ENERGY, FIRE & SECURITY

POWERING THE UPTAKE OF EVs

A primary factor in encouraging the increasing uptake of electric vehicles is the creation of a comprehensive network of charging points. T H WHITE Energy, Fire & Security has recently completed 23 installations across southern counties, working with traffic technology partner Swarco.

Key sites in convenient locations at pubs, public car parks, hotels and restaurants from Cornwall to Cambridgeshire were identified by Swarco. At each site T H WHITE installed one or two Swarco 50kW Raption 50 Rapid Chargers within a 10-week window, undertaking all the electrical design, civil engineering work and electrical installation.

Each charging point is serviced by a brand new 100amp, 69kW three-phase supply provided by local network operators. There's more to installing an EV charge point than meets the eye and the task started with production of design drawings, excavation of all necessary trenches and installation of feeder pillars. The switch gear for each site was then supplied and installed with specialist EV RCD protection in compliance with 18th edition wiring regulations.

The Swarco Evolt charger is one of the most advanced rapid chargers available, equipped

with dual technology that allows simultaneous charging in DC and AC. Each charging point is protected by bollards and complies with all safety requirements, being earthed via mats or rods. Completing the installation is an adjacent signpost and sign.

T H WHITE finalised the commissioning of each charging point by undertaking electrical testing and issuing an electrical installation certificate.

At two of the sites the charging points required new parking bays to be constructed and T H WHITE carried out the additional civil

engineering required, delivering a truly complete installation package.

As the number of electric vehicles on the road grows there are immense opportunities for companies, local authorities, hospitality, retail, sporting and leisure operations to install charging points accepting card payments that will not only help staff and customers but will also generate revenue. We are OLEV approved to offer home and workplace grants where applicable (currently £350 inc VAT for each socket installed) to offset the initial investment.

If you are considering an EV charging point installation, call 01380 726656 to request your site survey, or visit www.efs.thwhite.co.uk and complete the 'Get in touch' enquiry form.

MACHINERY IMPORTS

JENSEN A550: POWER MEETS ECOLOGY

Jensen – the original woodchipper manufacturer – has earned quite a reputation with its powerful and popular best-selling A540 chipper. With the environment in mind, that successful formula has been further developed to produce the A550 chipper which now combines even more power and capacity with lower emissions.

Powered by a 27.7kW Yanmar Stage V common rail diesel engine, the new Jensen benefits from a power hike over the 18.5kW engine of the A540 while producing lower emissions. A Diesel Particulate Filter (DPF) reduces pollutants even further.

Productivity is improved too, thanks to a larger in-feed aperture and a more aggressive upper feed roller. With a 200mm capacity, throughput has been increased from 15m³ per hour to 18m³ per hour.

Ease of use and maintenance has been a key factor in the design on the A550 and a completely redesigned engine cover tips out of the way to facilitate easy access to all the main components and wearing parts. A central greasing point and automatic V-belt tensioner keep maintenance to a minimum, while the Power Control system and ECS (Electronic Controlled

Sensor) infeed system make the machine simple and safe for the operator. The outlet chute is rotatable through 360 degrees for precise placement of clippings.

For durability the twin horizontal infeed rollers are made entirely of steel; they can be ground if required and their weight prevents the feed rollers from slipping on the bio material. The whole machine is built on a galvanised chassis.

Like every Jensen machine, the A550 is built precisely to the customer's specification and carries a three-year warranty as standard, with a guarantee that spare parts will be kept available for a minimum of 10 years.

It's so new that the Jensen A550 isn't yet in the Jensen UK 2020 price list, but it's very much available to order now. For more details and the latest pricing **contact Jensen UK Business Manager Bill Johnston on 07850 384530 or 01264 811260**. You can also request a demonstration by visiting jensenchippers.co.uk.

HARVEST SEASON!

COVID-19 UPDATE

As lockdown restrictions are eased, our Divisions are working hard to serve you in the best way possible. Here's a brief summary of the position at 1 June:

Agriculture: Our branches remain open with servicing and out-of-ours call-out being maintained. Our parts counters are now inviting customers back in and supply of essential parts is good.

Dairy: Our Dairy teams at Frome and Huntley have adapted working practices to maintain continuity of service, including installation, servicing and breakdown enquiries.

Projects: Many of our Project team are working remotely but are contactable by telephone (mobile) and email. Our Service Department remains operational and all on-farm support continues.

Groundcare: We are ensuring that parts, service and sales support continues via all our branches which will shortly reopen to customers. As activity in various sectors resumes many of our staff have returned from furlough leave.

Palfinger UK: Our suppliers were forced to cease production although deliveries in the early weeks of lockdown mean we have a healthy stock of cranes and attachments ready for more normal conditions. Our parts team is operating normal hours and crane servicing continues.

Energy, Fire & Security: We continue to support emergencies such as system failures, faults and break-ins. We have a healthy stock of parts and components and can service your technology, also saving you 10% on your annual servicing costs if you switch to T H WHITE. Call us!

Machinery Imports: Our parts department, service engineers and sales staff are all operational and we have excellent volumes of stock with many special discounts available.

See thwhite.co.uk/coronavirus for more detailed updates from each division...

KIT OUT WITH KVERNELAND

Now is the time to take advantage of fantastic 0% finance deals from Kverneland, available from our Hereford branch when you place your order before 30 June.

Kverneland grass equipment, including mowers, mower conditioners, rakes tedders and bale wrappers are available either at **1+2 @ 0%** or **2+22 @ 0%**.

All Kverneland arable equipment,

including ploughs, seed drills, power harrows and cultivation kit is available at **0+2 @ 0%** or **0+24 @ 0%**.

These packages are based on 50% of the RRP or balance to finance, whichever is lower, and alternative profiles are available on request. Talk to Ben Linton 07495 114479 or Will Farr 07495 114325 for details of the Kverneland range and the best finance for you.

AGRICULTURE

HANDLING...

When it comes to high quality, durable machinery for lifting, handling and excavating, T H WHITE has always recognised that every farmer or construction professional faces a different set of challenges. To ensure you can benefit from just the right machine for your needs we have always aimed to stock and supply the widest possible range from our brand partners Manitou and New Holland...

There is a strong cross-over between many agricultural and construction applications, so here we showcase some of the most popular and capable machines designed for both areas. Remember though that we can supply any machine from the Manitou or New Holland handling and construction line-ups, so call your local rep today who will be able to advise you on the many choices available.

Top: Manoeuvrability and driveability on rough terrain are some of the many outstanding features of the Manitou Manitou **MLA-T-533-145v** pivot steer telehandler, which will lift 5 tons to 5.2 metres.

Left: Manitou's **MLT630-105** is the perfect all-rounder for farm and yard work with 3 ton lift and 6m reach. The 101hp Deutz engine delivers ample working power and a 40kph road speed.

With origins going back to 1890, Manitou has been producing agricultural telehandlers since 1989. The popularity of the many configurations of these tough and powerful machines today is evidenced by the fact that in 2015 the company passed the milestone of producing half a million machines.

Right: The Manitou **MLT741-140** is a 4,100kg capacity telehandler with 6.9m lift height powered by a 136hp Deutz Tier 4 engine. Its M-Vario Plus continuously variable transmission gives it a road speed of 40kph.

Your first stop for telehandlers

Below Right: Developed with direct input from farmers, the Manitou **MLT840** is ideal for arable and livestock work, in the yard or on the road. The five speed gearbox can be switched from manual to auto while on the move.

**5+55
@ 0%**
on New Holland
TH telehandlers
until 30 June

The New Holland **TH7.37 Elite** has a lifting capacity of 3,700kg and a reach of 7m combined with 46hp from a 4.5-litre Tier 4B engine. Manual, semi-auto and full auto transmission modes make it easy to tow loads up to 20 tons.

CONSTRUCTION

AND DIGGING...

New Holland Construction has been at the forefront of the construction industry since 1895 from developing the first hydraulic excavator to designing their highly successful skid steer loaders of which they have sold over 200,000 worldwide. The company's green technologies continue to pave the way in modern construction. Compact excavators and backhoes are ideal for tight working quarters while the skid steer loaders, track or wheeled loaders and compact loaders all finish off a job's landscaping and material handling work.

The New Holland **E37C** compact excavator is a master of small spaces but with BIG digging and grading performance.

We supply the following New Holland models:
Backhoe Loaders: B100C, B110C, B115C
Mini Excavators: E17C, E18C, E26C, E33C, E37C, E57C, E60C
Wheel Loaders: W110D, W130D, W170D
Skid Steer Loaders and Compact Track Loaders: L213, L216, L218, L220, L221, L230, C227, C238

FOR FULL DETAILS OF THE MANITOU AND NEW HOLLAND TELEHANDLER AND CONSTRUCTION RANGES, PLUS SOME GREAT FINANCE DEALS, CONTACT EITHER YOUR T H WHITE REP OR OUR MARLBOROUGH BRANCH ON 01672 512328

Above: Even the baby of the New Holland compact track loader range, the **L213** shown at work here, has the best class dump height and reach in the business. The redesigned vertical lift geometry of the SUPER BOOM® enables operators to load material right in the centre of the truck bed. In addition, its pivot point is very close to the machine's centre of gravity, resulting in exceptional stability of the machine at work.

Right: The **MT625-109** is a utility all-purpose machine from Manitou's Construction Telehandler range with 5.85m lift and 2,500kg payload.

Below: New Holland's New C Series backhoe loaders with Tier 4 Final certified engines deliver the power and torque needed so you can dig, load, trench or push faster, while reducing the impact on the environment. This is the **B110C** backhoe loader.

Below: The Manitou **MRT 2550** rotating telehandler is three machines in one (telehandler + crane + platform). This machine handles loads of up to 4,999kg and performs operations at heights up to 25 m. The 4-element boom, combined with 360° rotation of the turret allows you to perform various operations without moving the equipment. The E-reco attachment recognition system lets you save time by specifying the proper work envelope and enhances security since it automatically detects any overload.

Talk to us for great prices on new Manitou telehandlers or visit thwhiteused.co.uk for great second hand deals

THE ART OF CUTTING-EDGE TECHNOLOGY

“KUHNS, the best investment for my future!”

2+22 MONTHLY PAYMENTS OR **1+2 ANNUAL PAYMENTS** AT **0%***

ON MOST PRODUCTS ACROSS THE KUHNS RANGE†

- Ploughing • Tillage • Fertilisation • Spraying • Hay/Silage Making
- Balers • Wrappers • Bedding & Feeding • Landscape Maintenance • Seeding

Offers valid until 31 August 2020. For business users only. Kuhn Finance can offer tailored finance plans to suit any farming cashflow. **Contact your T H WHITE Agriculture branch.**

* All finance available on 50% of the list prices unless otherwise noted. Credit promotions are available subject to status and credit acceptance. Offers subject to documentation fees. All applicants must be 18 or over, and credit is for business purposes only. KUHNS Finance is a trading style of De Lage Landen Leasing Limited. All offers are only available in the UK. Please note a limited number of machines do not qualify for finance, speak to your dealer for details.

† Excludes all shredders, GMD mowers, drum mowers, haybobs, power tillers, amenity products, salt & sand spreaders, Gyrotedder models up to GF 6502 and Gyrorake models up to GA 5031. For large square balers, contact KUHNS UK.

AGRICULTURE

MAX OUT WITH MERGE MAXX

The Kuhn Merge Maxx 950 is a 9.5m wide belt-merging silage rake which has been specially developed for contractors and large-scale farm producers seeking to achieve maximum productivity in high quality harvesting of grass and other forage crops.

At the heart of the machine are two adjustable, variable width and bi-directional merger belts to swath a maximum of 9.5m, guaranteeing high output with very high quality forage harvesting.

Nothing is more effective than having homogenous, regular windrows. The unique design of the pick-up and windguard-with-roller produce regular forage pick-up and transfer to the conveyor belt – prerequisites for perfect windrow formation. A regular, homogenous windrow prevents jolting during harvesting and can increase working speeds by up to 2 or 3 km/h.

As an increasing number of UK farmers recognise the benefits of protein-rich alfalfa (Lucerne) as a forage crop which can be harvested three times a year, the MM950 is the ideal machine. Its gentle pick-up means that leaves remain on their stems, thus preserving protein content and nutritional value in the forage. The same applies for harvesting cover crops at the end of autumn: forage is lifted, uncontaminated by wet, sticky soil.

With the MM 950, you no longer have to choose between a central or side-delivery rake. This rake is capable of adapting to all types of usage, forage volumes and harvesting methods thanks to its many delivery options:

- Central delivery with variable width,
- Side delivery with a view to grouping different working widths together,
- Central and side delivery simultaneously for very high forage volumes and to suit harvesting methods.

The Merge Max 950 provides a practical solution for contractors who offer a variety of services to different customers as the configuration of the machine can be modified easily with the hydraulic control valves. The days of belt-fitting are over and work output is improved.

To learn more about the Kuhn Merge Maxx 950 or to request a demo please contact your T H WHITE rep or visit www.thwhiteagriculture.co.uk.

THE 2-IN-1 SILAGE HARVESTING LOADER WAGON

The latest Pöttinger Torro Combine loader wagons are combined loader/top-fill wagons for both silage and harvesting, featuring six rows of tines with a large swath roller with crop transfer rods to ensure perfect crop flow and a loading speed.

Designed to handle power from tractors up to 300bhp, the new Torro Combine wagons deliver a 10% improvement in output compared to previous models. The pick-up is controlled from both ends by a steel cam track and as the forage is not dragged through, meaning there is less longitudinal alignment of stalks. The knives are produced from hardened tool steel and their pressed serrated edge ensures a precise chop. The steel profile panels are fully enclosed, right to the top, while the large surface area of the forage compression flap ensures the best compression of the crop and maximum use of the loading chamber and can be controlled from the tractor cab to enable a rapid change between pick-up loading and top-fill loading. We have a 6010L Combine ready to go and can supply all others from the range. Call us today!

AGRICULTURE

FOCUS ON FUEL CHALLENGES

Anti Bug Kill
Diesel bug is not something you want to experience. This brown/black slime has a pungent frogspawn texture. It can grow in diesel fuel tanks where

water is present due to wet conditions or air has entered the tank causing condensation. Blockages can also be a result of FAME deposits from bio-fuels.

An Exocet Anti Bug treatment combined with a dispersant product such as Exocet Gas Oil Conditioner will provide the ultimate solution for FAME deposits or microbiological infestations, within 24-36 hours eliminating plugging of filters and gauges and maintaining combustion and emission quality. **1 litre will treat 5,000 litres of fuel. £46.50.**

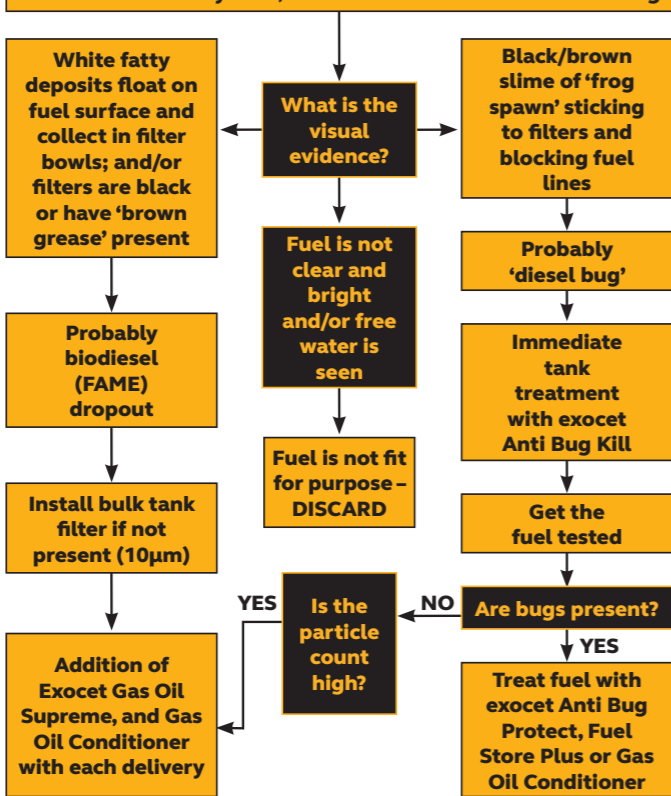

Gas Oil Conditioner offers peak performance in all seasons, not only extending the shelf life of fuel, but also freshening it to lubricate pumps and improve combustion.

Among many other ingredients it contains Exocet Anti Bug Protect to inhibit microbial contamination and growth. Regular use of **Gas Oil Conditioner** delivers clear benefits:

- Cetane boost (for more complete combustion, power and efficiency)
- Demulsifier (prevents water fuel emulsions forming)
- Lubricity (lubricates pumps/moving parts)
- Dispersant (disperses Fatty Acid Methyl Esters (FAME) within the Diesel, preventing filter clogging)
- Detergent (cleans injectors over time), also promoting fuel/water separation in the tank. **1 litre will treat 20,000 litres of fuel. 500ml: £3.50.**

As the proportion of biodiesel in fuel increases, microbiological growth or 'diesel bug' can result in unwelcome deposits in the tank which will block your filters in no time. By using EXOCET fuel additives you can keep your machines running efficiently in all seasons, whatever the weather...

Problems with 'dirty fuel', fuel starvation or fuel filter blocking

Anti Bug Protect is a broad spectrum additive that will inhibit microbiological infestations, eliminating plugging of filters and gauges and maintaining combustion and emission quality.

1 litre will treat 20,000 litres of fuel. £39.50.

Anti Wax, when used as a preventative, will boost your fuel's resistance to waxing and filter clogging during winter months, keeping your machines running in temperatures as low as -20 deg C. **1 litre will treat 1,000 litres of fuel. £15.95.**

Gas Oil Supreme is the ultimate fuel additive for high output users of heavier machinery where reliability, efficiency and productivity are the key factors. The additive will counter any negative effects resulting from the introduction of the latest gas oil specifications, notably the reduction in sulphur content and the increase in the allowable FAME (biodiesel) content.

- Increased cetane number for easier starting, increased pulling power, reduced visible emissions and improved combustion efficiency.
 - Reduced deposit formation keeping injectors clean, prevents over-fuelling, reduces fuel consumption and emissions
 - Increased fuel lubricity reduces friction protecting against premature wear in fuel pumps and injectors
 - Enhanced water resistance prevents emulsions forming and resultant filter blockages
- 1 litre will treat 2,000 litres of fuel. 200ml: £6.43; 500ml: £12.01; 1 litre: £17.51.**

Fuel Store Plus, when added to the content of your storage tank – or directly into your machine's fuel tank – will act as an antioxidant, halting corrosion, discolouration, fume and ageing. It also contains Anti-Bug Protect to kill and protect against microbiological growth. The result is an extended shelf life, better ignition quality and protection for your storage tanks and machinery. **1 litre will treat 5,000 litres of fuel. 500ml: £23.95; 1 litre: £47.50.**

All prices shown ex-VAT.

ALL EXOCET PRODUCTS SHOWN ARE AVAILABLE FROM T H WHITE AGRICULTURAL PARTS DEPARTMENTS PLUS: 10% off any New Holland or Case IH fuel filter when purchasing any Exocet product, or 15% off a full set of filters

PRO AGRI

ANDY SYMES IS NEW CASE IH SALES MANGER

Andy Symes has joined T H WHITE as Case IH Sales Manager reporting to Case IH Dealer Principal and head of our Agriculture Division, David Rapkins. Based at Stockbridge – a dedicated Case IH branch for T H WHITE – Andy will combine team management with sales and business development championing the Case IH brand together with its associated franchises (Pöttinger, Manitou and McConnell). He will be responsible for his own sales territory while also managing the sales team day to day. He will also support the service workshop and parts function based at the branch.

Andy studied agricultural engineering and brings a wealth of experience to his new role. Starting out as an agricultural engineer in Salisbury, Andy gained early experience with Massey Ferguson, Fiat and Renault tractors along with Claas combines. He trained in electronics and hydraulics and quickly learned all about tractor systems. He then spent 13 years in pig farming followed by a short spell maintaining large cargo and passenger aircraft before moving back into the agricultural sector as an engineer for the Peter Noble dealership at Ringwood. Here, he demonstrated equipment and got the sales bug, before moving on to territory sales management for a Claas dealer business.

Before joining T H WHITE, Andy worked at New Holland UK as Area Sales Manager and then as Harvester Sales Area Manager for South West England and Wales, where he was successful in increasing the company's combine harvester market share. Being from the local area, when the position was advertised Andy recognised there is much opportunity to grow the business while working closer with customers and the product. David welcomes Andy to the team commenting that he brings not only valuable and relevant harvest product experience, but also a culture of creating positive relationships and an attitude to deliver a first-class customer experience – values the team at T H WHITE also share.

DON'T MISS OUT ON YOUR DEMO!

We are experiencing high demand for demo sessions with our 2020 fleet of agricultural machinery so be sure to book your demonstration as soon as possible to avoid disappointment. For the full list of available machinery and to request a demo, visit our website www.thwhiteagriculture.co.uk.

JUNE OFFERS

GREASE GUN (BODY ONLY) £155

A superb professional grease gun with a powerful 18v motor delivering pressure up to 562 bar. REDLINK™ overload protection electronics in tool and battery pack deliver best in class durability and run time – dispenses up to 7 cartridges per charge. Integrated hose storage, shoulder strap loop and LED fuel gauge.

MOISTURE METERS

WILE 78 (left) represents a new generation of moisture meters which will grind or crush the sample. **£310**

wile
£380

WILE 200 (right) with bushel weight. This ultimate moisture meter guides the user step-by-step through the process and provides fast accurate moisture and hectolitre measurement with no pre-weighing.

GYS ARC INVERTER WELDER

The GYS GYSMI 160P portable stick welding inverter packs huge punch for its size. It can weld all types of electrodes, rutile coated, basic, stainless and cast iron up to 4.0mm. It is capable of welding material up to 10mm and with a duty cycle of 60% @ 160A (6 minutes out of 10 at full power). **£165**

£50

KIDS' SANDPIT DIGGERS

Safe and lots of fun in the sandpit or around the garden are these two robust plastic diggers suitable for children aged three years plus. The lever-operated diggers allow material to be scooped up and emptied. The lightweight Rolly is available legstand or 4 wheel versions while the beefy New Holland digger (left) has wheels.

£35

REDBACK DEADLY SERIOUS BOOTS. £95
Crafted from thick and supple leather Redback boots are produced for maximum protection and comfort. Resistant to water, heat and oil. Safety and non-safety versions are usually available.

T H WHITE AGRICULTURE

DAIRY

ESSENTIAL HYGIENE CHEMICALS

£40 +VAT 20 L

DeLaval Prima Plus is a highly efficient teat dip incorporating a well balanced blend of two active ingredients, hydrogen peroxide and salicylic acid for a broad disinfecting spectrum. It is especially designed to be used in automatic spraying systems, but can also be dipped. The DART technology boosts the efficacy of the dual actives, causing them to be rapidly effective at low levels, thus remaining gentle to teats.

Available in 20L, 60L, 200L and 1,000L.

DeLaval PeraDis is a broad spectrum disinfectant proven to be effective against FMDV (Foot and Mouth Disease Virus), environmental bacteria, pathogenic bacteria, thermo-resistant bacteria and viruses. Based on hydrogen peroxide and peracetic acid, it can be used as a food area disinfectant (liners, clusters, bulk tanks, milk pipelines) and is particularly effective as a boot wash. It can also be used at up to 60-70 deg C.

Available in 20L containers at just £40 ex-VAT for either of these chemicals until 31 August - from our Dairy departments.

GROUND CARE

NEW BABY ROBOCUT 28 IMPRESSES

True to the company's reputation for design, innovation and technology, **McConnel has launched the Robocut range of remote controlled mowers.**

The smallest of these, the RC28, offers a real leap forward in performance with a new and powerful EFI engine, low fuel consumption and low emissions combined with a low centre of gravity for smooth operation. Boasting the leading power-to-weight ratio on the market, the centre of gravity has been lowered

in the new models for go-anywhere slope capacity - now up to 55 degrees. The 150m operational range allows for safe and flexible working, and there's a new flailhead safety control system. On top of that, the Robocut RC28 can be enabled with GPS Autosteer technology - developed in conjunction with Trimble - allowing it to automatically steer to within 25mm accuracy along its cutting route.

Impress yourself by requesting a demo from T H WHITE Groundcare.

CLEAN CUT & COLLECT - WET OR DRY

As lockdown restrictions are gradually lifted, it's time to tackle the large backlog of grounds maintenance tasks.

The remarkable weather over the last couple of months means there is much work to do and for many applications the ideal machines are from the Iseki SXG range of cut and collect mowers.

With power options from 13.5hp to 21hp and deck widths from 40in to 54in, the SXG machines are compact with low ground impact and feature one of the most effective grass collection systems in the business, equally good in the wet or dry.

Get more details or arrange a demo at any T H WHITE Groundcare branch.

HONDA

EXTENDED WARRANTY JUST GOT SIMPLER, EASIER AND PORTABLE...

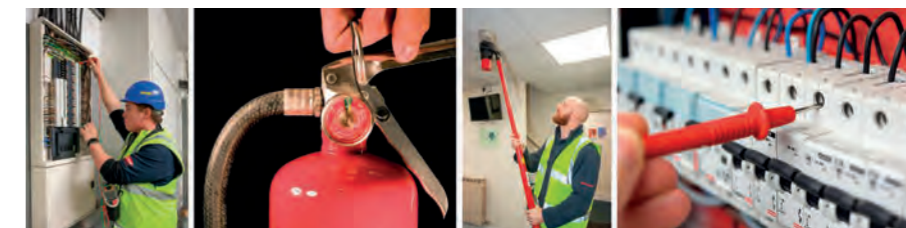

New Holland's Service Plus extended machinery warranty is now 100% backed by New Holland itself rather than being based on an insurance policy, meaning that customers can be sure of a fixed cost of ownership plus peace of mind regarding any unexpected repairs.

This gives loyal New Holland customers a clear advantage over many other brands as it eliminates delays or uncertainty regarding reimbursement. The warranty benefits are also transferable - if a machine is sold on the new owner will qualify for exactly the same benefits during the period of coverage, thus enhancing residual values.

The standard Service Plus offer on tractors, which is activated immediately the base warranty expires, is for a warranty extension of an additional 2 years or a total of 3,000 hours over the full 3 year warranty period, although Service Plus cover for tractors can be extended to a maximum of 5 years/5000 hours, allowing clients to vary cover based on greater projected hours or additional years 4 and 5 cover.

For the flagship CX7/8 and CR rotary combines, two further years of Service Plus cover are available beyond the basic warranty of 1+2, 1,200 hours.

Some of the options require a small customer repair contribution, others don't, but the New Holland specialists at our Agricultural branches will be happy to explain all the possibilities.

PROTECT YOUR PEOPLE & PREMISES SAVE 10%* ON YOUR CURRENT FIRE AND SECURITY COSTS BY SWITCHING TO T H WHITE.

We know that even with the best intentions it's not always easy to keep on top of maintenance, so T H WHITE has a great offer to address ALL your fire and security service needs, saving you money at the same time. **We are offering 10% OFF* existing annual fees from any other supplier for fire & security servicing contracts, including extinguishers.**

OR ADD A NEW TECHNOLOGY TO YOUR EXISTING SERVICE CONTRACT WITH US AND RECEIVE 10% OFF ANY EXTENSION.

If you already have a service contract with us and you add a new technology, we'll reduce the cost of that extension by 10%. So, if we currently service your alarm system, you could add fire equipment, or vice versa. Or, perhaps, add CCTV or door access...

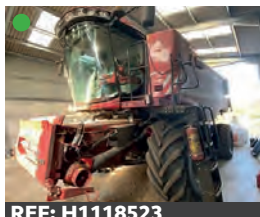

To find out how to claim your 10% discount call 01380 726656, email clc@thwhite.co.uk quoting 'Discount 10' or complete the online form at efs.thwhite.co.uk/contact

*Terms & conditions: To qualify customers will need to provide evidence of annual contract charges or 12 months of invoices from their current supplier. The discount offer is also open to existing T H WHITE customers taking on a new technology with us. For example, if we currently service your fire alarm and you wish to add CCTV or Door Access. We reserve the right to decline a service contract subject to survey.
