CONSTRUCTION

MANITOU MLA-T IS THE NEW FORCE

Manitou's new pivot-steer telehandler, the MLA-T, combines bags of sheer tear-out force with exceptional levels of comfort and durability, and is available now from T H WHITE Agriculture and Construction.

Designed in-house from the ground-up, the MLA-T features a tighter turning circle than competing machines and, unlike many pivot-steer handlers, it shuns standard torque converter transmission for Manitou's own hydrostatic M-Vario Plus transmission, which is more commonly found on higher-spec, rigid-frame machines.

Powered by a Deutz 4.1-litre, 143hp diesel engine, the MLA-T has plenty of 'grunt' for all the construction and agricultural tasks that it will be required to perform. On the road it can be driven at up to 40kph, but a number of advanced technologies are built-in to deliver maximum power at slow speeds with the engine driving two separate axial piston motors, one of which is automatically disengaged above 20kph to reduce oil displacement, assist cooling and reduce fuel consumption.

An eco-mode can also result in a fuel cost saving of around £440 over 1,000 hours when full power isn't needed.

Built for hard work in harsh environments, the MLA-T features a heavy chassis with widely spaced top and bottom pins to mitigate stress on the pivot joint and the prop shaft runs inside the chassis for maximum protection.

Matching equivalent rigid machines, the MLA-T can lift 3.3t at full articulation and up to 5t for a straight tipping load, while optional 'intelligent' hydraulics offer three most useful automated functions – Quick Lift which combines raising/lowering with extension/retraction; Bucket Shaker saves the operator from making repetitive movements; and Return to Load to automatically return to a pre-set position.

Completing the package is a comfortable working environment and brand new cab design with easy control via a JSM joystick and a digital display dash. Maintenance is easy thanks to a central greasing block.

We think you'll love the MLA-T, particularly for livestock farming and construction applications, but you don't need to take our word for it. If you would like to see and try the machine for yourself, please contact your T H WHITE Agriculture or Construction representative.

Wishing all our customers a Merry Christmas and a Happy New Year!

MEET PROJECTS AT LAMMA...

LAMMA, the UK's largest agricultural trade show will take place at the NEC Birmingham, 8-9 January 2019.

The T H WHITE Projects team will be on Stand 722 in Hall 7 ushering in the Division's 40th year. Technical staff will be available on the stand, as well as a demonstration dust suppression hopper.

AGRICULTURE

DRIED TO PERFECTION

With so much climate uncertainty many grain farmers are realising the benefits of investing in reliable, high throughput grain dryers. Now is the time to think about being fully equipped for the next harvest to avoid being caught out by wet weather.

Opico's portable Magna Diesel Grain Dryers can dry up to 480 tons per day automatically, with minimal supervision. They are easy to install and relocate as required, eliminating the need for large expenditure on handling equipment.

Fuelled by diesel with 3 phase or PTO drive OPICO dryers recirculate the grain constantly to dry thoroughly and evenly whilst improving hectolitre weights and augmenting quality.

Opico's unique Duax Heat Core works in a similar way to a storage heater, using heat-retaining bricks to build up and retain heat as the burner switches from high to low flame. This clever system ensures an accurate and constant

heat and makes the Magna one of the cleanest and most efficient diesel dryers on the market.

Holding and drying capacities range from 5t to 20t per hour and, with forced drying and cooling, you always remain in complete control and are able to specify temperature and moisture content.

Not only can Opico Magna dryers handle and dry the very wettest of grain, but the grain cleaner removes weed seeds and broken grains improving hectolitre weight, while the augers polish the grain, improving the sample. The whole process ensures maximum, high quality output.

To beat the delivery lead times on drying equipment it's worth thinking about placing an order now to give peace of mind that you will be fully prepared for 2019. To discuss the options and help determine which Opico dryer is best for your farm, contact any of our agricultural branches.

Remember you can obtain all your bedding and feeding equipment and silage loader wagons from us...

T H WHITE's impressive line-up of equipment suppliers means you can find everything you need for the winter bedding and silage season in one place.

Kuhn's Primor straw blowers and feeders set the benchmark in straw blowing quality and are designed to be easy to load with a high capacity, cutting down on the unproductive time spent travelling to and fro between fodder stocks and troughs. Kuhn is also a leader in TMR mixers; whether you are mixing 100% hay or 100% grain, KUHN has a

mixer to fit virtually every customers' needs.

Schuitemaker's Feedo is widely regarded as one of the leading trailed forage feeders used to mix and dispense many types of feed. The special

feed distribution rollers ensure that the feed is dispensed evenly and without loss of structure. The feeder wagon can discharge from either side or the front or back, as required; the choice is yours.

What's more, our service workshops are on hand to make sure your equipment keeps running around the clock.

AGRICULTURE

CULTIVATING PHOTO TALENT

Following our popular Harvest Photo Competition we realised that there is considerable photographic talent among our customers, so we ran a Cultivation & Drilling Photography competition through the T H WHITE Agriculture Facebook page. Here are the winners - another set of stunning pictures we think you will agree.

THE WINNER (top) is Lee Vallis for his shot of a New Holland T7 with He-Va rolls.

RUNNER-UP (top right) is by Andy Wilkinson of a Väderstad top down cultivator in action.

RUNNER-UP (right) is Daniel Lane's shot of New Holland T7s working with Kuhn power harrows.

Well done to all and look out for the next competition!

KEEPING YOU SAFE & SECURE

Access Control systems

From simple pinpad and swipe units to fingerprint biometric entry modules we can control access to any size of property, including those with restricted areas or secure rooms.

Intruder Alarms

From bells only to fully policed, monitored systems. We can install the right system tailored to you or your insurance company's requirements. Already have a system? T H WHITE can carry out your annual tests, with a friendly face and a service you can trust.

Fire Alarms

Business owner? Landlord? Health and safety manager? Our surveyors are fully accredited in system design and can work with you on any project to make sure you comply with the latest regulations.

Fire Extinguishers

We supply and maintain fire fighting equipment, and offer advice to keep you safe and compliant with the latest regulations. We also offer safety signage and accessories such as cabinets, vehicle boxes and escape ladders.

CCTV & IP Cameras

For security, health and safety or machinery monitoring, we have the system for you. From fully HD conversions of existing systems to IP set ups we can future proof your CCTV installation. Coupled with our smart phone technologies you can monitor your system from anywhere in the world.

Electric Gates & Barriers

From bespoke domestic style electrical gates to commercial barriers and bollards. Physical security combined with security systems enhance the protection of sites and stop would-be intruders in their tracks.

T H WHITE PRO AGRI NOW OFFERING LOLER TESTING AT STOCKBRIDGE

Annual LOLER tests, essential for anyone who owns or operates a fork lift truck, telescopic handler, or a tractor fitted with a loader, can now be booked at our Stockbridge branch for just £135 – or FREE if booked with your first service.

You are required by law to ensure that the machine holds a report of thorough examination on an annual basis. This requirement of a 'thorough examination' is embedded in Health & Safety legislation; Lifting components are covered by the Lifting Operations and Lifting equipment Regulations 1998.

So if you have purchased a machine in the last 12 months your LOLER test is now due. If you bought over a year ago you need to be sure that you have had your annual LOLER test.

Contact service manager Andrew Hannington on 01264 811260, or email andrew.hannington@thwhite.co.uk to book your LOLER test now at our bargain price of just £135 – a small price to pay for peace of mind. LOLER testing is also available at our other Agricultural branches.

MACHINERY IMPORTS SUCCESS AT SALTEX

SALTEX – the two-day groundcare exhibition held at the NEC – attracted more than 300 exhibitors and several thousand visitors. The T H WHITE Machinery Imports stand, representing Ferris, Wright, Spider and Jensen brands was the second-largest exhibitor stand in the whole venue.

Taking centre-stage was a large suspension demonstration unit from Ferris, showing visitors exactly how the patented IS® suspension technology works on uneven terrain – highly relevant to the launch of the new Ferris ISX®800Z (see page 6). Also launched at the event was the new prototype X Line from Spider, the company's smallest commercial mower to date.

Three machines from Jensen, the quality German woodchipper manufacturer, were on show, while a team from Wright in the USA were also there to welcome visitors. SALTEX TV and Turf Matters both visited the stand, as well as popular YouTuber John Ryan who set up the Lawncare Legends social groups for groundcare professionals.

ENERGY, FIRE & SECURITY

T H WHITE IS NOW GENT 24 SYSTEMS INTEGRATOR

The fourth quarter of 2018 marks the launch of T H WHITE Energy, Fire and Security as a Gent 24 Systems Integrator. We are joining an elite network, able to provide design, installation, service and maintenance of the Honeywell Gent range of fire safety systems.

The Honeywell Gent brand has been around since 1872, almost as long as T H WHITE (Est. 1832) and has a long history of delivering high quality fire safety solutions in almost every kind of building in the UK.

The range is renowned not only for its quality, but also durability and reliability and has long been a favourite of specifiers for new building projects or refurbishments. Honeywell Gent is backwards compatible which means existing Gent system owners have the comfort their system can be maintained to a good standard and upgrades made where necessary whilst still maintaining the same rock solid reliability.

T H WHITE has a long history in the installation and servicing of fire alarm systems making the fit with Gent very logical. T H WHITE customers expect the company to stand by them through thick and thin and provide a quality service for generations, while Gent has consistently proved to be a leader in fire safety systems.

"Honeywell Gent is a respected brand in the fire safety market and has been a market leader for many years," said Alex Lockton, General Manager of the T H WHITE Energy, Fire and Security Division. "We are delighted with this new partnership as the fit between our brands is ideal and will suit many of our customers who look to T H WHITE to source strong brands to support them."

Our Energy, Fire and Security Division has extensive experience in the fire sector gained over more than 25 years, and today it offers full in house design and installation services. We are also able to provide our customers with 24/7 year-round service support.

Our accreditations include NSI Gold, BAFE, Achilles, Safe-contractor, NICEIC, ISO9001 and ISO150001, and we work with public and private sector commercial clients.

Call 01380 726656 or email alarms@thwhite.co.uk if you would like a quote for a new installation, upgrades or retrofit projects, as well as service and maintenance contracts supported with reactive call-out and remote monitoring where required. www.thwhitesecurityandfire.co.uk

AGRICULTURE

A towed Logic GDS150 salt gritter coupled to a Honda Pioneer UTV.

TRUE GRIT FOR WINTER

As colder weather approaches be ready with our professional, stainless steel LOGIC road/rock salt gritters.

Choose either towed or deck mounted configurations, from a variety of models such as the wheel-driven 270ltr GDS 150, suitable for towing behind an ATV, compact tractor or UTV.

The GDS Salt Spreader uses a moving-floor conveyor system similar to highway-sized salt spreaders to deliver the salt to the spinning disc system. The hopper will hold 270 litres (approx. 335kg) of road/rock salt and is capable of spreading all types of material, including wet rock salt, grit and sand. A unique agitation system and conveyor floor ensures wet or dry material can be spread effectively and accurately by a spinning disc. Working speeds of up to 15mph and road speeds between sites of up to 30mph mean wide areas can be covered quickly and efficiently. Road and non-road versions are available with prices starting from £5,930 plus vat.

The deck-mounted PDS150D, (suitable for applicable UTVs) is powered by a Honda engine and is ideal for roads, pathways, city centres, cycle routes, car

A PDS150 salt gritter mounted into a Kawasaki Mule, also fitted with an electrically operated Logic snowplough.

parks etc. At a spreading rate of 10g/m², on a road 3m wide, 11km can be covered with one load. Prices start from £6,795 plus vat.

Additional models are also available – forklift-mounted or to fit to a tractor 3-point linkage.

For all the details please contact T H WHITE Agriculture or Groundcare: Tim Rochfort on 07973 911934; Simon Knight on 07860 912763; or Stuart Fry on 07774 212926.

Terms & conditions apply to all Winter Service bookings.

MACHINERY IMPORTS

NEW FERRIS ISX®800Z IS TOUGH ON THE ROUGH

steering accuracy are added benefits.

The outstanding suspension means that Ferris mowers impose no daily limitations on allowable exposure regarding hand/arm and whole-body vibrations (HAVs and WBVs).

Dual commercial Hydro-Gear® ZT-3400 transaxles deliver unmatched power and durability. The 132cm rear discharge mower deck with iCD™ technology features a factory-fitted mulching insert and cast-iron spindle housings accommodating double-row industrial angular-contact bearings.

An all new double belt mower drive system is covered by 3 years (max.300

hours) warranty.

Other features include large 23in traction wheels at the rear, a premium high-back adjustable seat with padded arm rests, large 21 litre fuel tank capacity and a foldable ROPS system.

Clive Carter, T H WHITE Machinery Imports business manager, is excited about the opportunities this new model presents: "This is an exciting step for Ferris, with next generation suspension technology that is unrivalled in the market, as well as all the usual benefits that buyers expect from Ferris."

To discover just how tough on the rough (and smooth on the rough) the Ferris ISX®800Z is, why not book your own demonstration? Just go to ferrismowers.co.uk.

Launched last month at the SALTEX NEC show, the all-new Ferris ISX®800Z zero-turn mower takes the already renowned Ferris suspension system into a new dimension.

Not only does this mower incorporate adjustable coil-over-shocks at the rear wheels, it also boasts next generation independent suspension at the front using a double wishbone system. This allows the operator to maintain ground speed on rough turf, not slowing down, and instead taking full advantage of the available horsepower. This results in more covered square meters per hour with lower operational costs, at the same time providing superior operator comfort. As the deck follows the contours of even the most challenging terrain, refined control and incomparable

PROJECTS

SEEDS SOWN FOR NEW PROCESSING PLANT

Construction is now underway in Chichester for a new Crop Research, Technology and Multiplication Centre which incorporates a seed processing plant specifically designed and engineered to meet the production requirements and demands of an evolving and growing market.

Bartholomews, who have been producing seed in Chichester since the early 1940s, have taken the decision to build the facility as a replacement for their current operation at a nearby location.

Recognised as one of the leading UK producers of high quality seeds, Bartholomews, established in 1883, have served the agricultural market for more than 130 years and operate as a family owned business through a network and infrastructure, predominantly in the south of England.

As soon as the planning process was complete and approved and the go-ahead given by the client, T H WHITE Projects commenced work as overall project manager, as well as mechanical & electrical contractor. T H WHITE is working closely with the customer and the civil engineering consultants to expedite this business opportunity and development in Chichester.

As illustrated in the photograph, the civil works and building structure are taking shape on site, with the installation of the mechanical plant scheduled to commence early in the new year. This will include a significant installation of conveying and elevating equipment, processing plant, storage bins and packaging machinery, all located within the specially designed building with its numerous operating platforms and floor levels.

The new site is due to come on stream in late 2019 and will incorporate Churchill Freight Services, bird seed processing and agri chemicals, along with all the ancillary administration to enable Bartholomews to continue to offer their high quality multi seed options, product varieties and excellent customer service across the UK market.

T H WHITE Projects specialises in cereal processing & storage solutions of all sizes, from small farm installations to large commercial/industrial bulk facilities, taking each project from conception to completion and beyond, with standards of back-up and maintenance that are so important at busy times. If you have a scheme you would like to talk about, please do contact us on 01380 723040, or email projects@thwhite.co.uk.

ENERGY, FIRE & SECURITY

ELECTRIC VEHICLE CHARGING POINT GOES LIVE IN DEVIZES

The T H WHITE electric vehicle charge point at Nursted Road Devizes, is now connected to Swarco E.Connect and available for anyone to use. Its location code is SEC.10096.

Go to www.swarcoconnect.org and either download their App or download via your usual App platform. This is now live on both Apple and Android. The cost at any given location will be displayed on the website and within the App. A live map is being developed for the website which will show all the locations of charging points together with prices.

Swarco E.Connect is an electric vehicle (EV) recharging network in the UK, Germany and Austria. It is part of the Swarco Group, which also owns eVolt, a supplier of EV Charge Points.

The charge point, supplied by T H WHITE Energy, Fire & Security Division, has a dual socket universal charger capable of charging the majority of electric vehicles and hybrids. Designed for use on commercial premises, the charger has 2 x 7kw smart charging sockets enabling two vehicles to be charged simultaneously and means visitors and staff to our head office can now plug in while they visit to help top up their car or van for their next journey.
