## Compact professional walk-behind mower now available from Ferris in the UK

---

Brand new to the Ferris line-up in the UK, the new **Ferris FW15** launches this month at the 2019 SALTEX event on **stand H190**, offering the brand's most compact pedestrian mower footprint ever.

Featuring a host of Ferris' unique features, the brand new FW15 is a variable hydrostatic mower with narrow footprint for trimming in tight spaces, around trees and alongside flower beds.

With a smooth, user friendly operation, the FW15 can be controlled and operated comfortably with just one hand, with adjustable speed control and handlebars with 4-position options for complete user comfort.

The compact 32" mulching deck is made from fabricated, reinforced steel with dual timed, Marbain 5mm thick cutting blades and spring assisted height of cut adjustment lever for quick and simple height changes.

With variable hydrostatic drive, the FW15 provides smooth traction for sloping and level terrain in forward and reverse.

Powered by a Stage 5 ready Honda GXV390 petrol engine, the FW15 has a ground speed of 6.4km/h in forward and 3.2km/h in reverse along with a 2.1 litre fuel tank for longer mowing time.

A special feature of the FW15 is the front wheel set-up, with 'tweel' style swivel wheels which can be locked into position as required.

Bill Johnston, Head of the Ferris UK importer business Machinery Imports, is excited to reveal the FW15 to the UK market at SALTEX.

"This new addition to the line-up offers an exciting new avenue for our Ferris business in the UK.

The 32" cutting deck and compact profile of the FW15 provides a great addition to the trailer for any grounds maintenance professional, with all the exceptional features and build quality users already recognise from Ferris mowers across the country."

SALTEX visitors are welcomed to stand **H190** to see the new Ferris FW15 up close and learn more about the full range of Ferris ride-on, stander and pedestrian professional mowers.
