontroller models.

Covering speeds up to 10.2 km/h, Range One is specifically designed for heavier draft work. Range Two, the main working range, covers nearly 90 per cent of all field, grassland and loader application requirements, allowing the tractor to work under full load, without any torque disruption, from 1.6-18.1 km/h.

For road travel, the transmission is designed to start in Range Three, and a skip-shift function then allows quick progress through the powershift speeds. An auto-shift feature means the tractor can be set to progress automatically through any set of eight speeds in the field, and through all 16 gears in the top two ranges on the road. A pedal kick-down function can be used to impose a manual downshift.

A clutch pedal is not required, meaning this transmission is suited to power-hungry tasks where momentum is important, such as cultivations or mowing with twin or triple mowers.

To try a Case IH tractor for yourself, just call Rob Iddeson on 01264 811260.

Ideal mates: the beefy Case IH Puma 200 and Pöttinger Novacat 301 disc mower.

AGRICULTURE

BOOMING SUCCESS FOR CIRENCESTER CONTRACTOR

The smallest machine in the New Holland fleet demonstrates how versatile it can be in making the most intricate tasks easy, proving that bigger doesn't always mean better...

For the past 60 years the Tugwell Family has been a loyal customer of T H WHITE. Peter Tugwell started Tugwell Contracting back in 1958 with his son Adrian, now at the helm of the business. From general agricultural contracting to civil and solar park maintenance, there isn't much that Adrian doesn't cover with his fleet of six New Holland machines and a variety of Kuhn equipment, all supplied by T H WHITE's Knockdown branch.

Solar park maintenance has been a big part of the business since 2013 and Tugwell now offers this service throughout the UK. Adrian's New Holland fleet ranges from compact Boomer 50s to a T3 and TK4.100 tractor, meaning there is always a tractor suited to the job. When asked why he chooses New

Adrian Tugwell and Rich Morgan with the New Holland TK4 100 tracked tractor.

Holland, Adrian explains: "The Boomers and the T3 are great little tractors with plenty of power, while the TK model has really helped the team when ground conditions are not suitable for other

machines. In the past we had to mow the solar parks by hand when the ground was too wet to get any of the other tractors onto site, but the TK has proved a big asset in our wet weather Solar Park contracts."

The agricultural contracting side of the business covers a 50-mile radius from the company's base just outside Cirencester, Gloucestershire, with over 7,000 acres of work carried out each year. Adrian favours Kuhn products for his tillage and grassland work with his collection ranging from 1.5-6m power harrows, toppers and combination drills. "I choose Kuhn because I know they are well-built and reliable," he says.

The business also runs a few classics with which Peter Tugwell still undertakes general day to day contracting work, including a New Holland 7810, 8340 and 6640.

If you would like to find out more about any New Holland machinery - large or small - please call Rich Morgan at our Knockdown branch on 01454 238181 or 07831 351379.

AGRICULTURE CONSTRUCTION

£130 FIXED PRICE LOLER TESTING - OR FREE WITH YOUR ANNUAL SERVICE

Do you need a LOLER test?

The answer is **YES** if you own or operate a fork lift truck, telescopic handler, or a tractor fitted with a loader.

You are required by law to ensure that the machine holds a report of thorough examination on an annual basis. This requirement of a 'thorough examination' is embedded in Health & Safety legislation; Lifting components are covered by the Lifting Operations and Lifting equipment Regulations 1998.

So if you have purchased a machine in the last 12 months your LOLER test is now due. If you bought over a year ago have you had your annual LOLER test?

We offer **fixed price LOLER testing for just £130**, or the test is **FREE** with your annual service.

To book your LOLER test just contact one of our service managers:

Marlborough 01672 518407
Frome 01373 465941
Toddington 01242 620211
Knockdown 01454 238181

A LOLER test can cost as little as £130* - a small price for real peace of mind. *Mileage and VAT not included

AGRICULTURE

KEEP IT IN TRIM

The fastest and most efficient way to keep hedges in trim is with a tractor-mounted power arm, and the widest choice on the market comes from McConnel.

With 12 different series and 42 distinct models plus thousands of build options, unique bespoke machines can be created.

30-Series compact models can be operated with certain utility vehicles as well as small tractors and, with a reach of 3.4m to 4.8m are ideal for the landscape, amenities and ground-care sectors.

Moving up the scale, the range offers a choice of powerful hydraulics and different reaches to suit everything from the straightforward to the most challenging situations. A variety of different heads can be fitted, including multisaws, cutterbars, and rotary heads and, depending on the configuration specified, McConnel power arms

GROUND CARE

are equally at home cutting hedges, mowing verges, clearing vegetation and trimming brush and shrubs.

Topping the range is the 1,000 series - a favourite with professional contractors and local government teams which offers up to 8m reach, and the Versi-Series which enables operators to cut on either side of the tractor at the touch of a button.

Find out about McConnel power arms at any T H WHITE Agriculture or Groundcare branch.

HIGH QUALITY CLEARANCE BARGAINS

On the opposite page is our usual monthly selection of some of the best used agricultural equipment on the market.

But on this page we present a selection of clearance items at bargain prices. These are products that may be ex-display, ex-demonstrators, or simply items that we have had in store for a longer period. As a result, some items may exhibit storage soiling, show signs of light use, or have minor paint damage, but without exception they are high quality

machines and implements, many of which are as good as new. Items which have been in longer term store may no longer be covered by the manufacturer's warranty, but before delivery they will be fully checked by T H WHITE technicians and will be warranted by T H WHITE.

For specific details of individual items, please contact your sales representative, or call one of the Sales Hotline numbers at the bottom of this page.

AVEBURY PLOUGHING ASSOCIATION MATCH

The day dawned bright and clear on 29 September as tractors old and new gathered at Bell Farm in the shadow of the Cherhill White Horse for the Avebury Ploughing Association Ploughing Match.

Always a great day for competitors and spectators alike, the entrants were soon at work demonstrating their skills and many T H WHITE customers were among those achieving success. Top prize winners were: Best Ploughman under 25: Richard Horton (J R Horton & Son); Reserve Champion Conventional:

Philip Blake (Butler Bros, Avebury); Champion Conventional: Andrew Woolley (Puckshipton Farms, Marden); Reserve Champion Reversible: Nick Stevens (A4 Farmers, Cherhill); Champion Reversible: Ron West (T P Hayward, Tidcombe). Ron was also crowned overall champion ploughman.

In the trade classes T H WHITE entrants picked up four of the six awards. Full results can be seen at www.aveburyploughingassociation.co.uk.

Thanks are due to Home Farm (Minal) Ltd for providing the wonderful venue.

CHRISTMAS IS COMING!
