

AGRICULTURE

HANDLING...

When it comes to high quality, durable machinery for lifting, handling and excavating, T H WHITE has always recognised that every farmer or construction professional faces a different set of challenges. To ensure you can benefit from just the right machine for your needs we have always aimed to stock and supply the widest possible range from our brand partners Manitou and New Holland...

There is a strong cross-over between many agricultural and construction applications, so here we showcase some of the most popular and capable machines designed for both areas. Remember though that we can supply any machine from the Manitou or New Holland handling and construction line-ups, so call your local rep today who will be able to advise you on the many choices available.

Top: Manoeuvrability and driveability on rough terrain are some of the many outstanding features of the Manitou MLT-T-533-145v pivot steer telehandler, which will lift 5 tons to 5.2 metres.

Left: Manitou's MLT630-105 is the perfect all-rounder for farm and yard work with 3 ton lift and 6m reach. The 101hp Deutz engine delivers ample working power and a 40kph road speed.

With origins going back to 1890, Manitou has been producing agricultural telehandlers since 1989. The popularity of the many configurations of these tough and powerful machines today is evidenced by the fact that in 2015 the company passed the milestone of producing half a million machines.

Right: The Manitou MLT741-140 is a 4,100kg capacity telehandler with 6.9m lift height powered by a 136hp Deutz Tier 4 engine. Its M-Vario Plus continuously variable transmission gives it a road speed of 40kph.

Your first stop for telehandlers

Below Right: Developed with direct input from farmers, the Manitou MLT840 is ideal for arable and livestock work, in the yard or on the road. The five speed gearbox can be switched from manual to auto while on the move.

TH telehandlers
until 30 June

The New Holland TH7.37 Elite has a lifting capacity of 3,700kg and a reach of 7m combined with 46hp from a 4.5-litre Tier 4B engine. Manual, semi-auto and full auto transmission modes make it easy to tow loads up to 20 tons.

CONSTRUCTION

AND DIGGING...

New Holland Construction has been at the forefront of the construction industry since 1895 from developing the first hydraulic excavator to designing their highly successful skid steer loaders of which they have sold over 200,000 worldwide. The company's green technologies continue to pave the way in modern construction. Compact excavators and backhoes are ideal for tight working quarters while the skid steer loaders, track or wheeled loaders and compact loaders all finish off a job's landscaping and material handling work.

The New Holland E37C compact excavator is a master of small spaces but with BIG digging and grading performance.

We supply the following New Holland models:
Backhoe Loaders: B100C, B110C, B115C
Mini Excavators: E17C, E18C, E26C, E33C, E37C, E57C, E60C
Wheel Loaders: W110D, W130D, W170D
Skid Steer Loaders and Compact Track Loaders: L213, L216, L218, L220, L221, L230, C227, C238

FOR FULL DETAILS OF THE MANITOU AND NEW HOLLAND TELEHANDLER AND CONSTRUCTION RANGES, PLUS SOME GREAT FINANCE DEALS, CONTACT EITHER YOUR T H WHITE REP OR OUR MARLBOROUGH BRANCH ON 01672 512328

Above: Even the baby of the New Holland compact track loader range, the L213 shown at work here, has the best class dump height and reach in the business. The redesigned vertical lift geometry of the SUPER BOOM® enables operators to load material right in the centre of the truck bed. In addition, its pivot point is very close to the machine's centre of gravity, resulting in exceptional stability of the machine at work.

Right: The MT625-109 is a utility all-purpose machine from Manitou's Construction Telehandler range with 5.85m lift and 2,500kg payload.

Below: New Holland's New C Series backhoe loaders with Tier 4 Final certified engines deliver the power and torque needed so you can dig, load, trench or push faster, while reducing the impact on the environment. This is the B110C backhoe loader.

Below: The Manitou MRT 2550 rotating telehandler is three machines in one (telehandler + crane + platform). This machine handles loads of up to 4,999kg and performs operations at heights up to 25 m. The 4-element boom, combined with 360° rotation of the turret allows you to perform various operations without moving the equipment. The E-reco attachment recognition system lets you save time by specifying the proper work envelope and enhances security since it automatically detects any overload.

Talk to us for great prices on new Manitou telehandlers or visit thwhiteused.co.uk for great second hand deals
