## GET READY FOR HARVEST!

Harvest is upon us and one of the things that can tip the balance between success and failure is having the right kit. Although combine harvesters are big ticket items they don't have to break the bank – T H WHITE is currently offering a good selection of pre-owned combines, including some just coming out of our demo fleet, at highly attractive prices.

Take the superb New Holland CR8.90 Tier 4B combine in the photo above. This 2017 combine has been well cared-for and has only 900 engine hours and 691 threshing hours. It comes complete with a 30ft New Holland Varifeed header, twin side knife, twin pitch rotors, chop and drop and auto-rotating hitch. It's also guidance-ready and benefits from a heated air suspension seat, Rad + Rem doors and LED lights. At just £184,000+vat it represents a major

saving compared to a new combine and is ready to go right now. Interested? Just call Paul Churches on 07702 724308 quoting ref 61119700.

Looking to save even more? How about our 2010 New Holland CR9080 with 30ft Varifeed header and trailer, 3,000 engine hours and 2,300 threshing hours. A real bargain at £78,000+vat – call Andy Daffurn quoting 11119179.

From the red stable we have a 2017 Case IH Axial Flow 7240 combine with just 373 engine hours and 273 threshing hours, still with two seasons warranty

up to 1,200 hours. For £172,500+vat it comes complete with a 25ft Varifeed header, Shellbourne trailer, rape knife, compressor, full AFS guidance. Call Chris Martin on 07919 044389 quoting H1118523.

Details of all our pre-owned combine harvesters can be found by visiting [www.thwhiteused.co.uk](http://www.thwhiteused.co.uk).

T H WHITE is currently offering a Case IH 7240 Axial Flow combine harvester, still with two seasons warranty up to 1,200 hours, for £172,000 +vat.

Quality product • Price-competitive • Interest-free plan  
**ORDER NOW FOR YOUR 2020 REQUIREMENTS**

**HARVEST SEASON!**

**AGRICULTURE**

**ANY CROP ANY CONDITION ANY COMBINE**

**MAXIMISING PRODUCTIVITY**

The extreme and unpredictable weather earlier in the year has cast doubts over the likely success of this year's harvest – a factor that makes it more important than ever to maximise productivity in 2020.

MacDon's Draper series of combine headers have been designed with exactly that in mind. Best of all, they can be used on ANY make of combine, to harvest ANY crop, in ANY conditions. Given the wild climate swings we have experienced over the last few years, a MacDon header could be just what you need to get the most from your crops this harvest.

Sounds too good to be true? You need not worry, as this is a rare case of a machine that really lives up to its promise...

At the heart of MacDon's designs is the instant response Active Float System which provides 4.8 degrees of lateral

float and 178 mm (7in) of vertical float independent of the combine feeder house. That means you can cut extremely close to the ground without pushing soil. The operator has On-the-Go Control – from the driving seat – of ground pressure, cutting height and fore-aft header tilt, while Active Crop Flow gently places crop on the side drapers heads-first and swiftly moves it onto the feed draper, where it's scooped up into the combine's feeder housing. This promotes peak combine efficiency by saving fuel, improving threshing action, creating better straw distribution, and allowing for a more productive harvest overall.

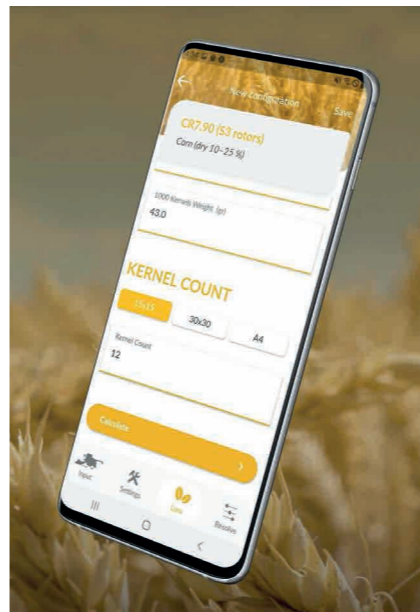

Available in sizes up to 13.7m (45ft), MacDon FlexDraper® and Draper headers benefit from the company's 70-plus years' experience making harvesting equipment for farmers on the rich Canadian prairies.

These MacDon models are true multi-crop headers that are able to harvest cereals, oil seeds, beans – just about any crop in any condition. You can see a video of MacDon headers in action at [thwhiteagriculture.co.uk](http://thwhiteagriculture.co.uk) or our Facebook page @THWagriculture. If you would like to request a demo of a MacDon header this season, just speak to your T H WHITE rep or contact us through the website – [thwhiteagriculture.co.uk/get-in-touch](http://thwhiteagriculture.co.uk/get-in-touch).

**AGRICULTURE**

**GET THE SMART HARVEST APPS**

New Holland has developed two smart phone apps to help operators get the best performance and efficiency from their combine harvesters – Harvest Excellence and a Grain Loss Calculator.

The Harvest Excellence app supports farmers when setting up their New Holland combine harvester. It guides the operator through various steps to collect all the information on their machine and field conditions including combine model, soil, crop, yields, moisture, straw length, slope, presence of stones and wheeled or tracked combine. Once

the configuration is finalised, the app will then work out the recommended settings. The operator can then tweak the settings based on field experience. The app also offers an issue resolution tool that guides the operator through suggested actions.

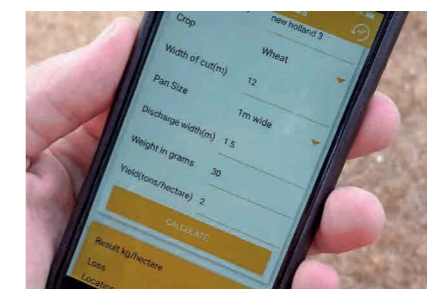

The Grain Loss Calculator app supports farmers operating combines from any brand or model, through a quick calculation that optimally adjusts the combine harvester for maximum efficiency.

Farmers can determine the combine's grain loss in three easy steps:

1. Enter the brand of the combine, selecting header and show widths.
2. Select the crop from a choice of 30 types and enter the yield.
3. Insert the grains counted on the ground in a limited area.

The app will instantly calculate grain loss, showing the percentage and quantities per hectare.

Both apps can be downloaded free from the Apple Store or Google Play.

**OPERATOR VIDEO LIBRARY ONLINE**

Today's combine harvesters, tractors and implements are complex pieces of kit incorporating many features and advanced technologies.

These can be a real boon for operators, but getting to grips with the possibilities can sometimes seem daunting. Now, to provide clear, step-by-step instruction on routine and more complex tasks, we have compiled an Operator Video Library available on

the T H WHITE Agriculture website at [thwhiteagriculture.co.uk/servicing/operator-video-library](http://thwhiteagriculture.co.uk/servicing/operator-video-library).

The videos cover a wide range of topics focusing on machinery set-up, technology and software settings, as well as answering FAQs. The growing library currently includes videos from premier brands New Holland, MacDon, Hardi, Väderstad, Pöttinger, Kverneland and Sky. Take a look!

**PRO AGRI**

**COVERED FOR 3 YEARS OR 3,000 HOURS**

Don't forget that all new Case IH machinery is now covered by the Safeguard Warranty, which extends the standard 12 month warranty by two years to 3 years or 3,000 hours, whichever comes sooner.

This is one of the best packages in the business, especially as it's an in-house scheme rather than being insurance-based. That gives you the peace of mind to know that Case IH will handle all claims directly to speed the process and keep your kit in action.

To initiate the Safeguard extended warranty the contract must be signed by the customer at the time of purchase. As long as manufacturer guidelines are adhered to the correct service history is maintained, all claims with a value of £300 or more will be valid.

If you would like to know more about the Safeguard Warranty, just contact our Case IH specialists at Stockbridge or Frome.

**HARVEST BREAKDOWN & SERVICE**

There's enough to think about at harvest time without worrying whether your equipment is going to let you down.

T H WHITE Projects can help with regular servicing and maintenance of driers, cleaners, conveyors,

augers and elevators to ensure they are ready for the busy period. We can supply and fit parts for most makes of equipment, new or old.

If you do suffer a breakdown we can be on the spot fast to get you back in action. Just call our hotline.

**Harvest emergency hotline (24/7): 07919 394602**

AGRICULTURE

# POST-HARVEST TILLAGE AND SEEDING

The many variables in arable farming today present a constant round of challenges to the farmer. No sooner has the final field been harvested than thoughts turn to autumn tillage and seeding to make the most of stubble to create well-prepared, fertile seed beds. Quite apart from the unpredictable weather which seems to be here to stay, there are the issues of soil type, topography, the crop being planted and increasingly aggressive weeds.

Well, we are pleased to say that we're here to help. We supply an extensive range of ploughs, power harrows, precision seeders and seed drills, all from the world's leading quality brands. Many of the implements you are likely to need we already have in stock, so talk to any of our sales reps, or contact any of our Agricultural branches and we'll guide you to the kit that's right for you. We can arrange demos too, so call us today.

Here are some of our top selling items so you can see what has worked for many of our key customers...

**Kuhn power harrows** (above) are characterised by robustness and build quality. Available in working widths from 1.2m to 8m, they can be used solo or combined with a seed drill. A wide selection of tines and equipment, in addition to a large range of rotor speeds, make these power harrows implements that you can rely on in highly variable conditions. Most Kuhn power harrows are equipped with duplex gearboxes, allowing you to choose the rotor speed most suited to your needs, while the entire driveline is protected by a cam type cut-out clutch.

**Kuhn Venta integrated pneumatic seed drills** (above right) can be used in combination with Kuhn's power harrows and disc cultivators. They can be set up easily for various seeding conditions and many settings can even be adjusted from the tractor seat while working.

A turnbuckle on either side of the drill makes it possible to control seed depth accurately to working conditions. Seed rate can either be adjusted from the cab, or controlled by an application map.

**The Väderstad Rapid RDA600S** (above) is the seed drill that carries out seedbed preparation, levelling, drilling and re-consolidation in one pass. This model comes with the hardy System Disc Aggressive, track eradicator tines, bout and pre-em markers, interactive depth control, a tramline kit, reinforced tyres, work lights, wireless Gateway technology and E-control as well as Väderstad's SeedEye – a unique calibration system for seed counting and monitoring.

**The HE-VA Stealth** (above) is a medium depth, low disturbance subsoiler. Its scalloped, straight, front cutting discs cut through the surface ahead of the low disturbance legs to minimise soil burst and in turn grassweed germination. Legs are staggered in 2 rows to allow residue flow through the machine, reducing the tractor HP requirement. Leg spacing is standard at 500mm but can be altered to 450mm, 500mm or 550cm for differing soil types and conditions.

**Väderstad's** reputation has resulted from the company's focus on essential drilling and cultivation tasks. Väderstad designs its machines to create optimal soil conditions to maximise yields. Build quality and durability are key factors in the Väderstad offering, which spans an extensive range of cultivators, harrows, rollers and rapid, precision seed drills. One of the most popular drills is...

## HE-VA

Unique to the **HE-VA King Rolls** (below and below left) is the SAT system which ensures the adjustable weight transfer is spread evenly across the full working width. It's available in widths from 12.3m to an incredible 20.3m, yet when folded for transport has a width under 3m.

**Kverneland**, available at our Hereford branch, is a highly regarded Norwegian manufacturer of agricultural implements, with a history going back to 1879.

The **Kverneland Accord E-Drill Compact** (above) is designed for seedbed preparation, re-compaction and sowing, all in one pass. With a hopper capacity of up to 1,400 litres, the E-Drill compact has a centre of gravity close to the tractor to reduce the lifting power requirement and is available in 3.0, 3.5 and 4m widths – from our Hereford branch.

The **Sky Easy Drill** (right) is specifically designed as a no-till drill but works equally well in minimum tillage conditions, on consolidated ploughed soil and when drilling into cover crops.

This model has three hoppers allowing three different products to be drilled at two different depths. Individual coulter selection, choice of seed spacing and alternative seed distribution are all controllable from the cab and the 3.5 degrees coulter angle dramatically reduces soil disturbance retaining as much moisture as possible in establishment. With 250kg of coulter pressure, this drill more than lives up to its direct drill nature and speed and accuracy is better than ever!

**New Holland's range of PHV ploughs** (above) offer outstanding all-round performance. Compatible with tractors of up to 225hp, this range is equipped with a heavy duty headstock and 150mm diameter pivot shaft and needle bearings. All models are equipped with a hydraulic alignment cylinder as standard and the working width can be adjusted between 30-50cm – on the go if desired.

The intelligent use of field stubble can bring significant agronomic benefits to arable farmers, and transform what was once considered a waste product into something highly nutritious for the soil.

The incorporation of stubble, straw and other plant residues assists in speeding up decomposition for quicker nutrient release. Furthermore, it enables farmers to utilize soil moisture just after harvesting to establish an optimal climate in which microbes can thrive and work best.

Employing shallow cultivation directly after harvest encourages lost and dormant seeds to germinate, enabling a seedbed to be established for intermediate crops such as mustard and radishes. At the same time it removes the main source of nourishment for slugs – thereby acting as a pest control measure.

The **New Holland STC300RS heavy-duty stubble cultivator** (above) has a 3m working width and offers numerous advantages, including rigid tines for an even working depth of between 6 – 25cm and is fitted with wing shares, to ensure a full cut across the entire working width.

**More on tillage and seeding over the page...**

**AGRICULTURE**

**Bednar** is a new franchise for T H WHITE – part of a new alliance with Case IH – available from our Frome and Stockbridge branches. The brand is already proving highly popular across the UK.

One of the implements that has really taken off is the Bednar range of Omega seed drills, which are not only versatile in terms of various crop types, row spacings of 12.5cm or 16.7cm and seeding quantity variation, but also feature a lightweight construction concept to minimise soil compaction. The **Bednar Omega OO\_L** (grain only) model is available in widths from 3m to 8m.

Stepping up to the **Bednar Omega OO\_FL** (right) there is the ability to direct drill, strip till drill, min till drill and for full cultivation sowing, making this a drill that really meets all needs. It is currently available in 4m and 6m working widths.

The **Bednar SwifterDisc short disc cultivator** (below) is a true 'bread and butter' machine for tillage in all conditions. This trailed wide disc cultivator features a compact design in widths from just 3m to 12.4m and an 18.4m version will be released later this year. High operating speeds of up to 15 km/h to 18km/h are possible.

Individual suspension of the discs with rubber segments, makes the machine suitable for high quality, swift and inexpensive post-harvest stubble cultivation or seedbed preparation.

**Available from Case IH ProAgri in Frome and Stockbridge.**

## LORRY CRANES

### GETTING HOOKED!

With models available for all GVW truck chassis variation, Palfinger UK offers the widest range of hookloaders on the British market.

Able to handle a variety of different container lengths, with low transport height and increased tipping capacity, Palfinger hookloaders enable you to move more containers more easily.

High tensile steel is used to reduce the weight of the hookloader too, delivering increased payload, meaning each lift will earn you more money, fuel costs are reduced and the life of your vehicle is increased.

Flexible and robust with low dead weight and great lifting and tipping capacity, Palfinger hookloaders are particularly suited for waste and scrap metal disposal, as Bithells Waste Management Ltd testified when the family-owned business took delivery of two brand new DAF CF 400s from Lancashire DAF, both fitted with Palfinger T22 Hookloaders supplied and installed by Palfinger UK.

The dual cylinder Palfinger Telescopic T22 Hook loaders are equipped with an easy-to-operate Pro-Active Drive control system (PAD) and feature soft-stop landing, reducing shock or damage to both truck and bin. Their unique hook arrangement is perfect for handling a wide variety of containers.

Palfinger UK, part of T H WHITE Group, is the UK importer of Palfinger products. As well as supplying lorry cranes, hookloaders and skiploaders. The company has extensive body-building facilities in Devizes, Falkirk and Bradford (Yorkshire). Call 01380 733513 for details or visit [www.palfinger.co.uk](http://www.palfinger.co.uk).

# UNLEASH THE BEAST

**GET EXTRA POWER FOR FREE**

### A CASE IH PUMA 240 CVX FOR THE PRICE OF A PUMA 200 CVX

There are always times when you wish your tractor had a little more power – and now you can get a lot of extra muscle without spending a penny more!

From now until the end of September you can get a Case IH Puma 240 CVX for the same price as an equivalent specification Puma 200 CVX. That's 40hp of extra punch in a package that's already one of the most accomplished tractors in the business!

What's more, your new tractor will be covered by the Case IH Safeguard 3-year/3,000 hour warranty (see page 3) and you can even take advantage of a 1+3 @ 0% retail finance offer as well.

To take the first step towards unleashing the beast, visit the Case IH website – [www.caseih.com](http://www.caseih.com) – fill in the form and download your power voucher. Then take it to T H WHITE Pro Agri at Frome or Stockbridge, choose your model and enjoy the power!

## MACHINERY IMPORTS

### WHY SIT WHEN YOU CAN STAND?

Stander mowers are becoming increasingly popular in the UK and the soft-ride Ferris SR5™ Z1 is raising the bar.

The adjustable operator platform, featuring suspension technology, optimises operator comfort thus increasing productivity! It has been shown that mowing in a standing position reduces the stress on your lower back and hips, helping to prevent back pain and long-term health issues. It also means that some of the inevitable vibrations from travelling over rough ground can be transferred

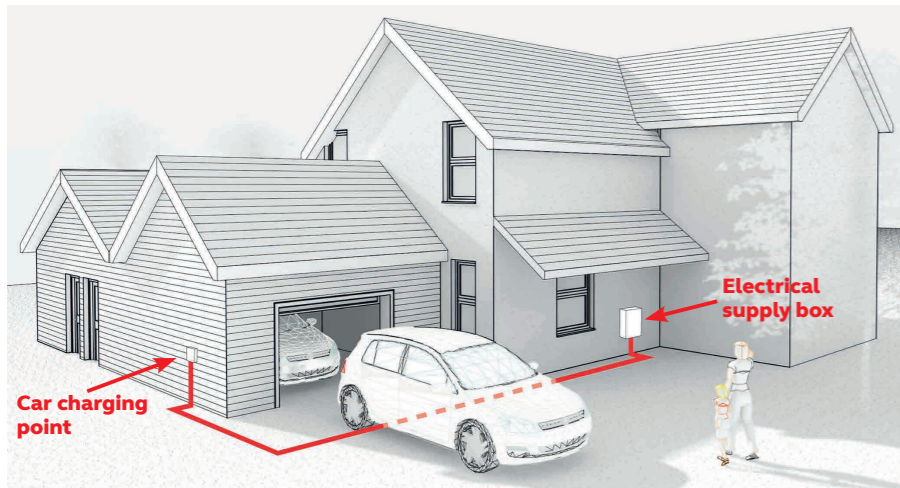

through the whole body reducing the impact of vibration. Compared to traditional walk-behind mowing, stander mowers offer greater comfort and faster ground coverage. When you need to move obstacles or debris the suspended, adjustable platform on a Ferris SR5™ Z1 also enables you to step on and off the mower

quickly and safely – as you leave the platform the PTO will disengage. This advanced mower is keenly priced from £9,125 for the 36" rear discharge model.

You can find all the details at [www.ferrismowers.co.uk](http://www.ferrismowers.co.uk), or call 01264 811260.

**ENERGY, FIRE & SECURITY**

**EV CHARGE POINT COST ESTIMATOR ONLINE**

The increasing availability and affordability of electric vehicles raises many questions for individuals and businesses wishing to adopt the new technology.

Key among these is the question of charging points and the cost of their installation. As a professional installer of EV charge points for commercial, workplace and domestic users, T H WHITE Energy, Fire and Security has

simplified the process of choosing the right type of installation and gaining a clear idea of costs with an online calculator.

For domestic installations the calculator guides the customer through a number of choices including location, whether a wall or post-mounted charger is required, whether any ground works (trenching and making good) are needed and the length of the cable run. After selecting the brand and style of charge

point you can submit your choices and the system will instantly calculate a guide price. If the installation qualifies for an OLEV grant subsidy, that will automatically be deducted from the quoted cost.

For commercial installations the calculator looks at two typical examples – a 7kW dual socket wall charger installed for the benefit of members at a Gloucestershire golf club and a 22kW dual socket fast post charger with 3m of trenching in a Surrey supermarket car park.

For workplace installations guide costings are provided for socket post chargers in a head office car park and a dual socket charger for a small business premises.

The final price will depend on factors such as the number and make of chargers, location of the install and ease of connectivity. We understand that installations can present unique challenges so to make sure that you get the most economic solution you can go into more detail by calling our team on 01380 726656, or by completing our online survey form.

To support your installation we can provide ongoing maintenance, including back office analytics for commercial installations. Try the calculator by going to our website, [efs.thwhite.co.uk](http://efs.thwhite.co.uk), where you will find all the details.

**40% OFF SOLAR PV SERVICE**

To help you make the most of your power generation through the summer we are delighted to be able to offer a **40% DISCOUNT** on an annual solar PV service for new clients.

System size	Usual price	After discount
10-30kWp	£292	<b>£175</b>
30-100kWp	£375	<b>£225</b>
100-250kWp	£442	<b>£265</b>
Above 250kWp	POA	<b>POA</b>

The annual service involves extensive checks and measurements but typically includes:

- String tests using a calibrated testing device
- Checking all cabling, routing and condition
- Operation of all AC & DC isolators in turn to check functioning
- Check inverters
- Clean inverter filters
- Check inverter screen(s) to ensure the expected generation – using a solar irradiation meter.

These prices are ex-VAT and based on 50 miles/1.5 hour drive time from Devizes. We will happily quote on distances beyond this and sites local to Devizes may incur further discount. Examples above relate to commercial PV systems. We also offer PV servicing for residential properties and monitoring contracts plus great deals on PV cleaning deals.

**ON THE SLOPES**

Many maintained grass areas inevitably became quite overgrown during lockdown. Bringing flat areas back into trim was the first challenge, but what about the slopes?

The answer is the Spider range of remote-controlled slope mowers which are designed for safe maintenance of steep, challenging terrain – making light work of slopes up to 40 deg independently and up to 55 deg with the built-in winch – as well as general mowing.

Spider mowers can be operated from up to 100m and range in size from the large-area ILD02 with 48.5in cutting width, to the new, compact X-Liner with a 22.5in cutting width and 40-100mm height of cut.

For full information or to make an enquiry, go to [www.spidermower.co.uk](http://www.spidermower.co.uk).

**AGRICULTURE**

**MORE REACH AND MORE POWER TO YOUR ARM!**

The vigorous growth of hedgerows this year will mean it's important to get under way with the hedgecutting season in September.

To help you get the job done in the tidiest, most efficient way, McConeil has

added two new 60hp Power Arms model to its popular 55-Series hedgecutter range – both in stock at T H WHITE.

The new PA5555-60 and PA5755-60 models come with reach of 5.5m and 5.7m respectively – a useful increase

of 0.4m and 0.3m compared to the standard PA5155 and PA5455 models. They also benefit from an additional five horsepower increase to a 60hp hydraulic system. As well as the boost in reach and hydraulic horsepower, the three-point linkage mounted power arms gain an integrated oil cooler for increased longevity, redesigned rear guards to facilitate easier service access and high-visibility LED road lighting.

McConeil's signature features – parallel-arm and Hy-Reach geometry – are a standard part of the design, as are seam welded c-section arms and fully bushed pivot points to reduce stress and ensure greater durability.

Hydraulic Power Slew is another standard feature which enables safe, compact transport, also providing operators with the flexibility to cut precisely in tight corners.

Both the new PA5555-60 and PA5755-60 are available with either cable controls or Motion Control - McConeil's popular electronic proportion control system.

Cutting attachments include a selection of flailheads from 1.2m to 1.5m, rotary heads, cutterbars and sawheads. A heavy-duty ditch and grip cleaner can also be specified.

The new models are available now with prices starting from £15,500+VAT from any T H WHITE Agricultural branch.

**SPRAYER WINNER**

Congratulations to Edward Leigh-Firbank who won a Hardi BP 15 multi-purpose knapsack sprayer worth £160 in our Facebook competition.

Entrants simply had to tag a friend on the T H WHITE Agriculture page to stand a chance of winning this useful piece of kit. Well done to Edward – and look out for our future social media competitions!

**DON'T MISS OUT ON YOUR DEMO!**

We are experiencing high demand for demo sessions with our 2020 fleet of agricultural machinery so be sure to book your demonstration as soon as possible. To request a demo call our Agriculture demonstrator Mike Quilter on 07887 450200 or request a demo online at [thwhiteagriculture.co.uk/get-in-touch](http://thwhiteagriculture.co.uk/get-in-touch)

**TRADE IN TO TRADE UP**

**SAVE £75**

Bring any old garden equipment along to the T H WHITE Country Store to get £75 off any Honda IZY lawnmower.

The IZY range of mowers are not only great at keeping your lawn nicely trimmed... they're good at keeping maintenance costs down too. If you're looking for a light, robust lawnmower that's a pleasure to use, then there's an IZY mower just for you. They make cutting grass so much easier. After all, a garden is a place to take things easy, even when you're working on it.

Offer valid at T H WHITE Country Stores until 30 September 2020

# MID RANGE HONDAS PACK A PUNCH

With five new mid-range models in its 2020 ATV line-up, Honda has set the bar high for choice and versatility.

Where other manufacturers have reduced their model range, Honda has done the opposite and upgraded its Fourtrax TRX420s which are now better than ever. What really sets the Fourtrax apart is its incredible reliability - they run and run just like the old TRX300 used to. Packed with options they are lightweight too, effortless to ride and very economical.

All models feature fuel injection, liquid cooling, switchable two and four wheel drive, instant button start, start-in-gear, towball, two-year warranty as standard, digital screen display and service interval reminder. PLUS, you can have a FREE GPS tracking device fitted.

Let's take a look at the 2020 Fourtrax range starting from £6,425.00 plus vat:

With the all-independent TRX420FA6 you get additional long travel independent rear suspension, rear disc brake, extra ground clearance and incredible ride comfort and stability. The model also features power steering, full DCT automatic transmission and push button gear change, as well as the new 2020 Skip switch 2/4wd.

To find out more about the Honda Fourtrax range, pricing and deals on

offer please call your nearest T H WHITE ATV Specialist:

Our team will be only too happy to help and advise you.

FOR AN ORDER PLACED BY 28 AUGUST 2020 purchase a TRX420 at these great prices:

**TRX420FM1 £5750.00 plus vat**

**TRX420FM2 £6,250.00 plus vat**

**TRX420FA2 £6,550.00 plus vat**

**TRX420FA6 £6,850.00 plus vat**

(subject to stock availability at these prices)

Our favourite entry level machine is the **TRX420FM1**. Keeping things straightforward, it has a manual gearbox, no power steering and 2/4wd.

Step up to the TRX420FM2 - Manual gearbox and additional power steering available, 2/4wd, in green or red livery.

Go automatic with the **TRX420FA2** - with power steering, full DCT automatic transmission and push button gearchange too, you can select and hold the gears of your choice. Now featuring the new 2020 Skip switch, making reverse selection the easiest it's ever been. 2/4wd.

## GROUND CARE

## A NEW CONCEPT IN ROTARY MOWERS...

The launch of the new Wessex CRX Series MultiCut professional turf mowers heralds the arrival of a new concept of rotary mowers.

Here are the first truly professional fine turf mowers that can be used either as a professional roller mower with full width rollers front and rear, a finishing mower with four fully-castoring wheels, or a combination of the two featuring castoring front wheels and a full width roller on the rear.

Added to that, the British-built CRX MultiCut mowers can be front or rear mounted thanks to the reversible linkage, can be side or rear discharge by altering the baffles beneath the deck and adding the side delivery chute, and can also offer the option of mulching.

The quality of cut is not compromised by the fact that the machine is multi-functional - wherever it goes, the Wessex CRX MultiCut mower will leave the turf looking its best.

## ...AND THE POWER TO DRIVE THEM

The perfect partner for the Wessex CRX multi-cut mower is an Iseki compact tractor.

The Iseki TLE premium economy range features 38hp or 46hp engines and simple controls, delivering outstanding value for money. Step up to the Iseki's most advanced range - the TG tractors - and you get 36-65hp engines, up to 1,600

kg lift capacity at the ball ends and 1,500 kg lift capacity 24in behind and a Category 2 Cabin with uprated air-conditioning. There's also the option of a ROPS configuration. For the full picture on Wessex CRX MultiCut

mowers or Iseki compact tractors, talk to the specialists at any of our Groundcare branches.
