Top seasonal offers from Väderstad and Kverneland

Working with the largest farmer-owned storage & processing co-operative

AGRICULTURE

WELCOME TO ALL IN HEREFORD

Despite gathering storm clouds, T H WHITE Agriculture held its first customer open evening at the new Hereford Branch on 2 May.

The evening saw around 150 guests visit the depot, both existing and potential customers from the surrounding farming community. They had the opportunity to see behind the scenes at the branch, view our extensive range of machinery and meet our major suppliers including New Holland, Manitou, Kverneland, Lynx, Väderstad, McConnel, Sparex, Jensen, Kramp, MX Handling, HiSpec, Hardi and PLM alongside AgXtend.

Welcoming everyone to the event, T H WHITE managing director Alex Scott explained that the Hereford branch represented a new chapter for T H WHITE, taking on new staff and a new customer base, and he explained a little of the history of the family and staff-owned company, how diversity had been a core strength over the years, and that we

intend to remain in Hereford for a long time. He went on to thank all the manufacturers at the event, in particular New Holland with whom we have had a relationship for over 100 years, and Kverneland who are new to us. Thanks also went to general manager James Ashworth and everyone involved in making the evening a success, supported by the excellent food from Haven Hog Roast and local craft beers from the Wobbly Brewery.

As well as collecting for Hereford's St Michael's Hospice, a raffle was held with an exciting collection of prizes. The first one out of the box, picked by Pat Smith, New Holland Business Director for UK and Ireland, was a pair of tickets for the 2019 Goodwood Festival of Speed. This was won by Anthony Dale of Hainstone Farm.

We hope that the evening's conversations and networking lead to strong T H WHITE customer relationships in this new territory.

PROJECTS

WORKING WITH THE UK'S LARGEST FARMER-OWNED STORAGE AND PROCESSING CO-OPERATIVE

The first thing to strike you about Camgrain's Advance Processing Centre (APC) in Cambridge is its sheer size. With a storage capacity of 180,000 tonnes, it is currently being expanded to 200,000t capacity by T H WHITE Projects.

And that's just one of four grain stores operated by Camgrain - Britain's largest farmer-owned storage and processing co-operative - almost all of which have been built in partnership with T H WHITE. Today Camgrain stores almost 500,000t of grain on behalf of its 550 member farmers, as well as operating the only 'clean wheat' plant in the co-operative sector. The quality and consistency of the grain produced

by the plant means that Camgrain is now a key supplier to makers of market-leading breakfast cereals.

Earlier this year Camgrain was honoured with the 'Nestlé Supplier of the Year' award. "Many of the most popular breakfast cereals contain our grain," says operations director Philip Darke with justifiable pride. "Customers like Nestlé and major flour millers mean not only that our farmers have a reliable market for their grain, but more than 90 per cent of it realises a premium price."

The concept of centralised grain stores was born back in the late 1970s. "The cost of on-farm storage has always been relatively high and it can be difficult

to achieve ideal drying and storage conditions," says Philip. "On top of that farmers faced the time-consuming task of finding markets for their grain. The economics suggested that grain farming could be simplified and become more profitable with large, co-operative grain stores, but the key to making it happen was the availability of European grant aid."

Camgrain's first store was built at Linton, south of Cambridge, in the early 1980s which was when Philip Darke joined the business. "There were certainly challenges and we wanted to benefit from the experience gained by early entrants to the sector. T H WHITE had been working on Hampshire Grain's first store and they had all the credentials we were looking for."

So it was, in 1982, that a working relationship began between T H WHITE and Camgrain which has already endured for almost

40 years. "At Camgrain we developed the specification, planning and civil engineering requirements, then T H WHITE put the whole project together."

The Linton plant opened in 1983 with just 50 farmer members, a number which grew rapidly as more and more farmers saw the benefits. While it's true to say that there will always be a need for some on-farm grain storage, the pooling of production has brought real cost benefits. For example, the cost

The Linton APC was the first to be built by T H WHITE for Camgrain.

Camgrain operations director Philip Darke at the Cambridge APC where T H WHITE is adding 24,000t capacity.

today of an on-farm store to the high specification offered by Camgrain works out at around £200 per tonne, a price which Camgrain can roughly halve. Over a 40 year investment period the annual cost per tonne can be brought right down to around £4. When you add to that the professional marketing which comes as part of the Camgrain supply chain package, membership becomes a very attractive prospect.

As Camgrain's membership has grown, capacity has been increased by additional stores and expansion of earlier ones. The Cambridge APC was opened in 2009, followed by a further 90,000t store near Northampton in 2012. Also in 2012 Camgrain acquired a 50,000t store at Stratford, now providing rapeseed storage and logistics support for Yelo Enterprises Ltd, the operators of an adjacent new build 100,000t rapeseed crushing facility. Strategic location of these stores close to miller and maltster consumers has further streamlined the operation and reduced haulage costs in

the supply chain.

"T H WHITE has worked on all our major projects since those early days," Philip adds. "Although we use competitive tendering and T H WHITE is not always the cheapest, we have a fabulous relationship with the team based on trust and integrity. With a mix like that we are well placed for continuing success in a competitive market. They are currently installing an extra 24,000t capacity at our Cambridge APC and for turnkey projects they are, and will continue to be, our partner of choice - as they have been for the last 36 years."

T H WHITE Projects is ready to help with whatever type or size of project you are contemplating, just as we have been able to work so successfully with Camgrain over the years. Just call us on **01380 723040**, or email our team at projects@thwhite.co.uk to find out more about how we can assist you in making the most of your projects for generations to come.

AGRICULTURE

BIG FORD GATHERING

Photos: Ryan Bundy

Monday 6 May saw 115 Fordson, Ford, New Holland and Ford Conversion tractors assemble at Rowde, near Devizes, for The Big Ford Tractor Working Day.

The annual event held at Jim Butler's Farm, and organised and run by our Agricultural team at Marlborough under Leadership of Andrew Collier and Justin Moore, raises funds for charity and usually attracts around 2,500 Spectators. T H WHITE Agriculture, together with our manufacturer partners New Holland UK and Vaderstad UK, proudly supported the event with equipment and prizes for entrants. Six tractors even came from as far afield as Northern Ireland and the rest from all over England.

The event has established a large following, both among our customers and people attracted by social media, helping to raise over £3,000 for this year's nominated charities - Dorothy House Hospice Care, Freewheelers Blood Bikes and the Forever Friends Appeal at the Bath Royal United Hospital.

HARVEST BREAKDOWN & SERVICE

There's enough to think about at harvest time without worrying whether your equipment is going to let you down.

T H WHITE Projects can help with regular servicing and maintenance of driers, cleaners, conveyors,

augers and elevators to ensure they are ready for the busy period. We can supply and fit parts for most makes of equipment, new or old.

If you do suffer a breakdown we can be on the spot fast to get you back in action. Just call our hotline.

AGRICULTURE

SEASONAL KVERNELAND KIT, IN STOCK & READY TO GO

Whether its tillage, sowing, spreading or mowing, Kverneland has the answer. Celebrating 140 years of agricultural excellence, we have great deals on this outstanding range of kit exclusively from our Hereford branch.

Kverneland Tedders & Rakes from **£7,000+VAT**

8576 mounted Tedder Proline

If you are looking for a heavier-duty tedder, the **8576 Mounted Tedder Proline** (left) features a strong and sturdy design with an exceptionally powerful driveline concept, combined with compact transport dimensions. With a 7.6m working width, it has 6/7 rotors/tines and weighs 980kg.

Kverneland Compactline 8460

The low maintenance Kverneland **Compactline 8460** is a purpose built hay making tedder with standard vibration dampers and a strong V-shaped central unit and central adjustment for border tedding. Weighing only 680kg with 6 rotors/5 tines and a working width of 6.05m, the power requirements are low and operational capabilities impressive.

Kverneland FRO multipurpose 2.8m chopper **£5,950+VAT**

The **FRO multipurpose 2.8m chopper** is ideal for chopping grass, pasture, set-aside land and stubble. It is a minimum maintenance machine suitable for tractors up to 140hp with front or rear mounting. The hydraulic offset offers multi-purpose versatility for clearing out field edges through to road maintenance.

0% FINANCE ON ALL ARABLE EQUIPMENT, GRASS PRODUCTS AND FEEDING AND BEDDING EQUIPMENT UNTIL 30 JUNE
Order by the end of June and defer the first payment until August 2019 at either 0+2 or 0+24 payments at 0%. And if you don't want to defer your payments, Kverneland's flexible finance also offers 1+2 and 3+33 payment plans at 0%. All based on 50% of RRP or balance to finance, whichever is lower. Call your rep today!

For the latest availability on all our Kverneland kit, call our Hereford branch today on 01432 352333, Will Farr on 07495 114325 or Ben Linton on 07495 114479

Kverneland Mowers & Mower Conditioners **From £8,150+VAT**

3232MN mower conditioner

The outstanding 8-disc **3232MN** central mounted mower conditioner is in stock and ready to go from our Hereford branch. It folds into a 125degree vertical transport position with a working width of 3.16m and features centre-mounted spring suspension, nylon tines, a 600/900rpm conditioner rotor and non stop BreakBack System. When encountering an obstacle, the BreakBack will swing the machine backwards and over the obstacle, returning it to the original working position once the obstacle has been passed.

Also available right now is the **3332MT central mounted mower conditioner** with a 3.2m working width and featuring the all-new innovative QuattroLink suspension concept for Mower Conditioners.

The **2828M centre rear mounted disc mower** boasts a 2.8m working width and a weight of only 805kg meaning it can be operated with just a 50hp tractor. It includes hydraulic spring adjustment, non stop break, 125 degree vertical transport solution, central suspension as standard.

Kverneland 2828M disc mower

Kverneland In stock and ready-to-go **£13,950+VAT**

Exacta TL 1500 litre Spreader

We have an **Exacta TL 1500 litre spreader** complete with GPS controlled intelligent spreading, in stock ready to go for just £13,950 EX VAT. Its GEOSPREAD system provides section control with sections of only one metre wide, enabling switching of sections over the middle to reduce unnecessary overlap, thus saving on fertiliser and promoting a better yield.

Kverneland 9472C rotor rake

The Kverneland **9472C** is a **high performance two-rotor rake** producing a nice even centre swath from adjustable raking widths of between 6.2m to 7.2m. Mounted on a strong and stable frame, features include actively-steered wheels, the Terralink quattro system and hydraulically-raised rotors as standard.

ENERGY, FIRE & SECURITY

SITE SURVEILLANCE FOR B&NES

T H WHITE was recently invited to take part in a competitive tender to supply, install and commission comprehensive IP CCTV systems for Bath and North East Somerset Council at two of its sites – Keynsham Recycling Centre in Pixash Lane and Haycombe Crematorium.

Following a site survey and initial customer consultation, T H WHITE submitted a proposal that suited both the

customer's design and budget expectations.

Finding the right balance between cost and quality for CCTV can be a difficult task. However, with the help of our sales team and in-house design crew both criteria were met, allowing the council confidently to place the order with T H WHITE. We look forward to working with the council on the two projects and any other projects that become may available in the future.

AGRICULTURE

NEW HOLLAND LAUNCHES AFTERMARKET PRECISION FARMING BRAND AGXTEND

The range of technologies available to farmers to increase efficiency and profitability while also improving sustainability is growing all the time.

To bring together the best-in-class, easy-to-use technologies, New Holland has launched its new aftermarket precision farming brand, AgXtend. Initially, five innovative solutions will be available through AgXtend, all of which can be fully integrated into New Holland Agriculture's existing PLM precision farming platforms.

CropXplorer is a highly advanced biomass sensor which uses exclusive features and algorithms to determine fertilization rate based on crop needs. It's simple to use, requires no calibration and can be mounted on a standard 3 points hitch or front weight.

SoilXplorer allows users to discover the full potential of their soils using a contactless sensor to measure soil

conductivity at four Xpct more different depths. This results in accurate soil mapping, identifying areas of compaction allowing tillage implements to work at full depth only where needed.

The new **crop NIR sensor** can be mounted on all types of equipment: forage harvesters, combines, balers and tankers. It allows farmers to determine yield moisture as well as crop constituents.

Xpower is the electro-herbicide that allows farmers to replace chemicals with electricity for weeding and pre-harvest desiccation of crops, and the package is completed by the new **FarmXtend App**, a smart weather application working with a complete set of connected sensors.

Full details of the AgXtend offering are available from our specialist Andrew Collier on 07769 931553, or at agxtend.com where there are also downloadable brochures on each of the components.

LOOKING FOR TOP END EQUIPMENT IN THE DRILLING AND CULTIVATION SECTOR?

WE HAVE 'READY-TO-GO' KIT IN LIMITED QUANTITIES - RESERVE YOURS TODAY!

Tempo TPF8 planter

The Tempo TPF8 planter is the new generation high-speed planter, delivering unmatched precision at double the speed of traditional planters in all conditions. Equipped with hydraulic support wheels mounted between the row units, this avoids any tilting in hilly conditions and the wide tyre profile maintains the working depth irrespective of soil type. This 8 row model has four support wheels coupled as a hydraulic unit ensuring an even load and smoother ride further improving planting precision. Fitting most tractors Tempo has low hydraulic requirement, self-sufficient electric power and requires low draught force. This drill is offered with E-Control or ISOBUS control system and the option of a fertiliser kit, disc markers and hydraulic weight transfer.

Rapid RDA600S seed drill

The Väderstad Rapid RDA600S is the seed drill that carries out seedbed preparation, levelling, drilling and re-consolidation in one pass. This model comes with the hardy System Disc Aggressive, track eradicator tines, bout and pre-em markers, interactive depth control, a tramline kit, reinforced tyres, work lights, wireless Gateway technology and E-control as well as Väderstad's SeedEye - a unique calibration system for seed counting and monitoring.

Carrier CR500 cultivator

This NEW Väderstad CR500 Carrier with 470mm discs is a true multi-tasker designed for high speed tillage and seedbed preparation with a wide range of front tools, discs and packers germinating all in its pass. Versatile in handling ultra-shallow to deeper cultivation, the Carrier saves passes, decreases machine cost per hectare and provides the best start possible for the coming crop.

We also have a Carrier 525XL (ex display at £38,150) - a trailed disc cultivator with a 5.25m working width and

Carrier CR525 XL cultivator

adjustable discs. This larger work-horse is well suited for deeper cultivation or breaking up pastures.

Carriers can be configured for five main tasks; stubble cultivation, incorporation, seedbed preparation, small-seed drilling and pest prevention. A full range of disc sizes are available from ultra-shallow tillage at 2-3cm depth up to 16cm working depth. The conical shape of the disc produces fine tilth and mixes residues evenly ensuring the same working angle is maintained irrespective of wear and working depth.

Väderstad has long been considered the market leader, concentrating on 'getting the best from your land,' a purpose shared by T H WHITE Group.

The company's edge comes from its focus on essential drilling and cultivation tasks. Väderstad focuses on creating the optimal soil conditions to maximise yields. Build quality and versatility sets Väderstad apart, also delivering amazing efficiency and productivity.

TD400 TopDown cultivator

£52,000+VAT

This superb EX-DEMO TD400 TopDown Cultivator at £52,000 is the ultimate high intensity multipurpose cultivator, performing both full-scale shallow cultivation and a deep cultivation in a single pass. A TopDown reduces passes, preserves ground moisture, increases capacity and lowers costs.

12.5cm spaced discs on individually suspended disc arms, creates fine tilth by cutting and mixing the top soil. The 27cm spaced tines then loosen and mix the soil and crop residues down to 30cm working depth. In the final two working zones, the leveller and packer then concludes by ensuring an even and fully reconsolidated surface. To adapt to varying soil conditions, the working intensity of the discs can be adjusted from the cab on the move.

To enquire about any of the Väderstad products on these pages, contact your T H WHITE sales representative TODAY.

PLUS... Don't miss our great pre-season deals on new Väderstad Tempo high speed planters! INTEREST-FREE FINANCE AVAILABLE

BADMINTON 2019

The weather was kind and the competition intense. Congratulations to Piggy French on winning the 2019 Mitsubishi Motors Badminton Horse Trials on her horse Vanir Kamira!

The action drew huge crowds and the T H WHITE stand enjoyed some very busy days and super orders, reflecting the fact that it's becoming increasingly important for the smaller landowner to be independent in terms of maintenance machinery. The team mounted an extensive display of Honda ATVs, Logic attachments and Robotic mowers. The most popular items sold this year were related to paddock care, in particular, rollers, harrows and sprayers.

All eyes will be on the new sponsor for next year (as yet unannounced) as Mitsubishi Motors step down after an incredible 28 years as title sponsor.
