The all-new DeLaval Parlour P500 was launched in North America. The first installation was at Highland Dairy, where Rena Johnson (above) has seen increased production with a healthier herd and less time spent milking.

PARALLEL PARLOUR RESULTS FROM 'BLUE SKY' THINKING

After more than a century of developing some of the world's best milking systems, DeLaval has launched what it describes quite simply as "the best parlour we have ever made."

Benefiting from a clean-sheet design and blue sky thinking from the start, the all-new DeLaval Parlour Milking System P500 is a complete change from conventional parallel parlour design. P500 has been built to create a safer, calmer, more comfortable, efficient and productive environment for your cows and workers. It adds up to higher yields, less time spent milking and calm, healthy cows with reduced incidence of mastitis.

At the heart of the design are three key innovations: the SynchroSweep™ sequencing gate, the SynchroArc™ neck rail, and SynchroControl™ which puts everything at your fingertips.

The sequencing gates are not mounted in the floor; instead they are elevated and out of the way meaning there are no obstructions for cows entering

the parlour. The individual gate indexing is a great feature too where a herd has cows of varied sizes. Because the sequence gates are made from HDPE they are light and very robust, plus they don't overlap so they are quiet in operation, resulting in a calmer milking cycle for the animals. The gates are also removed

Compact design and a clear floor area make the P500 highly space-efficient.

DAIRY

DeLaval MILKING SYSTEM P500 Continued from page 1

SynchroSweep™ sequencing gates are made from HDPE for strength and lightness, as well as quiet operation.

can choose between All-Exit/All-Index, All-Exit/Gang-Index or Gang-Exit/Gang-Index as you please, while you only need to use a single button to control the exit of the previous group and the loading of the next group.

The DeLaval Parlour P500 is solidly constructed, but also highly space-efficient, offering a reduction in platform width of up to 30% and a maximum ceiling height requirement of only 2.45m. That makes it ideal not only for new parlour installations but also for

SynchroArc™ neck rail is an entirely new design.

during milking for added cow comfort. DeLaval SynchroArc™ is much more than an open-bottom neck rail with no obstructions. It has been designed to increase milking routine efficiency with a smaller footprint and fewer vertical space requirements. Everything from the open, bottle-shaped design to the unique 'up and away' action of the SynchroArc™ means you can load sooner, exit faster and milk with consistent indexing.

After milking the SynchroSweep™ gates are lifted clear, encouraging cows to leave the milking platform in a rapid but calm manner – up to 56% faster than with a conventional parlour.

SynchroControl™ is where everything comes together. The system delivers more information, more functions and more technology than DeLaval has ever offered before, combined with ease of use for the operator. You

Cows enter the parlour easily, with no obstruction.

retro-fit installations. For details of the remarkable new DeLaval Parlour Milking System P500, just contact the T H WHITE Dairy team, at Frome 01373 465941, or Huntley 01452 830303.

MACHINERY IMPORTS

YOUR BEST FRIEND FOR THE WOODCHIPPING SEASON

Key requirements for the busy woodchipping season are performance, power and safety at all times. You need to be able to process large amounts of timber and brash quickly and safely in any location and get the job done. Jensen – the original woodchipper manufacturer – has the answers.

The Jensen A530 petrol woodchipper is one of the most popular machines on the market today. Designed and manufactured in Germany for a quality build, the 6" A530 can process up to 15m³/h of timber, its powerful 35hp engine delivering power and efficiency. The petrol-powered machine also ensures less pollution and emissions, a recognised benefit not just for the environment but for those needing to work in clean air zones or tendering for projects where diesel machinery is unfavourable.

Launched in the 2019 season, the new A530 turntable woodchipper adds a new dimension to the already popular machine. The turntable allows the unit to be turned up to 270 degrees, enabling

German-built Jensen A530 Turntable woodchipper

users to load the woodchipper from a range of angles around the machine and directly from the verge, not only saving time and effort, but ensuring improved safety for both the operators and any

members of the public in the vicinity. The 270-degree rotating chute also means that users can fully configure the input and output directions for maximum efficiency and safety.

Available as a road-towable woodchipper, the new Jensen A530 turntable can be transported easily behind the operator's vehicle, while its galvanised steel chassis guarantees reduced maintenance, outstanding resistance to damage, corrosion and wear, as well as significantly extending life expectancy compared to other woodchipper brands.

Additional benefits include electronic safety sensors fitted as standard, comprehensive toolkit fitted to the machine, built-in control box to record hours and servicing intervals, and integral storage box.

The Jensen A530 and full range of larger Jensen woodchippers is available to demo and buy from dedicated Jensen dealers across the UK. Visit www.jensenchippers.co.uk to find your nearest dealer and arrange your demonstration today.

BOOK NOW FOR THE BEST DEALS ON WINTER SERVICE

AGRICULTURE

There has never been a better time to take advantage of our winter service programme which offers some of the best early-bird discounts in the market.

If you book your equipment in now, our manufacturer-trained technicians will ensure that it is returned in top condition ready for next season.

To qualify for these great discounts work must be invoiced by the dates shown and must also have parts and service work included.

CALL US NOW AND BE PREPARED

AGRICULTURE FOCUS ON AUTUMN TILLING AND SEEDING

MAXIMISE THE SUCCESS OF YOUR NEXT CROP

High throughflow for soil and residues

Discs mounted on rubber suspended arms

HIGH SPEED DISC CULTIVATION

Väderstad Carrier

- High speed tillage and seedbed preparation
- Wide range of front tools, discs and packers
- Ultra-shallow cultivation to a deeper incorporation
- Prepare the ground with fewer passes
- Use for stubble cultivation, incorporation, seedbed preparation, small-seed drilling and pest prevention

To help you ensure your next crop has the best start, we have a great line-up of demo machines for tilling and seeding, available now to show how your work in the field could be faster and more efficient.

3m to 9m working widths

Discs and tines in one machine

MULTI-PURPOSE CULTIVATOR

Väderstad TopDown

- intensive disc cultivator and robust three-axle tine cultivator in one machine
- Discs create fine tilth by cutting and mixing the top soil
- Tines then loosen and mix the soil and crop residues down to 30cm
- Leveller and packer ensure an even, fully reconsolidated surface
- Perfect for stubble cultivation, incorporation, seedbed preparation, small-seed drilling and pest prevention

Accurate metering for small and large seeds

Easy access seed hopper with roll cover

Precise seed depth control in all conditions

NO TILL / MIN TILL SEED DRILL

Sky Easy Drill

- Designed as a no-till drill but works equally well in minimum tillage conditions, on consolidated ploughed soil and when drilling into cover crops
- Three hoppers allow three different products to be drilled at two different depths
- Individual coulter selection
- Choice of seed spacing and alternative seed distribution
- 250kg of coulter pressured for direct drilling

When it comes to preparing the ground for your next crop, we offer an impressive choice of kit from the world's leading manufacturers PLUS great prices and finance deals!

e-drill COMPACT

Ex Demo: £31,000

COMPACT DRILL

Kverneland e-drill compact

- Close centre of gravity for reduced lifting power requirement
- Easily accessible ELDOS metering device
- Simple and independent depth adjustment of the power harrow and coulterbar
- Precise seed placement by CX-II coulters
- Central depth and pressure adjustment of the following harrow

IN STOCK AND AVAILABLE NOW FROM OUR HEREFORD BRANCH FOR DEMO OR PURCHASE AT JUST £31,000

1,400 litre hopper capacity

All actions in one pass

Available from T H WHITE Pro Agri at Frome and Stockbridge

Folding harrows for manoeuvring easily

Suitable for all tractors

MOUNTED DISC HARROW

Pöttinger Terradisc K

- High output stubble cultivation and general seedbed preparation
- Working widths of 4 to 6 metres
- Working depths set hydraulically
- Three lower linkage heights and three top linkage positions
- Austrian engineering and build quality

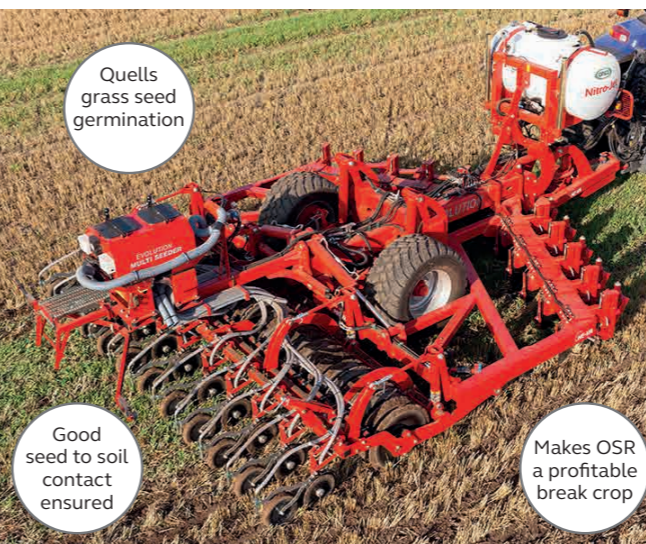

Speed and precision for large acreages

Easy turns on headlands

TRAILED DISC HARROW

Pöttinger Terradisc 10001T

- 10m working width
- Perfect penetration, even on dry soil
- Reliable incorporation of high volumes of organic matter thanks to TWIN ARM system
- Ground tracking with +6 to -3 degree freedom of movement
- Guaranteed blockage-free, even with heavy harvest residue
- impressive output thanks to high working speeds

Quells grass seed germination

Good seed to soil contact ensured

Makes OSR a profitable break crop

OIL SEED RAPE DRILL

HE-VA Evolution OSR SEEDER

- A front disc works ahead of each 'Stealth' leg, preventing grassweed seed being brought to the surface
- Alleviates compaction and improves soil structure, with minimal surface disturbance
- Accu-Disc double-disc coulter ensures precise and consistent seed placement
- Will apply slug pellets in the same pass as rape seed
- Optional Nitro-Band or Nitro-Jet can apply fertilizer

Reduced surface disturbance

Minimum draft, maximum heave

SUBSOILER

HE-VA Stealth

- Designed for minimum draft and maximum heave without bringing large unwanted clods to the surface
- 3m, 3.5m & 4m rigid frame sizes
- 4m, 5m & 6m hydraulic folding frame sizes
- Models to suit tractors up to 600hp
- Two rows of staggered legs and a front row of disc openers reduces surface disturbance

For information or demos with any of this tillage and seeding equipment - and much else besides - call your T H WHITE rep today or book a demo online: www.thwhiteagriculture.co.uk/get-in-touch

DAIRY

SILOS FOR SALE

T H WHITE Dairy Division is offering these 20m³ EB side discharge bulk bin silos for sale on behalf of a customer. One has never been used, the other is six months old.

Designed in accordance with Euro-code norms, they are manufactured with EB Equipment's unique blend of polyester glass reinforced plastic – corrosion resistant and UV stabilised for long life. Both have top access hatches with ventilation, a smooth interior and 60° cone angle for consistent content flow. They feature single-piece cone and body construction with superior thermal insulation values compared to steel.

The supporting steel work is fully welded from structural hollow section and hot dip galvanised. Fill pipe includes long radius bends. A ventilation pipe maintains internal ambient temperature. Outlet height is 2.8m at 1m from front leg assemblies.

To enquire further, please contact George Eno on 07483 064724.

T H WHITE EXCLUSIVE

2 payments down, 6 months deferred + 22 monthly payments on 'in-stock' equipment

Available on a wide range of Pöttinger HIT Tedders, NOVACAT and NOVADISC mowers, TOP rakes and LION power harrows until 31 October 2020. T&Cs apply.

PÖTTINGER T H WHITE PRO AGRI From our FROME and STOCKBRIDGE branches.

AGRICULTURE

Making its debut earlier this year, the New Holland T5 Dynamic Command 100-140hp tractor range offers the ideal machines for livestock, dairy and mixed farming.

The four models, from 110-140hp, are all fitted with the latest Stage V engines and four transmission systems are available: Dual Command with two speed-splitter; semi-powershift Electro Command; continuously variable Auto Command; and now the new dual-clutch 24X24 seamless Dynamic Command.

Highly capable for demanding PTO work, transport, mowing, baling and light tillage, the T5 Dynamic Command really comes into its own for loader work. A super high-visibility roof pane in the ultra-quiet Horizon™ cab offers the best all-round view in its class – including the important view upwards which makes loader positioning so much easier. The dynamic StartStop feature also enables clutch-free loader work – the operator can stop the tractor simply by pushing the brake pedal with no declutching – resulting in greater operator comfort and reduced fatigue.

The 24X24 dual-clutch eight-step semi-powershift Dynamic Command offers class-leading efficiency, keeping fuel consumption low and productivity

T5 DC

The New Holland T5 Dynamic Command is a great all-round solution for livestock and mixed farming, especially where loader work is concerned...

high. The new transmission offers a wide spread of speeds across the three ranges, with a great focus placed on the number of overlapping gears within a speed range. These correspond to those most frequently used speeds when conducting in-field or on-road activities. The operator can easily match the speed of the tractor to the job with precision, without the need to change the range.

Dedicated clutches for forward and reverse ensure a controlled power shuttle, even on steep gradients, while the range shifting is automated. The result is that the responsive Dynamic Command delivers near instantaneous directional changes, ideal for loader-intensive operations.

Now is the perfect time to consider your machinery for next season to be sure of getting what you want. If you would like to know more, or arrange a demo, contact your Agriculture rep, or use our online response service at www.thwhiteagriculture.co.uk/get-in-touch

The New Holland T5 Dynamic Command is available to ORDER NOW FOR NEXT SEASON. Call your T H WHITE rep today!

AGRICULTURE

KAWASAKI MULE MX PRO PETROL UTILITY VEHICLE

There is no doubt about this machine's pedigree – Kawasaki first brought the Mule to the UK in 1988 where it has established an enviable reputation for quality and performance in this sector.

The 2020 MX PRO is a further development of the range and is a more compact version of the diesel Mule DX. It certainly has curb appeal, looking boxy, rugged and refined, yet overall built to function, whether for farming, shooting, equine or private use. Retailing for only **£9,129.00** + vat, it is exceptional value too! So, let's take a look at the stand-out features.

Kawasaki

DRIVE

The Mule MX is compact, offering the ideal step up for an ATV user who wants load capacity, weather protection and the ability to carry a passenger. It's very nippy and quiet to drive, covering the ground with pace – especially important if you are controlling livestock or game birds.

It has massive reserves of torque when towing and, above all, the manoeuvrability of the MX really sets it apart from its competitors because of the tight chassis, short overhangs and excellent steering lock. It really is very driver friendly. Ground clearance is good too and

the tyres provide plenty of traction even in wet going.

If you are considering upgrading from your ATV to a UTV or simply in the market for a compact UTV then do contact us about the MX. We can offer a demonstration and price-up a package for you with cab options.

POWER

Powered by a fuel-injected 695cc SOHC, 4-valve, four-stroke engine tuned for a broad torque curve, the MX is lively, responsive and above all quiet, both in cab and out. The engine delivers excellent fuel economy from its 36-litre tank with a very respectable top speed.

Drive is through a fully automatic CVT system, with high and low range, selectable 4wd and difflock at the press of a button. The system has been designed for towing and importantly it has very controllable downhill engine braking. The main drive shaft UJ is almost over-engineered for strength and durability.

The oil filter is easy to reach and under the seat is the battery, oil dip stick and airbox. The engine air intake, CVT air intake and electrics are positioned high in the chassis to avoid contamination.

COMFORT

Kawasaki has done a super job of making sure both driver and passenger feel comfortable and secure on a sculptured bench seat which is hinged for access to storage beneath.

The dash with digital display is really user friendly with everything to hand, and easy to use even with gloves on a cold morning. There is storage and cup holders too, with extra storage under the bonnet lid as well. Lighting is both halogen and LED.

The lightweight power steering is a joy, the wheel is adjustable and provides great feedback on any terrain.

CHASSIS

Built around a strong ladder chassis, the MX rides on adjustable independent suspension with hydraulic disc brakes all round, while the engine is mounted on rubber isolators to reduce vibration. The tyres are 25in diameter to iron out the going on 12in rims.

The rear bed tips with gas strut assistance and is slightly angled for water run-off with a steel chequer-plate floor. There are cargo divider slots and six tie down hooks and even the rear tailgate hinges to provide extra length to the bed. The MX will tow 680kg and carry 318kg on the load bed.

HEAVY LIFTERS...

Huge range of implements

Manitou MT1840

With the muscle to lift heavy loads to high places, the Manitou MT1840 telehandler strikes the perfect balance between power and precision.

Specially designed for high bay/high rise work sites. Offering an impressive lifting capacity of 4 tons up to a height of 59ft, it also features excellent lateral and front stability, particularly when the outriggers are deployed. Equally at home

on uneven terrain, it has a generous ground clearance and a tight turning circle meaning that manoeuvrability is never a problem. Robust and designed to last, this handler is equipped with a low frame steel door and quality components to ensure longevity. For ease of transportation,

multiple slinging points are provided. A true multi-tasker, it can be adapted to meet all your needs simply by changing the boom attachment.

Incredible 59ft lift!

...THAT TAKE THE LOAD

When you need a really heavy lifter that can also handle hefty loads with precision, the Manitou MHT range provides the answer.

For example, the new **MHT 12330** telehandler features a 32-ton fork capacity and 35.7-ton lift hook capacity. With a maximum lift height of 39 feet 1 inch and maximum reach of 21 feet 8 inches, it has the ability to move industrial equipment in areas where it would be impossible to use a crane.

Powered by a 245hp Stage V / Tier IV final Deutz engine, it has a three-speed hydrostatic transmission with full wheel four-wheel drive. The operator can choose all-wheel, crab or front wheel steering, depending on the job.

versatile machine, compatible with a wide range of attachments, including those from smaller telehandler models.

Stepping up even further, the Manitou **MHT-X range** is able to lift up to 40 tons up to 32ft, making it possible

Lift up to 40 tons to a height of 32 feet

Manitou MHT14350

All-wheel, crab or front wheel steering

Manitou MHT12330

Top applications for the Manitou MHT 12330 include infrastructure projects, mining, bridge construction, steel mills, oil refineries, quarries, power distribution and heavy hauling. This machine is a truly

2020 EX-HIRE FLEET

Nearly-new tractors from our 2020 hire fleet are now becoming available, including:

New Holland: T6.145DC, T6.155DC, T7.225AC, T7.230PC SWII, T7.245AC, T7.270AC.

Case IH: Puma 175 CVX, Puma 200 CVX, Puma 200 MC, Puma 220 MC.

For the latest availability contact your sales representative.

PRO AGRI

NOW 4-YEAR/4,000 HOUR SAFEGUARD FOR CASE IH PUMA AND OPTUM MODELS

One of the very best industry warranties currently available in the tractor market now applies to selected models from the Case IH line-up.

This unique offer applies to the following Puma and Optum models:

- Puma 165 Multi Control
- Puma 175 CVX Drive
- Puma 220 Multi Control
- Puma 240 CVX Drive
- Optum 270 and 300 CVX Drive

For these tractors the Case IH Safeguard scheme now extends the standard 12 month warranty by three years to **four years or 4,000 hours**, whichever comes sooner.

To initiate the Safeguard extended warranty the contract must be signed by the customer at the time of purchase. As long as manufacturer guidelines are adhered to the correct service history is maintained, all claims with a value of £300 or more will be valid.

If you would like to know more about the Safeguard Warranty, or the Case IH range in general, just contact our Case IH Pro Agri specialists at Stockbridge or Frome who can use their expert knowledge to help you find the right solutions for your farm.

Upgrade DelPro for **£386.00** +VAT

an auto-refresh feature to ensure you always have the most up to date information. Other useful new features include the ability to record and track animal health checks, combine multiple vaccination protocols for a single vet visit, 'invite' animals to timed AI protocols to overcome abnormalities and get them in calf sooner, as well as separating animals into different treatment categories. These updates and many others make DelPro FarmManager 5.5 the best release of the software to date, so talk to your T H WHITE dairy rep to upgrade.

DeLaval DelPro™ - the ultimate dairy farm management resource - has just been upgraded to help you keep even closer tabs on your animals and workflow.

Forgetting to refresh the monitor board is a common issue, so there is now

COW BRUSHES

Great prices on cow brushes

DeLaval cow brushes promote improved cow health and welfare.

It's no secret that cows that feel well also perform well. The swinging cow brush **1** is the cows' favourite, grooming all over and stimulating blood circulation.

An alternative is the stationary brush **2** which can be installed anywhere in a barn or outdoors providing a safe way for cows to remove skin or parasites, also being suitable for calves and goats.

If you are farming smaller animals such as goats or you have calves, the mini swinging brush **3** is ideal, keeping the animals calm and clean as well as lowering the risk of skin disease. It's also easy to change height.

Cleaning Unit C200

Ask about our special offer

Cleaning unit C200 is supplied as one unit, allowing efficient installation, operation and monitoring.

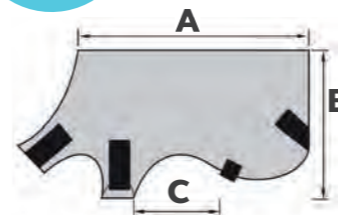

This fully programmable unit is electronically controlled, to provide a cleaning system that meets your exact milking plant requirements. This unit provides low running costs. The C200 is available in 40 litres, 80 litres, 160 litres and as a stand-alone unit. A wide range of accessories are available for the C200.

KEEP YOUR CALVES WARM DeLaval calf coat

Keep new born calves warm, strong and healthy to enhance their growth and performance during the cold weather to come this winter.

LORRY CRANES

PALFINGER UK
PART OF T H WHITE GROUP

ASHVILLE CAUGHT ON CAMERA!

The Palfinger UK team was pleased to welcome business owner and popular YouTuber Daniel Ashville to the Devizes depot in September as part of a new video being filmed for his channel.

Daniel, who owns Ashville Aggregates based in London, has almost 60,000 YouTube subscribers, with videos documenting the progress of his

business over the past few years. Daniel's visit to Palfinger UK in Devizes centred around seeing his brand new vehicle for the first time, a crane-hookloader combi from Palfinger, mounted on an all-black 8x2 Scania P450.

Keep an eye on the Palfinger UK Facebook page on @Palfinger UK for the full video, coming soon.

1+2 OR 2+22 @ 1.5% for new Ktwo Bio and New Evo machines

Ktwo Evo twin vertical beater rear discharge muck spreaders are designed to cope with the most demanding conditions. Capable of spreading a wide range of materials from sludge products to chicken litter, these spreaders offer a versatility and build quality that is unique to the Ktwo Evo. Available in capacities of 14-36 tonnes (21.5-36.3m3) and with a range of optional extras, these machines also feature an enhanced standard specification.

Ktwo Bio twin horizontal beater rear discharge muck spreaders are designed with the most accurate of applications in mind. Capable of spreading a wide range of materials, these spreaders are the perfect choice when spreading higher value manures at lower rates and wider working widths. Available in capacities of 14-36 tonnes and with a range of optional extras, these machines also feature an enhanced standard specification.

Machines must be ordered by 31 October 2020. Based on 50% RRP. Business users only. Terms and Conditions apply. Contact your T H WHITE Agriculture sales representative.

Offers valid until **31st December 2020**. For business users only. KUHN Finance can offer tailored finance plans to suit any farming cashflow. **Contact your T H WHITE Agriculture branch.**

* All finance available on 50% of the list prices unless otherwise noted. Credit promotions are available subject to status and credit acceptance. Offers subject to documentation fees. All applicants must be 18 or over, and credit is for business purposes only. KUHN Finance is a trading style of De Lage Landen Leasing Limited. All offers are only available in the UK. Please note a limited number of machines do not qualify for finance, speak to your dealer for details.

† Excludes all shredders, GMD mowers, drum mowers, haybobs, power tillers, amenity products, salt & sand spreaders, Gyrotedder models up to GF 6502 and Gyrorake models up to GA 5031. For large square balers, contact KUHN UK.
