

CONSTRUCTION

SCOTTISH CONSTRUCTION BUSINESS GOES UP IN THE WORLD

One of the beefiest rotating telehandlers in the Manitou range – the MRT 2550 Privilege Plus – has been added to the plant list at Scottish-based Graph Engineering.

Managing Director George Auld is looking forward to working with the new machine, which was supplied by T H WHITE Construction in mid-February and was put to work straight away on a malting site in East Lothian – a job for which T H WHITE Projects supplied the silos.

With a company history stretching back more than 25 years, Graph Engineering has worked extensively on industrial and grain handling installations across the UK, Europe, Ireland and even in the Orkney Islands, many of the commissions being undertaken with T H WHITE Projects. It was to meet the demands of these larger installations that George bought the MRT 2550. He is a long-term user of Manitou telehandlers and he already has a heavy duty 3.7-tonne lift MRT 2150 in his

fleet as well as an MT 625 purchased from T H WHITE a couple of years ago for lighter work. “We love the durability and reliability of Manitou machines,” said George, “and the 5 tonne capacity plus 25m lift of the MRT 2550 will be a real advantage for installation of steelwork and conveyors.

“In many applications we will be able to use the MRT 2550 as a crane by adding a winch which will give us an extra 4m lift – and up to 7m for lifting lighter loads. The boom on the MRT 2550 comprises four elements which, combined with the 360deg rotation of the turret, allows many operations to be performed without moving the equipment. The E-reco attachment recognition system keeps an eye on the working configuration to detect any overload and make sure that everything stays within the safe working envelope. The machine is essentially a forklift, crane and access platform all in one”

There’s a Manitou telehandler for a wide range of construction tasks. For all the details and impartial advice on the right one for your application, call Steve Clucas-Tomlinson on 07860 593339 or Luke Sellwood on 07780 225104.

LORRY CRANES

DARREN GOES HANDS-ON IN AUSTRIA!

Darren Lappin (in green shirt, far left) was able to try some of the most impressive Palfinger cranes on his visit to the Palfinger plant near Salzburg, Austria.

When Darren Lappin, the owner of DMR Haulage, expressed an interest in learning more about the Palfinger product as part of his new vehicle purchase, the Palfinger UK team decided the best way for him to experience the features was to try them for himself – at the Palfinger headquarters in Austria!

Accompanied by truck sales representative Jack Nutley, Darren was thrilled to have the opportunity to visit the Palfinger factory near Salzburg in Austria, to find out more about the brand, specification options and how he will benefit from his very own Palfinger crane.

Together with Palfinger UK's south east area sales manager Chris Lucchesi and marketing executive Cassie Maxfield, Darren and Jack travelled to Austria for a three-day trip in February.

"We are delighted that Darren was able to take the opportunity to see the manufacturing facilities for himself," said Palfinger UK's Chris. "He was able to meet many members of the Palfinger team in Austria, experience a range of different crane specifications in a safe

environment and ask lots of questions to learn for himself why Palfinger cranes are the global market leaders."

The visitors were given a guided tour of the factory in Lengau, Upper Austria, seeing first-hand the journey of a Palfinger crane in production – from cutting, bending and welding the base materials, through to the 14-step coating and painting processing, and finally the fitting, mounting and testing departments.

Before they departed, Darren was able to get 'hands-on' with real Palfinger cranes at the specialist Demo Centre in Salzburg. Spending the entire afternoon there with dedicated Palfinger sales trainer Florian Kaiser, Darren and the group were able to use a range of Palfinger cranes. "This enabled Darren to experience all the options, from joystick controls through to P-Fold automatic folding, winch systems and fly jibs," commented Cassie. "As a result, he was able to make an informed decision on a crane that will be an integral part of his business for many years to come – hugely important for an owner-operator such as Darren whose livelihood depends on his vehicle."

AGRICULTURE

NEW T5 DYNAMIC COMMAND

New Holland has expanded its T5 series tractor range by adding Dynamic Command models with eight-speed double-clutch transmissions (24/24).

The compact size and tight turning circle of the T5 Dynamic Command make it ideal for livestock, dairy and mixed farming, particularly suited to loader and yard work. It's a high productivity tractor which is also capable of high PTO work such as mowing, baling, ground preparation and light tillage.

The powershuttle has a separate forward/reverse clutch for controlled shuttling also on steep slopes. The groups are selected fully automatically. The responsive gearbox and its StartStop function eliminates clutching in loader work at low ground speeds, greatly reducing operator fatigue.

The proven NEF four-cylinder, 4.5-litre engine with ECOBlue™ HI-eSCR2 technology achieves up to 140hp

maximum power and delivers 630Nm at 1300rpm maximum torque in the T5.140 at the top of the range.

The tractor operator can match the speed of the tractor precisely to the job without altering the range (the T5 Dynamic Command™ offers a broad spread of speeds within the three ranges), resulting in increased productivity, and enhanced economy. Range shifting is automated, with dedicated clutches for forward and reverse providing a controlled power shuttle, even on hilly terrain.

The ultra-quiet Horizon™ cab together with the SideWinder™ armrest create a best-in-class environment for the operator, and the new Super High Visibility Panel allows excellent all-round visibility, right up to the raised bucket.

The versatile T5 Dynamic Command is available to order NOW from your T H WHITE rep.

T4 IS BEST SPECIALITY TRACTOR

The New Holland T4 has scooped the 'Best Speciality Tractor of the Year' accolade at the Agritechnica show.

The criteria for selection included the engine, transmission, comfort, agility and design. On top of that, New Holland has upgraded the T4 with its renowned Terraglide front axle suspension to deliver a remarkably smooth ride. There's also the option of Trelleborg PneuTrac tyres for enhanced traction when working on hillsides, as well as improved fuel economy.

The Terraglide system allows the operator to control the suspension height, adjusting ground clearance according to the conditions and the height of the front implement. Even when working on a slope the tyre never comes into contact with the tractor. Automatic ride height control ensures that the full suspension stroke is always available, even under heavy load. Axle roll control further adds to the tractor's stability and safety.

It all adds up to a tractor that's perfect for the specialised conditions encountered in narrow and wide vineyards, cultivation in restricted spaces and hill farming on steep slopes.

Call your T H WHITE Agriculture rep NOW for details of all New Holland tractors, or to arrange a demonstration.

TOP SALES PLUS HAY & FORAGE DEALER OF THE YEAR AWARD

T H WHITE has been named New Holland Hay & Forage Dealer of the Year for the second year running.

The award was announced at the New Holland Dealer Conference held at the Imperial War Museum, Duxford on 14 January. During the conference the T H WHITE team received a number of mentions. They were positioned third for overall 'Dealer service' performance throughout 2019 and fourth in the 'Dealer of the Year' performance league tables. But most notably three of the top ten tractor sales representatives in the UK were selling from T H WHITE. Well done to Ben Linton, Andy Taylor and Ryan Lanfear.

Agricultural Director David Rapkins said: "Since joining T H WHITE I've been inspired by the passion and commitment demonstrated by our high calibre staff. Their knowledge and dedication is outstanding and this award validates that."

T H WHITE GROUND CARE

SAVE 10% ON WINTER SERVICING

Book a winter service for your groundcare machinery before 31 March 2020 to receive a 10% discount on labour and in-stock parts.

GREAT 0% FINANCE DEALS

There has never been a time like this for some remarkable zero per cent finance offers which also allow you to spread the cost of new equipment.

For a limited time 1+2 annual payments at 0% are available on our 'in stock' **Manitou** MLA T533, MLT635, MLT741 and MLT737 telehandlers, subject to minimum balance to finance of £35,000 and delivery to customer by 31 March 2020.

Until the end of March at our Hereford branch we are offering 2+22 or 1+2 at 0%, on **Kverneland** mowers, mower conditioners, rakes, tedders and bale wrappers and disc spreaders.

Our other agricultural branches are also offering 0% finance on all **Sky** and **HeVa** equipment with an RRP greater than £20,000,

available on up to 50% of the RRP. Three schemes are available, 1+2 annual payments, 3+30 Monthly Payments, or 6 Month

pause followed by 2 annual payments, all at 0% interest.

Our key franchise New Holland is even offering 0% finance over four years (see page 8)!

For all the details, terms and conditions of these offers, please contact your T H WHITE sales representative.

SKY EASY DRILL AVAILABLE FOR DEMO

For the 2020 season T H WHITE is operating the latest **Sky Easy Drill W6020 Fertilsem HD Pro E-Drive** as a demonstrator.

The EasyDrill is specifically designed as a no-till drill but works equally well in minimum tillage conditions, on consolidated ploughed soil and when drilling into cover crops. Speed and accuracy is better than ever but you don't have to take our word for it – just book a demo with your T H WHITE representative to see just what it can do on your own farm.

MACHINERY IMPORTS

A NEW AUDIENCE FOR QUALITY MOWERS AND CHIPPERS AT BTME

Taking place at the end of January each year, one of the largest turf management exhibitions – BTME – welcomed T H WHITE Machinery Imports as a new exhibitor this year.

Representing high quality professional equipment from Ferris, Wright, Spider and Jensen, the Machine Imports team was keen to showcase the benefits of this blue-chip machinery for golf and sports clubs. Typically the customer base for these brands includes contractors, local authorities, public parks and private estates, but strong interest at the show proved that many greenkeepers are also keen to learn more.

Ferris mowers were a particular focus of interest, including the new hydrostatic, pedestrian FW15 mower

and the compact 400S, ideal for maintaining ground below trees and between obstacles around the edges of golf courses and sports fields.

Although most sport and recreation areas are typically level and even, the wider site often includes decorative hillocks, steep grassy banks or water features. It is in these locations that the remote-controlled Spider slope mowers excel. Featuring lightweight, compact construction with 4-wheel drive, Spider mowers can be controlled safely from a distance while cutting on slopes up to 55 degrees.

The new Spider Cross-Liner also received a lot of attention, with its low ground weight, terrain-following chassis and high-quality mulching deck lending itself nicely to grounds maintenance on sports pitches and golf courses alike.

These days many clubs are having to operate on leaner budgets for large purchases such as grounds maintenance machinery, so getting the best value for money is imperative, something that characterises Ferris mowers. With a Ferris you will experience some of the most productive mowing speeds in the industry, patented suspension and

hard-wearing components. A Ferris will provide a longer machine life and more comfortable ride with easy-to-service parts requiring less maintenance.

When it comes to woodchipping, Jensen

chippers remove much of the effort required when maintaining trees and shrubs. Jensen chippers are recognised as the most durable and powerful woodchippers on the market with lifespans reaching upward of 20 years, providing exceptional value for money with high performance.

Exhibitions such as BTME provide a great opportunity to meet with customers and dealers from across the country, sharing industry knowledge and showcasing a wealth of products that can make sports ground maintenance easier, more efficient, safer and more eco-friendly.

AGRICULTURE

WE ARE HIRING!

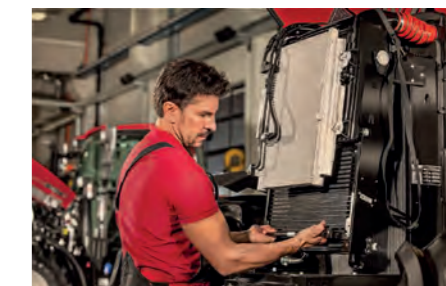

T H WHITE currently has some great career opportunities across its Agricultural division branches.

Amongst the posts available are:

- **Territory Sales Professional** focus on New Holland sales for Frome, Somerset, and surrounding areas
- **Sales Manager** for our Case IH dealership in Stockbridge, Hampshire, also covering our South/South West territory
- **Agricultural Technicians based at:**
 - Knockdown (Tetbury)
 - Frome (Somerset)
 - Hereford
 - Toddington (Gloucestershire)
 - Stockbridge (Hampshire)
 - Marlborough (Wiltshire)
- **Parts advisor** for Frome and Huntley

Each of these various posts offers the applicant the prospect of a rewarding career with one of the longest-established UK agricultural businesses together with a competitive remuneration package.

More details of the posts and an application form can be accessed at www.thwhite.co.uk/current-vacancies.

PREPARE FOR THE LAMBING SEASON WITH ATVs, UTVs AND TRAILERS

With spring coming and the excitement of lambing not far away, it might be time to look at upgrading your machinery or adding to your existing equipment to make the job a little easier. We've highlighted here the popular lightweight **Honda TRX420** range, **Kawasaki MULE MX PRO** and the labour saving livestock and bale trailers from **Logic**.

Logic Sheep trailer FROM £1,100+VAT

This robust trailer features an A frame drawbar, flotation tyres, safety swivel hitch, rear ramp and lamb gate and a removeable lamb divider. Everything you need for transporting ewes with lambs safely and with minimum stress. Choose from 1.5m to 1.8m long.

Honda TRX420 Fourtrax ATV range, TRX420FM1 / FM2, TRX420FA2 / FA6 From £6,425+VAT

These ATVs are lightweight, economical and incredibly reliable. Choose from manual gearchange or automatic DCT with optional electric shift, with single shock absorber swing arm rear

suspension, or independent.

Power steering and front disc brakes make handling a breeze, not forgetting the unbeatable residual value of a Honda and the reassuring two-year warranty. For peace of mind every Honda is also supplied with a free GPS tracking device (terms and conditions apply).

Logic Bale trailer

From £1,650+VAT

When feeding live stock in the field, it isn't always practical to take the tractor or telehandler, especially given the mess they can make with recent ground conditions. An alternative solution is to tow a Logic round bale trailer behind your ATV or UTV. This is easy to operate, as the bale can be winched off and lowered to the ground by a simple winch mechanism and it takes no time to move bales around effortlessly.

Kawasaki Mule MX Pro From £8,929+VAT

One of the lightest UTVs on the market today. Featuring a quiet, yet powerful 700cc petrol engine, it is both responsive and economical. Features include power steering, bench seat, protective half doors, seat belts, tipping rear bed, independent suspension, disc brakes 2/4wd, low range and difflock. The MX Pro can be specified with either full cab with doors or half cab, both with a fully opening windscreen.

T H WHITE BECOMES Ktwo DEALER

T H WHITE has just been appointed dealer for Ktwo, the British manufacturer of quality trailers and muck spreaders widely regarded as market leaders.

Our agricultural branches are offering the full Ktwo product line-up. Machines in the muck spreader range includes vertical and horizontal beaters, all designed to give maximum output with consistent and accurate spreading. Commercial axles and brakes are fitted as standard, and machine life is extended by controlled shot blasting and

finishing during production with 130 microns of two-pack marine specification paint.

The Ktwo Duo Mk 6 range are among the most useful machines for most farmers and contractors looking for a versatile manure spreader. Twin vertical beaters and rear discharge ensure good accuracy and outputs. Available in capacities of 6-14 tonnes (9.8-23.2 m³) and with a wide range of optional extras, the Duo Mk 6 can be specified to suit most requirements.

T H WHITE will be operating a Duo 12 tonne muck spreader as a demonstrator this season, alongside the latest Ktwo Roadeo Compact & Push 20 tonne trailer. This is the UK's most popular compactor trailer, which doesn't tip to empty but instead it compacts and pushes its contents out, offering maximum efficiency creating up to 40 per cent extra capacity through compaction. Featuring

Duo 12 tonne muck spreader

a high standard specification combined with the benefits of a pusher trailer over a tipper, the Roadeo is available in capacities of 16-25 tonnes (27.0-50.0m³). With a range of optional extras, these trailers are ideal for silage, grain, woodchip and waste haulage.

Seeing is believing, so to arrange a demo of either the Duo muck spreader or the Roadeo trailer call your sales rep.

Roadeo Compact & push 20 tonne trailer

AGRICULTURE

EGO™ POWER SYSTEMS ARE GO!

Following the successful launch of EGO in our Marlborough Country Store, T H WHITE Agricultural Parts stores are now also supplying both domestic and commercial EGO ranges. You can find EGO kit in the Parts Stores at Huntley, Toddington, Frome, Devizes, Hereford, Stockbridge and Knockdown.

An innovative and patented '56V ARC lithium' ion battery is at the heart of EGO products. The range includes lithium powered mowers, hedge trimmers, line trimmers, brush cutters, chain saws, blowers and the award winning multi-tool which brings together one power head and nine powerful tools. The commercial range offers these products with more power and durability together with commercial back pack batteries, harnesses and professional attachments. All domestic products are backed with a five-year tool and three-year battery warranty, while a

dedicated one-year commercial warranty is available for EGO Power+ commercial products.

EGO pioneered the technology of fast charging, resulting in purpose-built batteries that utilise their Keep Cool™ technology, absorbing heat energy to keep cells at their optimum temperature for longer. To recharge a 4ah battery takes just 40 minutes from empty. The commercial tools run on brushless motors and are powered by IP56 rated 2.5 - 7ah fuel cells which deliver

power when needed over extended working periods.

What's more, EGO care for its users. The company has carefully designed its products to transmit far less vibration through the user's hands and arms. Prolonged exposure to harsh tool vibrations can cause HAV (Hand-Arm Vibration Syndrome) which is painful and disabling for sufferers. All this makes EGO tools a tempting offering - less noise, lower running and servicing costs and zero emissions - give them a try...

Introductory offer: Mower, battery and charger kit for only £332.50 ex VAT

AGRICULTURE

ESTATE MANAGEMENT EXPERTISE

One of the many things that customers like about T H WHITE is the knowledge, advice and expertise available from our team to help relatively specialist sectors.

A case in point is estate management for enterprises such as country estates, private landowners, large private gardens and those managing shoots or equestrian complexes. These and similar businesses often need an unusual mix of smaller tractors, agricultural equipment and groundcare items, ATVs and UTVs; as an official dealer for a wide range of premier suppliers including New Holland, Iseki, Honda and Kawasaki, T H WHITE is ideally placed to provide exactly the right mix of equipment.

However, offering a wide range of kit is only part of the story. Impartial advice on the best combinations to meet each individual requirement is important too and this is where our estate management specialist **Callum Rea** comes in.

Callum started his career in an estate agency covering the Newbury and Marlborough areas where he was introduced to many large property landowners, becoming acquainted with the particular challenges faced in running estates. Since joining T H WHITE at the beginning of the year Callum has been adopting many of the long-term customer relationships established by his well-liked predecessor Simon Knight. "I know I've got big shoes to fill," says Callum, "but the customers I have met so far have been very welcoming and receptive. It's nice to think of them as part of the T H WHITE family."

As a fan of the great outdoors, Callum is a keen shooter and loves to go out with his border terrier. He is also passionate about athletics - running for the Bristol & West Division of UK Athletics - and he was a professional decathlete before injury dictated a more sober profession!

If you are managing any kind of estate Callum is ready to advise on some of the best kit available today. Call him on 07860 712963.

FEEDER & BEDDING DEMO EVENTS

In conjunction with leading manufacturer Kuhn, T H WHITE is holding two feeder and bedding demonstration events.

On Tuesday 10 March the event will be kindly hosted by the Hann family at Rodden Down Farm, just outside Frome, Somerset (postcode BA11 5LF), and the second event on Thursday 12 March will be held courtesy of the Sainsbury family at Lyegrove Farm, Badminton, Gloucestershire (postcode GL9 1HA). Each demo will be held in

an informal environment and will run from 10.30am to 2.30pm. As well as a Profile Plus feeder, other Kuhn machines in action will include a Primor straw blower and feeder and

a Euromix mixer wagon. T H WHITE will also be demonstrating New Holland and Manitou equipment. It will be a great opportunity for machine walkarounds and to ask questions of the specialist on hand. Hot drinks will be provided and there's no need to RSVP – just turn up!

NOW IT'S 1+4 OR 4+44 @ 0%!

For a limited period you can benefit from enhanced finance plans on New Holland T6, T7 and T8 tractors, including 'S' series models.

With four years to pay you can spread the cost in different ways – either with an initial four payments followed by 44 monthly payments, or an initial payment followed by for annual payments, all at 0% interest. To get the power you need on your farm in the most affordable way you are ever likely to see, just call your T H WHITE Agricultural sales rep.

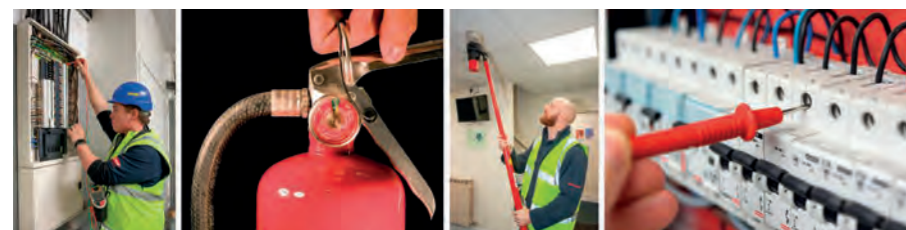

Full terms and conditions on request. Subject to status. Maximum 50% of RRP or balance to finance.

...PLUS SPECIAL DEALS ON T7.210 40KPH TRACTORS

We have a some great deals and finance terms on New Holland T7.210 40kph tractors just now.

This versatile model offers simple power from a premium brand. To find out how you can get more traction for your money, speak to your T H WHITE Agricultural sales rep as soon as possible. These tractors are certain to sell fast, and when they've gone, they've gone.

To qualify, tractors must be delivered by 31 March 2020.

PROTECT YOUR PEOPLE AND PREMISES

SAVE 10%* ON YOUR CURRENT FIRE AND SECURITY COSTS BY SWITCHING TO T H WHITE.

We know that even with the best intentions it's not always easy to keep on top of maintenance, so T H WHITE has a great offer to address ALL your fire and security service needs, saving you money at the same time. For a limited period we are offering 10% OFF* existing annual fees from any other supplier for fire & security servicing contracts, including extinguishers.

OR ADD A NEW TECHNOLOGY TO YOUR EXISTING SERVICE CONTRACT WITH US AND RECEIVE 10% OFF ANY EXTENSION.

If you already have a service contract with us and you add a new technology, we'll reduce the cost of that extension by 10%. So, if we currently service your alarm system, you could add fire equipment, or vice versa. Or, perhaps, add CCTV or door access...

To find out how to claim your 10% discount call 01380 726656, email efs.thwhite.co.uk quoting 'Discount 10' or complete the online form at efs.thwhite.co.uk/contact

*Terms & conditions: To qualify customers will need to provide evidence of annual contract charges or 12 months of invoices from their current supplier. The discount offer is also open to existing T H WHITE customers taking on a new technology with us. For example, if we currently service your fire alarm and you wish to add CCTV or Door Access. We reserve the right to decline a service contract subject to survey.

CHARITY CHIPPING WITH JENSEN RAISES OVER £40,000

The Jensen team at Machinery Imports was delighted to return for the third year to Wiltshire College and University Centre in February, supporting a fundraising activity that has reached over £40,000 since December!

Every year at the Lackham campus, Wiltshire College and Jensen join forces with Dorothy House Hospice to chip over 3,500 Christmas trees collected throughout January from the Wiltshire and Swindon area.

Dorothy House is a charity which provides end of life care and support for patients with terminal illnesses across Wiltshire and North East Somerset. In January, their volunteers collected more than 3,500 Christmas trees, delivering them to the Lackham campus where a Jensen A540 woodchipper, loaned free of charge from T H WHITE Groundcare, was on hand to reduce them for upcycling.

The session was coordinated by Bill Johnston, business manager for Jensen in the UK, partnered by Stuart Fry, area sales manager at T H WHITE Groundcare, who not only managed the chipping of the trees but also demonstrated and taught safe industry practice to students and apprentices on Lackham's Horticulture and Landscaping courses.

The tracked A540 was the perfect woodchipper for the task, with a hugely powerful feed roller grip, wide infeed hopper and 8-inch chipping capacity – making light work of the bulky trees and reducing them into a fine chip quickly and efficiently at a rate of 18m³/h. The chippings were then loaded onto trailers ready for use on woodland trail paths throughout the campus, giving them a second life and avoiding waste.

The A540 Spider's independently controlled hydraulic tracks make it agile, compact and manoeuvrable on flat, sloping and awkward terrain, while retaining superb stability.

"Each year we are delighted to return and support this excellent fundraising initiative" commented Bill. "Not only do we help recycle unwanted trees into something useful, we provide the students with valuable, practical experience in woodchipper use and safety, at the same time helping Dorothy House with its campaign which delivers great benefit to the community."

Fran D'Argenio, Marketing Officer at the college, added, "Lackham's Horticulture and Landscape Gardening apprentices and students benefited hugely from the workshop. The learners gained real hands-on experience and invaluable industry knowledge, as well as participating in a great effort for charity which raised over £40,000."

Find out more about the Jensen A540 and the wider range of towed, tracked and PTO woodchippers available from Jensen at www.jensenchippers.co.uk
