GAINING ACCESS WITH MANITOU

Clean cut at University of Warwick

Kuhn grass kit to improve productivity

Get a cut above with an 'early bird' purchase

After many years as an official dealer for Manitou loaders, T H WHITE has now also been appointed as a dealer for the French company's innovative range of access and aerial work platforms.

Making it easy and safe to access hard-to-reach places, Manitou's aerial platforms are offered in a variety of configurations. Depending on the application, the most appropriate solution might be a platform with a long-reach articulated or telescopic boom, or straight lifts in more confined spaces might call for a 'scissor' lift or a vertical mast.

Starting with the compact 80 VJR vertical mast model which has a working height of 7.65m (25ft), the range includes many configurations right up to the brawny telescopic boom 280 TJ which can reach a working height of 27.75m (91ft) while lifting a payload of 240kg (529lb). Where heavier loads

need to be lifted the scissor-lift models come into their own, the 100 SC having a lifting capacity up to 680kg (1,500lb). The models are variously offered with diesel, electric or hybrid power.

Construction, installation and repair tasks are the obvious applications for Manitou aerial work platforms and indeed they are sold through T H WHITE Construction, but there are many other uses too. For example, the ever-increasing size of agricultural machinery such as combine and forage harvesters means that an aerial platform can make it much easier to access higher level inspection panels

and parts. We have recently been using a Manitou 100 VJR when working on combine harvesters in our Marlborough depot (see photo).

If you would like to know more, our Construction specialist Steve Clucas-Tomlinson would be happy to talk through the options. Call him on 07860 593339.

GROUND CARE

CLEAN CUT AT UNIVERSITY OF WARWICK

It really is an impressive piece of kit. Even more impressive is the quality of cut produced by this mower in even the most challenging conditions.

This is the Ransomes MP495 cylinder mower and we visited the University of Warwick's Coventry campus in April where, only a few weeks after delivery, it has already proved its worth on the sports pitches.

Head Groundsman Charlie Yeomans has been looking after the University's turf for 31 years and has always favoured cylinder mowers for the areas which need a perfect finish: "We had been using a Ransomes Commander for the last 14 years which was an excellent machine, but it had worked hard and was worn out so we knew we would have to replace it this year"

When it comes to Ransomes and Jacobsen machines Charlie knows that he will get great support from T H WHITE, and in particular local rep Lee Miles. "Lee arranged a demo for us on a couple of machines," said Charlie, "both cylinder and rotary models. I know there have been great advances in rotary mowers - in fact we use them for many of the rougher areas around the campus - so I was keen to try both cylinder and rotary mowers on the pitches. However, for me there was no contest - the cylinder mower is a little more expensive and requires a slightly higher level of maintenance, but it delivers the very fine quality of cut I was looking for."

The Ransomes MP495 is one of the latest series of Ransomes mowers built on a new, rugged platform that was developed from the ground up to create a new generation of adaptable and practical wide area mowers. Powered by a direct injection 49hp Kubota Diesel engine the MP495 has ample power for the five cutting units and features

electronic lift controls making it highly manoeuvrable and easy to transport. The high spec and cut quality clinched the deal for Charlie, who placed an order for the MP495 with one important extra - the all-weather cab. "Our 15 pitches - for football, cricket, rugby, American Football and Lacrosse - are always in high demand, not only from within the University but also for external matches and tournaments. That means we often have only a small window to carry out maintenance and repair and we have to get the work done whatever the weather.

"Soon after Lee delivered our new MP495 we had a wet spell and the decision to have the cab fitted was much appreciated by our groundsman, Trevor! More important than that, though, is the fact that the MP495 performs fantastically well in the wet, no clogging and no clumping, allowing high quality cutting

when you normally wouldn't even consider going out mowing."

Charlie is clearly a man who makes his choices carefully and, having had the previous Ransomes Commander for 14 years, he envisages the MP495 being part of the University of Warwick groundcare armoury for at least the next 10-plus years. "Part of keeping machines running in the long term definitely depends on the relationship you have with the supplier. With Lee and T H WHITE we have a great relationship of trust - he is really helpful and will do whatever it takes to help us keep things running efficiently. You can't really say fairer than that."

When you are considering your next machine for any kind of grounds or pitch maintenance, why not call your local T H WHITE Groundcare branch? We offer a vast range of specialist equipment and we can help to assemble a package to meet your precise requirements.

AGRICULTURE

GET A CUT ABOVE WITH AN EARLY BIRD PURCHASE

Following the spring sunshine in March and April, growth of hedgerows and verges has been early and rapid this year. In anticipation of a fast start to the cutting season we have made sure that our 2019 order of McConnell Power Arms is in stock and available to customers right now.

As a major UK stockist of McConnell hedgecutting equipment, this year's stock starts with the trusty PA 5455 from just £14,260 Ex-VAT and goes right up to the meaty PA 6570 for non-stop contracting professionals. There's also a little one for the small scale farmer and contractor - we have a PA 3430 motion mini control - compact, light, fuel efficient with outstanding manoeuvrability and precision for working in smaller spaces.

All our McConnell power arms come complete with a cutting head and oil. Buyers can choose a 1.2 or 1.5m head and optional orbital unit which then allows the unit to work at additional angles to cater for cutting in narrow lanes.

Revolution Control
 Our PA 6570Ts come with McConnell's Revolution Control, a state-of-the-art multi-function reach arm control system that enables users to tackle a huge variety of work tasks, offering significant strides in productivity and safety.

Multicut Flailhead
 Our power arms are supplied with the McConnell Multicut Flailhead in which the spiral layout of the lugs ensures that only two flails are cutting at any one time for a smooth, continuous cutting action.

If you are thinking about upgrading your hedgecutting equipment or a brand new purchase, don't miss out on the best - contact your T H WHITE sales representative today for great deals.

70 Series Power Arms Best selling power arm for heavy users

Model	Head	Reach	Hydraulics	Features
PA 6570T	1.2m or 1.5m	6.5m	70hp	Built to withstand the heavy workloads of professional contractors. Easy Drive System, TwinCut and Variable Forward Reach armset.

65 Series Power Arms

The 65-series is McConnell's entry level range of professional Power Arms. Built to last from super-strength Domex steel, 65-series machines are extremely robust, built for contractors and local government. They feature SoftStart rotor engagement, hydraulic safety breakaway, and a cushioned top link for longevity.

Model	Head	Reach	Hydraulics	Features
PA 5565	1.2m or 1.5m	5.5m	65hp	Built to last for full time contractors or busy farming workloads.
PA 6565T	1.2m or 1.5m	6.5m	65hp	Longer reach to tackle intensive verge mowing and hedge cutting. Comes with choice of advanced controls - VRF and Twincut - World's first dual rotor flailhead. One available with revolution control.

60 Series Power Arms

The 60 Series Power Arms are McConnell's most advanced mid-range machines, offering excellent features at a mid-range price. Ideal for large-scale farmers, contractors and local government green maintenance teams.

Model	Head	Reach	Hydraulics	Features
PA 5860	1.2m	5.8m	60hp	Tapered seam welded arms, motion control. Ideal for farmers and contractors.

55 Series Power Arms

Offering power, performance and value for money, McConnell's 55 Series Power Arms are designed for farmers, contractors and local government green maintenance teams. A staple market leader.

Model	Head	Reach	Hydraulics	Features
PA 5455	1.2m	5.4m	55hp	Cast iron pumps, gearboxes and oil filters.

LORRY CRANES

ALAN TAKES THE REINS

Alan Johnson has been appointed Director for the UK Palfinger distributorship, following Mark Rigby's retirement in March.

With more than 30 years' experience in the lorry cranes sector, Alan joined the company in 2017 as Development Projects Manager before becoming General Manager in May 2018.

"Since joining the team in 2017 I've worked on a broad range of projects which have given me the chance to build a strong interface between departments and people, many of whom I knew already from my time in previous roles in the industry."

"Becoming the General Manager of Palfinger UK in 2018 gave me additional exposure to the commercial elements of the business and importantly some great opportunities for increased involvement with customers and suppliers."

"I'm looking forward to working with my colleagues, our customers and suppliers to ensure that we remain a reliable, innovative business and the first-choice partner for customers across the UK. It's a fact that one of the biggest strengths of Palfinger UK is our people. Additionally we have great resources at our disposal to add value to customers across the UK, as well as a fantastic core product from the global market leader, Palfinger."

GROUP

NEW HIGH SHERIFF

Former T H WHITE managing director David Scott was sworn in as the new High Sheriff for Wiltshire and Swindon on 6 April.

The post, which David will hold for a year, combines traditional duties – including attending members of the Royal Family visiting the county, acting as a returning officer at Parliamentary elections, chaperoning High Court judges when they visit the county – with a role as representative in the county for matters of law and order and the judiciary.

"I feel extremely fortunate to have been given this opportunity," he said. "As well as meeting the many bodies and people involved with maintaining law and order I intend to raise awareness of some of the organisations and charities that are helping young people throughout Swindon and Wiltshire"

David retired as MD of T H WHITE in 2015 to be succeeded by his son, Alex.

MACHINERY IMPORTS

SPIDER SHOWS THE WAY AT SAFETY & HEALTH EXPO

For the first time Spider mowers will be attending Safety & Health Expo this year. The show – Europe's leading health and safety event – takes place from 18-20 June at ExCel, London.

Spider mowers are commercial remote-controlled mowers designed for use in high-risk areas where it is considered unsafe to cut grass with a traditional walk-behind mower or ride-on lawnmower, such as alongside highways and railway tracks; beside waterways and reservoirs; at airfields; military sites; power stations and heritage properties. They can safely mow slopes up to 40deg

independently, or up to 55deg using the integrated hydraulic winch – gradients which would normally be considered to be outside safe limits.

The operator controls the Spider from up to 100 metres away, remaining out of harm's way and risk of injury. The low weight of the unit also prevents damage to turf and eliminates soil erosion, while low fuel consumption means cost savings and reduced emissions.

Safe they certainly are, but that does not impede a Spider's productivity. The largest model, the ILD02 can match 15 operatives with trimmers, and all machines feature a unique 4-wheel drive system enabling them to turn 360deg on their axis for quick manoeuvring. Even the slightly smaller ILD01 can mow up to 7,000m² per hour, covering huge areas quickly and easily. You'll certainly get huge value for money from a Spider.

See us on stand SH 1040 at ExCel, or find out more about Spider and arrange a free, on-site demonstration at www.thwhite.co.uk/machinery-imports/spider.

MAY OFFERS

STIHL RE119 PRESSURE CLEANER

Compact cold water high pressure cleaner with 125 bar operating pressure. Steel-reinforced 8m high pressure hose. Maximum water throughput 500 l/h.

With FREE surface cleaner and foaming nozzle WHILE STOCKS LAST!

£249.16

SILAGE STACK NETS 8x25 £30

Cover the silage stack with a JAF close-woven net to prevent bird and rodent damage. Made from UV-stabilised HDPE.
