New season cultivation, fertilisation and drilling

Golf & Utility department launched

Our 2019 Case IH hire fleet is landing!

A PIONEER IN ESTATE MANAGEMENT

The task of maintaining an estate, as well as transporting people and loads across rough country is made much easier by a tough, reliable UTV. That's particularly true now that the shooting season is well under way and UTVs don't come with better credentials than the Honda Pioneer.

In many ways the Pioneer, available in two or four-seater models, was the obvious choice for Alex Hogg, gamekeeper on a 7,000-acre estate in Peebleshire. The land he manages ranges in altitude from 800ft to 2,200ft, well up into the snowline. The estate has walked-up grouse, driven pheasant plus fallow and roe stalking.

"We already had a Honda ATV, so it was a natural decision to go for a Pioneer when it came to a utility vehicle," said Alex. "I have to admit that I was apprehensive at first as to whether a utility vehicle would be as nimble as the ATV, but I need not have worried. It's well-gearred for the hills and just as grippy as a bike, if not more so. I hardly ever use diff lock, even on our hills."

What really sealed the decision for Alex was the question of reliability. "Hondas are just second to none when it comes to starting first time, whatever the weather."

He did add on a full cab as well as a heater, which he says is a blessing for keeping warm and demisting the windscreen and the all-important binoculars when out stalking. He also opted for a load carrier in the back. "We often use it to clear up fallen trees, often packing it

full of wood and tools. It's great to be able to take the load liner out and still have clean seats."

Alex has also found the Pioneer to be economical. "It hardly uses more than an ATV, so it doesn't burn as much fuel as you'd think."

One of the main advantages of running a vehicle such as the Pioneer is how light the vehicle's footprint is. "It hardly leaves a mark, yet it has the room to carry folk and plenty more."

The Pioneer is used every day on the estate, to fill feed hoppers, take stalkers out on the mountain or to ferry guns around on shoot days. "We have the four-seater model, which is just great for taking up to three guns out to their pegs easily and quickly, especially those who are a bit older."

The ATV is still used to spin out grub for the birds, but most other tasks are now done with the Pioneer.

It's easy to see from Alex's experiences on a particularly challenging estate just what a boon the Honda Pioneer could be on land in Wiltshire, Somerset, Gloucestershire or Berkshire! And the really good news is that the Pioneer is available now from T H WHITE with 0% finance. What's more,

if you buy a Pioneer before 29 March you can also get a genuine Honda half cab for just £999+vat – PLUS a TraKKing device fitted as standard to all new Pioneers with a free-to-download app.

Want to know more or try out a Pioneer? Just contact our ATV/UTV specialists Tim Rochfort (07973 911934), or Simon Knight (07860 912763).

AGRICULTURE

NEW AGRICULTURE BRANCH FOR HEREFORD

A new T H WHITE Agriculture branch is open in Hereford following acquisition of part of the JG Plant Ltd business.

New Holland dealer JG Plant entered administration on 12 December 2018. The company had depots in Hereford and Bridgend and T H WHITE acted swiftly to acquire some elements of the Hereford operation to ensure continuity and a seamless transition for customers. All 16 staff at Hereford – including general manager James Ashworth – have transferred to T H WHITE, meaning that customers will continue to deal with people they know.

To underpin the deal T H WHITE has taken over the New Holland agricultural machinery franchise for Hereford, a

move which is fully supported by New Holland's Business Director for UK & Ireland Pat Smith: "T H WHITE is one of our longest-standing dealers and it's great to see them growing in this way," he said. "Their long history and experience with the brand will bring new stability and confidence to the Hereford operation."

T H WHITE managing director Alex Scott commented: "Adding Hereford to our already strong agricultural sales region brings a great opportunity. We are delighted to welcome the new staff and we will be working hard to deliver an enhanced experience for customers."

The new branch is located at The Beech Business Park, Tillington Rd, Hereford HR4 9QJ, Tel: 01432 352333.

PROJECTS

40 YEARS OF ACHIEVEMENT

2019 marks 40 years since T H WHITE Projects became fully operational as a stand-alone division.

To mark the occasion we are planning a number of special items, including a supplement with the February 2019 edition of White's World which will chart the development of the division from grain installations for farmers and emergent co-operatives, to today's large and diverse operation which designs and constructs cereal processing plants, port loading facilities, commercial and utility installations and steel fabrications. We have also produced a 12-page brochure (pictured) which explains in more detail the range and depth of the division's activities, from initial planning to completion and commissioning. If you would like a copy, just call 01380 723040.

WHITE'S WORLD ONLINE

WHITE'S WORLD is also available in digital form where stories can easily be reviewed by division. In the digital edition we include up-to-the-minute stories that may be received too late for the printed magazine.

To sign up for digital updates, please visit www.thwhite.co.uk/sign-up. We will then send you a monthly email with links to all the top stories and offers.

As always, you will have the option to unsubscribe at any time.

GOLF & UTILITY

SPECIALISING IN GOLF & UTILITY VEHICLES...

A brand new T H WHITE specialist department is being launched this month, focusing on golf and utility vehicles.

The initiative has been born out of the growing demand for golf buggies, hospitality vehicles, personnel transport and UTVs, independent of the main groundcare market. T H WHITE is already an official dealer for E-Z-GO, Cushman and Kawasaki vehicles and now our 25 years' experience in the sector will be brought to bear on delivering the right packages and solutions for every customer.

The new operation will offer the

E-Z-GO RXV and TXT ranges in petrol or electric versions plus those with the new ELiTE lithium battery, Cushman Hauler

UTVs, Shuttle personnel carriers and Refresher catering and merchandise vehicles.

From Kawasaki there will be the famous Mule ATVs.

Aftersales service will be a key part of the venture, working from four branches across the

Midlands and the south, as well as on-site repairs and servicing opportunities.

For details visit thwhitegolfandutility.co.uk, or contact Simon Bingham on 07813 835212, sjb@thwhite.co.uk.

EFFICIENT WORK, GREATER PROFIT FOR THE NEW SEASON

Väderstad Top Down 400

As the new season gets under way, the importance of soil cultivation, fertilisation and seeding becomes paramount. T H WHITE Agriculture is an official dealer for leading brands that can help arable farmers maximise efficiency and profitability in these key areas.

Cultivation

Väderstad's Top Down cultivators are available in widths from 3m to 9m, defined by the model numbers 300-900. Designed to perform both a full-scale shallow cultivation and a deep cultivation in a single pass, the Top Down models truly are multi-purpose cultivators. 12.5cm-spaced discs on individually suspended disc arms create fine tilth by cutting and mixing the top soil. The 27cm spaced tines then loosen and mix the soil and crop residues down to 30cm working depth. In the final two working zones, the leveller and packer then concludes by ensuring an even and fully reconsolidated surface. You benefit from preserved soil moisture, low soil compaction and **high capacity**.

The most popular models are the Top Down 400 and 500, but the whole range can be adjusted for varying soil conditions, the driver being able to adjust the intensity of the hydraulic levellers with millimetre-precision on the move.

Also from Väderstad comes the Carrier range of disc cultivators for high speed primary tillage and seedbed preparation. The wide range of front tools, discs and packers enables Carrier to handle the challenges from ultra-shallow cultivation to a deeper incorporation. Depending on the discs fitted, the Carrier can be used for ultra-shallow tillage at 2-3cm depth, right up to 16cm working depth. The versatility it brings **saves passes, decreases machine cost per hectare**, and provides the best start possible for the coming crop.

Kuhn also supports our tillage line-up with a wide range of mounted and semi-mounted reversible ploughs, all practical, robust implements designed for long life as well as safe and easy use.

If you are looking for a wide roller, the King roller from He-Va would be difficult to beat. With working widths of

12.3m, 15.3m, 16.3m, 18.3m or 20.3m, the King roller also features supreme contour-following to ensure consistent, high quality results across the field. To give some idea of efficiency a 15.3m set of Rolls travelling at 6km/hr with a driver driving at 90 per cent field efficiency, will cover **8.25ha or 21 acres per hour**.

When it comes to a minimal tillage regime there is a comprehensive range of solutions available from Pöttinger. Synkro tine cultivators, with a working width of 4-6m, are famed for their ability to cultivate at a consistent depth whilst ensuring all soil is moved and root structures cut clean through. These versatile cultivators can operate down to a depth of 30 cm and can be configured to suit the seasonal conditions and the job at hand. You can check this out for yourself as T H WHITE will be operating a demo Synkro 4030T Nova this season.

For shallower high speed cultivation the rugged Terradisc range of compact disc harrows is available. Featuring **working speeds up to 18kph** and

being the most popular. Advanced technology means that the fertiliser dose on each spreading disc is regulated second-by-second according to the torque detected on each disc. The EMC detects and corrects flow variations instantly, effecting the **greatest economy** and eliminating the risk of clogging. Even distribution is exceptional thanks to the CDA system common to all AXIS fertilizer spreaders.

The many hi-tech aspects and precise delivery offered by Kuhn spreaders mean that **thousands of pounds worth of savings** can be achieved when treating large acreages.

Another economic route to effective fertilisation is offered by **Hardi** sprayers. The line-up includes trailed and mounted versions with fixed or folding booms in widths from 12m to 42m and a variety of capacities up to 4,000 litres.

Kuhn Axis 40.2 twin disc fertiliser spreader

patented Twinarm technology, these innovative disc harrows incorporate large 580mm diameter discs with excellent clearance for working large amounts of chopped straw and stubble. Reliable, even with high levels of straw and mulch, the Terradisc is able to incorporate harvest residues without blockage. Unrivalled mixing, combined with a level finish, ensures the best conditions for subsequent operations. Models range from 3m to 10m and we are operating a demo Terradisc 6001T.

Fertilisation

Fertilisation now accounts for a major portion of costs on all arable farms, and thus has a considerable influence on **profitability**. Accurate application is the key to success and **Kuhn** – long-time market leader in spinner fertilisation – pioneered hydraulically-driven machines with its EMC (Electronic Mass Flow) which can now be PTO-driven. The Kuhn Axis models feature an enormous working range from 12m to 50m and a capacity of 1,000 to 4,000 litres, with the mid-range 30m to 40m implements

Väderstad Carrier XL625

horsepower requirement to a minimum. For example, a 3m EasyDrill typically **needs only 90hp to pull** – considerably less than many other implements – which reduces fuel consumption, tractor weight and therefore damage to the soil structure when drilling in damp conditions.

Seed drill technology is also a key part of the business at **Pöttinger**, ranging from the simple mechanical Vitasem models, to the technologically-advanced Aerosem mounted pneumatic range and the range topping Terrasem – available in working widths up to 9m. **Full variable rate control is a standard feature** across the Pöttinger drill range. Terrasem models can be specified

with conventional cultivating discs or the all-new Wavedisc low disturbance system and a choice of row spacings at 12.5 and 16.7cm. Models can also be specified with a fertiliser option which allows simultaneous exact placement of fertiliser in rows adjacent to the seed.

You can find out more about all the machinery listed here by contacting any T H WHITE Agriculture branch – we would also be very pleased to arrange demonstrations so you can be sure you are choosing the right equipment.

Väderstad is currently offering a subsidised finance deal 1+ 1@0% (one payment, and balance one year later at zero percent interest) – don't delay!

Sky EasyDrill

Seed Drilling

Speed is important when seeding large acreages and the Rapid seed drill from **Väderstad** carries out seedbed preparation, levelling, drilling and re-consolidation in one pass. At the heart of the Rapid is an ingenious depth control system, adjustable from the cab. The system uses each packer wheel to control the drilling depth of two seed coulters, while at the same time applying re-consolidation. Thanks to this, Rapid is able to create an even emergence in all conditions.

The single disc seed coulters penetrate the soil with a very high coulter pressure upwards of 150kg, resulting in an exact seed depth even at high working speed. The Rapid places the seed at a greater depth than the working depth of the cultivating front tools, providing important seed-to-soil contact and ensuring that the seed is surrounded by undisturbed soil, providing all-round water absorption. Behind the seed coulters, the large packer wheels effectively close the seed slots, creating **optimised seed-to-soil contact** in all conditions.

The **Sky EasyDrill** is the result of 39 years of product development and is one of very few direct drills that can truly be regarded as a direct drill, a mintill, a grassland and a cover crop drill. It's low disturbance disc coulter and press wheel not only ensure minimal weed seed germination, they also keep the

ENERGY, FIRE & SECURITY

**NEW LOOK WEBSITE
CRYSTALISES OFFERING**

The comprehensive products and services from T H WHITE Energy, Fire & Security have now been brought together in a brand new divisional website, efs.thwhite.co.uk.

T H WHITE is a leading installer of security systems, including alarms, access control and CCTV and fire safety systems. In terms of renewable energy the division is also a leader in the supply and installation of solar PV systems combined with the latest battery storage solutions. We are also one of the few electric vehicle charge point installers in the country and we have the in-house capability to provide accredited engineering to install a full range of vehicle chargers for all commercial businesses and car parks.

A recent development is the appointment of T H WHITE Energy, Fire & Security as a **Gent 24 Systems Integrator**, joining an elite network and able to provide design, installation and service and maintenance of the Honeywell Gent range of fire safety systems. Honeywell Gent is a sought-after marque in the fire safety market and a market leader for many years and this new partnership further strengthens the offering from the division.

As well as supply and installations, T H WHITE Energy, Fire & Security undertakes upgrades, retrofit projects. We also offer service and maintenance contracts supported with reactive callout and remote monitoring where required.

We are NSI Gold, BAFE, Achilles, Safe-contractor, NICEIC, ISO9001 and ISO50001 accredited and able to support public and private sector commercial clients. To learn more visit efs.thwhite.co.uk, or call 01380 726656.

Case IH Puma 220CVX

THE HIRE FLEET IS LANDING...

Many farmers have found that hiring equipment for the season is a cost-effective way of ensuring capability and reliability while always benefiting from the latest kit.

This year T H WHITE Pro Agri will be operating a Case IH tractor hire fleet with machines for amenity applications, grass and hay work as well as demanding arable and silage tasks. It is expected that the new Hire fleet will land at T H WHITE in late February, but based on the experience of previous years demand will be high, so please do contact us now to stake your claim and be sure of getting the kit you want in 2019!

We can accommodate short or long-term hire, so whether you are planning to hire for a week, a month, or even a year, we can put together the right contract. And if you are looking for multiple machines or even a small fleet, we will pull out the stops to make sure you have exactly what you need – just let us know as soon as possible. The tractors on offer include:

- Farmall 95C HiLo**
- Farmall 95C HiLo Loader ready**
- Puma 150 MC**
- Puma 200 CVX**
- Puma 220 MC**

All our Case IH hire contracts are backed by Service Support from our team of qualified engineers.

You can register your interest with T H WHITE Pro Agri now on 01264 811260 (Stockbridge), or 01373 465941 (Frome).

MACHINERY IMPORTS

TIDY GROUNDS AND SLOPES FOR THATCHERS

Thatchers, the well known cider maker based at Myrtle Farm in Sandford, Somerset, has purchased a Spider ILD01 remote controlled mower.

The new mower will be used around the ever-expanding cider mill and adjoining orchards to maintain the premises to the highest standards.

Commenting on the new mower, Neil Day, operations director at Thatchers, said: "We were founded on this site in 1904 and the current managing director, Martin Thatcher, is the fourth generation of the family to head the company.

"Under Martin's stewardship the business has grown substantially and we have had to increase the infrastructure here – most notably the production facilities and warehousing. As a rural company with an international profile, we are considerate about our impact on the environment and keeping our buildings as unobtrusive as possible.

"For example, to construct our new jubilee building we excavated below ground level, which enabled us to lower the roofline. The result was that we now have grass banks to maintain, so we needed a mower that could help us do that. I tasked our maintenance technician, Ed Young, to review the market.

"Searching the internet, I found

various videos of Spider mowers and their tracked competitors. The tracked mowers appeared too aggressive on the turf, and then I reviewed the Spider website. I sent an enquiry to Spider's UK Sales Manager, Nick Penn and a demo was quickly arranged here at Myrtle Farm. I was very impressed, as was Neil, and we virtually placed our order 'on the spot'.

"We have many visitors to Myrtle Farm, including our biennial open day which attracts thousands of people every time. It's important that we keep the premises in pristine condition all year round and the Spider is now integral to our grounds maintenance regime."

For full details of Spider mowers or to find your nearest dealer, please contact T H WHITE Machinery Imports on 01264 811260.

AGRICULTURE

ARE YOU READY FOR GRASS HARVEST?

Before we know it the grass cutting season will be here and if you are thinking of preparing with new machinery, delivery lead times mean that now is the moment to be placing an order.

At the top end of the scale you may be thinking about a forage harvester and the **New Holland FR Forage Cruiser** has huge capacity in terms of tonnes per hour, also using 21 per cent less fuel than the previous model. It's an impressive piece of kit and ready for you to try at T H WHITE. If you are looking for tractor-mounted mowers we have a superb package from market-leaders Kuhn. Used together the **Kuhn FC312 rear and FC3125 front mowers** create a push-pull unit with 6.25m width of cutting width – contact your agricultural rep for a very competitive price!

We also offer Kuhn tedders and rakes including the amazing **MergeMax belt merger** – truly the future of grass raking. More in the next issue of White's World.
