NATIONAL EMERGENCY – Coronavirus Measures

T H WHITE has been trading for 188 years through wars, epidemics and extreme weather conditions which have affected our ability to function normally. We have endured such times continuing to help our customers get the best from their machinery, land and buildings. The Coronavirus is by far the most extreme threat we have experienced in this generation. Amidst the stresses of the personal lockdown we are all facing, there is a similar spirit of communities pulling together and following official advice to get us through this new reality.

Our Group of businesses serve a range of differing customer segments and as such our responses will vary by division. Many of our workforce are designated key workers providing support and goods to those essential parts of the country that MUST keep moving, such as farming to supply the nation's food production or support of fire and security systems in business and residential properties. We remain open for business with the majority of our functions operating remotely and in some divisions a reduced or rotating workforce to keep everyone safe. We would like to reassure all our customers and the wider community that we are taking every step possible to limit the spread of the virus - like others we are employing more stringent hygiene practices and social distancing. Our staff can meet

your needs over the phone, our engineers are mobilised and our workshops and sales counters remain trading. Where possible, we are using available technology such as video calls, web live link as well as phones and email to reduce unnecessary contact. Undoubtedly, we will face staff shortages due to self-isolation and sickness, however we have prepared for this, and hope to remain operating throughout.

At the time of going to press, our delivery channels are operating normally and we are happy to deliver parts and Country Store items for free to those who are self-isolating. Our phones are always on so please continue to ring us. Updates on specific business changes are shown here: www.thwhite.co.uk/coronavirus/ and through our social media channels. We do not know whether printing operations will be affected in the coming months so if you currently receive White's World by post and want to ensure you continue to receive our news, please update your preferences at this link: www.thwhite.co.uk/sign-up/ Simply select email as the way you would like to hear from us and we'll ensure a copy of our magazine is sent to your inbox.

Most importantly, we would like to wish all our customers, colleagues and their families well, and hope you stay safe during this challenging time.

GROUND CARE

NEW HOLLAND AND WIEDENMANN COMBO FOR COTSWOLD TURFCARE

Cotswold Turfcare Ltd, based near Stroud, maintains turf across the South and South West, focusing on sports and equestrian facilities, as well as local authority spaces and private estates.

When owner Phil Cole decided to replace one of his existing tractors and aerators, T H WHITE came to the table with a deal he just couldn't turn down...

"I've always used and liked New Holland tractors," says Phil. "Mike Harris at T H WHITE Groundcare in Knockdown was able not only to offer me a great price but he also had a New Holland T5.120 tractor with a front loader in stock, so it enabled me to get great value for money and pick up a new machine from a local dealer at a convenient time for my business."

Phil had also been

thinking about purchasing a Wiedenmann aerator for several years: "When I was buying the New Holland, Mike gave me a demonstration of the Wiedenmann XD8 aerator and I was really pleased with its performance, so I bought the demonstrator which had only been used for a

few hours. I've been really impressed with the speed and reliability of the Wiedenmann, it operates almost 50% faster than my other machines which means I can

cover more ground.

"Mike is one of the best reps I've ever come across - always there when you need advice, but not at all pushy. He is a credit to the company, and I enjoy dealing with him."

For more information on the range of market-leading Wiedenmann and New Holland machinery, visit www.thwhitegroundcare.co.uk.

AGRICULTURE

GEAR UP FOR SPREADING & SPRAYING

As we come into the cultivation season – especially following the challenging winter – we can help you with some of the best fertilizer spreaders and sprayers on the market.

In stock and ready to work we currently have Kuhn Axis 40.2 and 50.2 EMC (Electronic Mass Control) fertilizer spreaders, fitted as standard with a unique system that regulates the exact fertilizer dose onto each spreading disc. Every second, the metering outlet position is corrected according to the torque measured on each disc, ensuring that exactly the right dose is delivered to the right place, avoiding the 'dose effect' and resulting in speed, accuracy plus elimination of wastage.

The ISOBUS-compatible Axis models feature adjustable working width from 12m to 50m, with a capacity of 1,000 - 4,000 litres.

For smaller applications such as mixed crop and livestock farms or field

crops, the Kuhn MDS series, with capacities from 500 to 2,000 litres and a standard spreading width of 10-18m, are ideal. We have a brand new MDS 20 in stock.

Norwegian-built Kverneland mounted spreaders are among our favourites and are available from our Hereford branch where we have a CL1100, HL1500 and self-weighing TL1500 in stock offering capacities up to 1,500 litres with a spreading width from 10 - 54m.

Top: Kuhn Axis 40.2 EMC fertilizer spreader
Above: Kverneland Exacta CL spreader.
Below: Hardi Commander 10000 trailed sprayer

Spraying is an essential part of the germination and control phase and Kuhn offers both trailed and mounted sprayers to cover a wide range of applications. We also supply Hardi sprayers which go right up to the 9,842-litre capacity Commander 10000 with a 40m boom for the most demanding tasks.

To get the best advice of the right spreading and spraying solutions for you, talk to your T H WHITE rep today!

FINANCE OVER 3 OR 5 YEARS

We're acutely aware that this is going to be the toughest drilling season for years, so we're offering a helping hand with long-term finance solutions.

Now you can cut the cost of drilling your spring and autumn crops and overcome the pressures on cash flow with these special finance offers, only available until 30 April 2020.

Available on all new Väderstad RDAS seed drills, the options are: **PAY NOW**, either 1+2 @ 0% or 1+4@1%. **PAY NOTHING** until January 2021, two annual payments interest free, OR three annual payments @ 1%.

To take advantage of this outstanding offer, contact your T H WHITE rep for all the details, terms and conditions.

INTEREST FREE FINANCE ON OPICO GRAIN DRYERS

Opico grain dryers have been helping farmers to protect their investment and maximising the return from their harvests for more than 50 years.

Now, with 0% finance available on any Opico dryer until 30 April, it's the perfect time to prepare for your harvest grain.

Opico dryers are available as gas or diesel fuelled models with 3-phase or PTO drive. These efficient, reliable and completely self-contained units constantly recirculate the grain to ensure thorough, consistent and economical drying. Speak to your T H WHITE rep – order now and make your first finance payment after harvest.

AGRICULTURE

EARLY SPRING GRASS MAINTENANCE

After a challenging winter we can supply you with the kit to bring your grass back to peak condition – at some great prices!

Honda TRX420FA2 Automatic Fourtrax

Lightweight, reliable and the perfect ATV for paddock maintenance, the Honda TRX420FA2 specifically features a unique DCT (Dual Clutch Transmission), which seamlessly changes gear automatically.... If you want even more control, you can simply switch to ESP (Electric Shift Programme) which allows you to select any of the five gears at the touch of a button. There isn't a more versatile ATV transmission on the market! The TRX420FA2 also features power steering, 2/4wd, start-in-gear, two-year warranty and a tow ball as standard, PLUS an optional GPS tracker free of charge.

Starting at £7,325.00 plus vat, it's already a steal, but please speak to one of our ATV Champions to discuss a deal!

Logic LPH200 Trailed Spring Tine Harrow

This trailed harrow is aimed at customers who are looking for a superior harrowing implement. It is more efficient at removing moss and thatch from grass and has a stronger scarifying action. This makes it better at stimulating grass growth than a chain harrow as it allows more oxygen to get to grass-roots level. Spring tine harrows are also useful when seeding a paddock – harrow thoroughly, sow the seed then roll the surface with a Ballast Roller to firm the seed into the soil. The clever lift mechanism allows you to raise the frame and drive away when finished. The harrow can be towed by a vehicle, compact tractor, UTV and ATV. From £1,595.00 plus vat.

Logic Ballast Roller

The Logic Ballast Roller is available in 1.5m or 1.8m widths (to suit the tow vehicle). It is robustly made with a heavy wall diameter for strength and performance and when filled with water results in a 500kg rolling weight. Any paddock that needs rolling will benefit from a BR150/180 – large enough to cope, but small and handy enough to make using it easy. When used with an ATV, the low ground pressure of the towing setup hugely reduces ground damage. From £1,035.00 plus vat.

Kawasaki Mule DX

Bring on the big guns! The Mule DX Pro has huge load bed capacity combined with high manoeuvrability and can tow 970Kg. The fuel economy from the Yanmar diesel engine is astonishing and the torque delivered gets you through, up and over the most challenging terrain with grip provided by 2/4wd, high/low range and diff lock. Independent suspension and power steering make for a very comfortable driving experience with two-seat or four-seat, half cab and full cab versions available. From £12,079.00 plus vat.

UNIFYING YOUR FLEET: THE NEXT STEP IN ON-FARM TELEMATICS

On-farm telematics are taking a huge step forward with the introduction (once tested) of new cloud-based, pan-machine, data harmonising systems from both New Holland and Case IH.

The new systems will not only harmonise data from mixed fleets comprising machines from different manufacturers, but will bring an end to the era of gathering data from machines on memory sticks. Instead, users will be able to monitor, display and store machine and field data instantly and remotely, managing it either from an office computer or in the field from a smartphone or tablet.

As data gathering and interpretation becomes an increasingly vital tool in efficient farm management, New Holland and Case IH parent company CNH Industrial has purchased farm management information system designer, AgDNA. The specialist software created by AgDNA co-ordinates and standardises data, mapping and analytical tools from different sources, allowing mixed fleet owners to view everything in one place, helping to make decision-making faster and more precise. This added functionality will be integrated with existing web platforms to deliver instant activity and field records, remote monitoring of machine location, fuel levels and much more.

The first fruits of these developments are seen in the roll-out of Case IH AFS Connect wireless technology which builds upon proven elements of Case IH Advanced Farming Systems, bringing together all aspects of farm, fleet and data management. The 'Farm' sector puts field management and agronomic insights at the farmer's fingertips, based on historic and current data, while the 'Fleet' portal allows owners, managers and operators to monitor machine data such as engine hours, temperatures, engine speeds, fuel

consumption and services due, either via the in-cab display, web portal or app. With permission, this data can be shared with Case IH to help ensure machines are operating at peak performance and to identify any issues before they become a problem. Through the 'Data' portal AFS Connect instantly transfers and records data via the cloud, making it immediately available for analysis.

AFS Connect will be available on any Case IH tractor or combine that can be fitted with telematics technology, including Maxxum, Puma, Optum, Magnum, Steiger and Quadtrac models,

Axial-Flow combines and Farmlift telehandlers.

An AgDNA based system will become available for New Holland machines in the coming months - and with all T7.230 and above (long wheelbase and HD) models, plus flagship CX and CR combine models coming as standard with telematic functionality, as well as being AutoGuidance ready, they are primed to take advantage of this exciting development. A redesign of the system architecture means it will become possible to see the IntelliView 12 display remotely (IntelliView Connect), carry out remote diagnostics or push software updates to the tractor (IntelliView Remote Services).

Alongside the developments driven by CNH are two new notable partnerships which will further help to integrate the constructive use of data. DataConnect provides manufacturer-independent cloud-to-cloud data management. In addition to New Holland and Case IH, it works with other equipment from Steyr, John Deere and Claas. Data is accessible through any of the relevant manufacturer portals, but is also exchangeable instantly between systems.

DKE Agrirouter is a universal data transfer hub which now also includes New Holland and Case IH among its members, alongside eleven other machinery partners including leading implement manufacturers. Designed to help ensure compatibility of tractor and implement data management systems, it has more than 20 app creator partners.

Technology is moving fast in farming telematics and we are keen to help our customers take maximum advantage of the developments to increase efficiency and drive profitability. If you would like to know more, or if you have any questions about how these advances could be applied to your farm, please call your T H WHITE Agriculture rep.

Kverneland
SPREAD THE COST
AND PAY NO INTEREST

Zero percent interest is always a great help when making capital purchases, but a huge added benefit when planning cash flow is being able to choose when you make payments and over what period.

Until the end of June our Hereford branch can arrange 0% finance on all Kverneland diet feeders, shredder-bedders and all arable equipment including ploughs, seed drills, power harrows and cultivation implements.

If you order before the end of April you will not have to pay anything until October when one payment will be due followed by a second a year later (0+2@0%). Alternatively you can make 24 monthly payments after the deferred period (0+24@0%). Prefer not to defer? No problem – make one payment up front, one a year later and one a year after that (1+2@0%), or three monthly payments up front followed by 33 (3+33@0%).

Contact our Hereford branch on 01432 352333.

MACHINERY IMPORTS
NEW SERVICE
TECHNICIAN STEVE

Steve Perkins has joined the Machinery Imports team as nationwide Service Technician, providing training and practical service support to the growing dealer network for Ferris, Wright, Spider and Jensen.

Steve's industry experience brings a wealth of servicing expertise to the Machinery Imports business, coming from his previous post as Parts Operations Manager at Farol. Before that he spent 2½ years as the Area Hire Manager at Turflet Hire.

"I'm most excited by this opportunity to be back out in the field again," says Steve, "supporting dealers and customers to get the very best from their machines and helping them to provide exceptional customer support when it comes to servicing and maintenance."

Finance PLUS deferred payments

PROTECT YOUR PEOPLE AND PREMISES

SAVE 10%* ON YOUR CURRENT FIRE AND SECURITY COSTS BY SWITCHING TO T H WHITE.

We know that even with the best intentions it's not always easy to keep on top of maintenance, so T H WHITE has a great offer to address ALL your fire and security service needs, saving you money at the same time. **We are offering 10% OFF* existing annual fees from any other supplier for fire & security servicing contracts, including extinguishers.**

OR ADD A NEW TECHNOLOGY TO YOUR EXISTING SERVICE CONTRACT WITH US AND RECEIVE 10% OFF ANY EXTENSION.

If you already have a service contract with us and you add a new technology, we'll reduce the cost of that extension by 10%. So, if we currently service your alarm system, you could add fire equipment, or vice versa. Or, perhaps, add CCTV or door access...

To find out how to claim your 10% discount call 01380 726656, email efs.thwhite.co.uk quoting 'Discount 10' or complete the online form at efs.thwhite.co.uk/contact

*Terms & conditions: To qualify customers will need to provide evidence of annual contract charges or 12 months of invoices from their current supplier. The discount offer is also open to existing T H WHITE customers taking on a new technology with us. For example, if we currently service your fire alarm and you wish to add CCTV or Door Access. We reserve the right to decline a service contract subject to survey.
