UP AND AWAY **MANITOU** HANDLING YOUR WORLD

Built for comfort

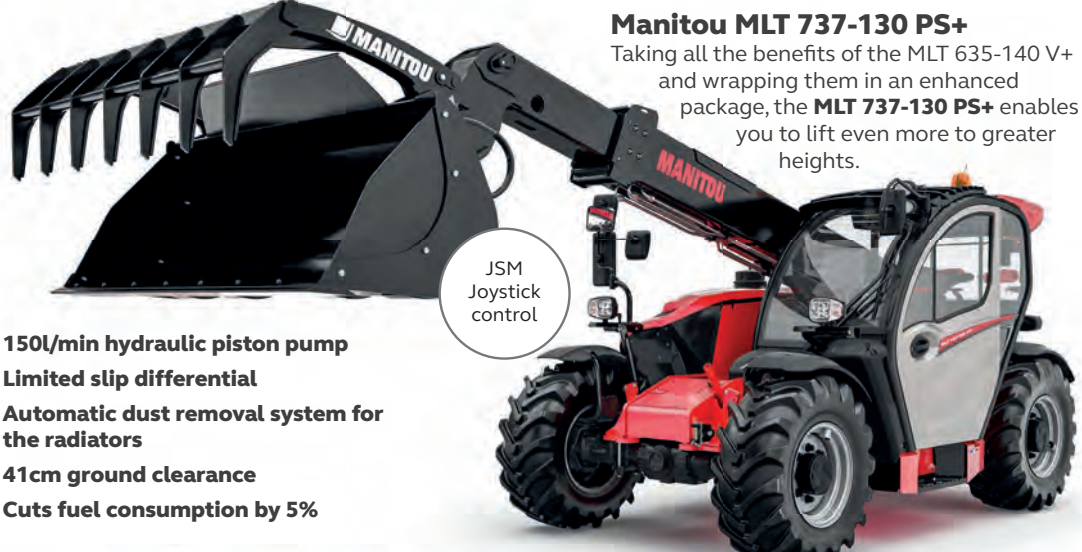

Compact frame for manoeuvring easily

3.5t lift up to 6.08m

When it comes to lifting and moving everyday loads around the farmyard or the construction site, these Manitou workhorses offer the perfect solution...

Manitou MLT 635 130 PS+
This true all-rounder not only has high capacity and manoeuvrability, but it's designed for comfort and ease of use. The new cab design offers easy access, excellent visibility and joystick control mounted on a 'floating' armrest. It makes a day's yard work a pleasure.

- 129hp Stage IV Deutz engine
- 3,500kg capacity
- Powershift Plus transmission
- Agricultural tyres as standard
- Powershift Plus transmission

Manitou MLT 737-130 PS+
Taking all the benefits of the MLT 635-140 V+ and wrapping them in an enhanced package, the **MLT 737-130 PS+** enables you to lift even more to greater heights.

JSM Joystick control

- 150l/min hydraulic piston pump
- Limited slip differential
- Automatic dust removal system for the radiators
- 41cm ground clearance
- Cuts fuel consumption by 5%

3.7t lift up to 6.88m

There's only one way to see just what these remarkable telehandlers can do, and that's to try them for yourself! Contact your T H WHITE rep or request a demo using the online form at www.thwhiteagriculture.co.uk/get-in-touch

GROUP

10 PEAKS CHALLENGE IN AID OF THE YOUTH ADVENTURE TRUST

On Saturday 3 October, four T H WHITE teams successfully completed a modified version of the 10 Peaks Challenge raising money for the Youth Adventure Trust. The teams included representatives from our Group services, T H WHITE Dairy, T H WHITE Projects and T H WHITE Machinery Imports.

Due to severe weather brought by storm Alex the event was very nearly cancelled. However, thankfully the organisers dug deep, re-positioned volunteer mountain guides, and revised the route to avoid certain peaks and ridges that had become more dangerous in the conditions. The event went ahead with the teams setting off well before sunrise and having to brave the storm that lasted throughout the day. The extreme conditions included almost continuous pelting rain, strong gusty winds, very poor visibility and hailstones thrown in for good measure. At one point the route did drop below the clouds and there was a glimpse of the spectacular views usually on offer. For the majority of the many hours spent on the hills, we couldn't feel our hands or faces and were wet through - despite this the teams maintained their sense of humour and good spirits all day... and into the evening!

By taking on this challenge, we raised money for the worthy cause of the Youth Adventure Trust which has been inspiring vulnerable young people through outdoor and adventure activities for

over 25 years. Their three school-year programme gives vulnerable 11-14 year olds the hope, confidence and skills to face their daily challenges and build their resilience so they can fulfil their potential and make positive decisions

that will influence their future. Now, more than ever, charities such as the Youth Adventure Trust need funding to continue supporting the most vulnerable in society. To find out more about their vital work, visit www.youthadventuretrust.org.uk

A huge thank you to those from T H WHITE who took part in this charity event to help raise money for the Trust. It was certainly a weekend that nobody will forget!

On behalf of those who took part, the YAT and the beneficiaries of the donations, I would like to thank everyone who has

so kindly donated so far. The amount the teams have raised will put at least three, probably four vulnerable young people from the ages of 11 to 14 through a three year mentoring and support programme, including giving them the opportunity to take part in outdoor adventures, to help them build resilience.

If you would like to boost our total, there's still time to donate and the links to the sponsorship pages can be found at: www.thwhite.co.uk/whites-world/10-peaks-challenge.

Thank you so much for your support.

Alex Scott
Managing Director T H WHITE Group

AGRICULTURE

AUTO HEAVEN FROM HONDA

Unique to Honda is the latest DCT (Dual Clutch Technology) automatic transmission, found here on the 2020 TRX420 and 520 FA Models.

Where CVT (belt drive) transmissions dominate among the competition, Honda offers a more traditional mechanical gearbox but with automatic and electric shifting. This provides a controllable rider experience with greater flexibility, precision and better fuel economy!

With two shift modes available, there is the choice of changing gear via two up and down buttons on the left handlebar, for individual gear changes from 1st to 5th. This enables a gear to be held - while heavy towing for example - or for constant speed driving when slug pelleting or spraying. Where this level of control isn't so important, auto mode can be selected and the system takes over.

The ECU mapping has been newly fine-tuned to deliver well timed, smoother changes and it will automatically change down when you come to rest, to stop and open a gate for example. It's also possible to override to manual shift when in auto - at the bottom of a hill if needed - afterwards the gearbox will then revert back to automatic. Best of all (for those familiar with Honda through the years) is the new reverse 'Skip Switch' which allows you to select reverse instantly at speeds of 3mph or less. In practice this is effortless, intuitive and fast.

The TRX420 Fourtrax is the more compact of the two models here, smaller in stature than the mighty 520 with

lower seat height, making it very easy to hop on and off. It makes it the absolutely ideal ATV for running around livestock, a shoot, stable yards or a smallholding.

Towing capacity is 385kg with independent rear suspension, hydraulic disc brakes, two and four wheel drive select. Performance is very punchy and light power steering is fitted as standard.

Step up to the range topping TRX520 Foreman and you have an ATV that delivers everything you could possibly want in one package. A powerful, smooth 518cc fuel injected engine, towing capacity of 600kg, rear rack capacity rated to 85kg, power steering,

independent suspension, hydraulic disc brakes, two and four wheel drive and high/low range with difflock. It drives beautifully and, while not as powerful as its bigger engine rivals, it is very refined and rider-

friendly, especially at low working speeds with good engine braking.

When towing, the firm independent suspension provides excellent levels of grip with none of the 'wallowing' often found with this kind of set up.

Choosing between the 420 and 520 is not difficult. Base your decision on rider height comfort, what you'll use it for most and how often. These models generally sell themselves, but our T H WHITE ATV specialists are always on hand to assist with a demonstration and more detailed guidance and pricing. To find out more please contact Tim Rochfort on 07973 911934, or Callum Rea on 07860 712963.

£125 FIXED PRICE LOLER TESTING – OR FREE WITH YOUR ANNUAL SERVICE

Do you need a LOLER test?

The answer is **YES** if you own or operate a fork lift truck, telescopic handler, or a tractor fitted with a loader.

You are required by law to ensure that the machine holds a report of thorough examination on an annual basis. This requirement of a 'thorough examination' is embedded in Health & Safety legislation; Lifting components are covered by the Lifting Operations and Lifting equipment Regulations 1998.

So if you have purchased a machine in the last 12 months your LOLER test is now due. If you bought over a year ago have you had your annual LOLER test?

We offer **fixed price LOLER testing for just £125**, or the test is **FREE** with your annual service.

To book your LOLER test just contact one of our service managers:

Marlborough 01672 518408
Frome 01373 465941
Toddington 01242 620211
Knockdown 01454 238181

A LOLER test can cost as little as £125* and will provide you with real peace of mind.

LORRY CRANES

PALFINGER UK TRAINING

In addition to being one of the UK's leading suppliers of Lorry Loader equipment, did you know that Palfinger UK also offers a range of aftersales opportunities, including accredited training?

Our dedicated training department delivers high quality training to customers across the country. With a team of experienced instructors covering the whole of the UK, our training is ALLMI accredited and recognised by HSE, so you know you're receiving the very best standard of tuition from industry experts.

We can also register you for seven hours of study time to contribute to your JAUPD Driver CPC.

All operators who successfully complete our Lorry Loader Operator or Slinger/Signaller courses receive an ALLMI identity card and certificate along with registration on the ALLMI Operator database for five years. After that, experienced operators need only to take refresher courses to update their knowledge.

At Palfinger UK we pride ourselves on the highest quality of instruction too, with all our trainers audited by ALLMI and achieving excellent scores in recent years. None more so than the newest recruit Zoe Ellis who joined the team at the end of 2019 with 11 years industry experience. In her 2020 ALLMI audit Zoe achieved a hugely impressive score of 97.5%, receiving 307 points from a possible 315!

In addition to our ALLMI courses delivered across the country, our Falkirk-based trainer is also able to offer IPAF and PASMA training courses for customers wishing to update their mobile access and platform qualifications.

To find out more and register an interest in our training courses, visit www.palfinger.co.uk/training

LACKHAM DAIRY EDUCATION UNIT NEARS COMPLETION

The first cows were brought into the new cubicle shed at Lackham on 21 October.

be used for training to be installed by the end of the year” says Mike.

“Now that the cows are in their cubicles and the slurry lagoon is operational, we expect to be milking with the new machines within four weeks. Given the setbacks, we are really proud that the new dairy unit will be ready for the first students in 2021.”

Students who successfully complete the course will be awarded an HND in Agriculture (Dairy Engineering), accredited by Pearson. To learn more about the Lackham Dairy Engineering Course, or to apply for a place starting in 2021, go to www.wiltshire.ac.uk.

Internal structures nearing completion.

A major milestone in the creation of a dairy engineering teaching facility was reached on 21 October when the first cows were brought into the new cubicle shed.

The 140-cow dairy unit is part of a Wiltshire College & University Centre initiative which will result in an undergraduate Dairy Engineering course at the Lackham Campus, designed to equip students for the next generation of dairy farming, making the most of new technologies and techniques. Construction of the new teaching unit is being supported by the T H WHITE Dairy division and DeLaval in partnership with the College.

Plans were progressed through 2019 and the project was launched with the signing of an agreement of cooperation in January. Although the objective had been to complete the unit in time to commence the new teaching course by the end of 2020 a number of unforeseen factors have caused delay.

Mike Howes, T H WHITE's project manager, explains: “At the start we faced the need to re-house bats from an old building that had to be demolished, then we suffered unprecedented rainfall which really set the construction back. In late March, of course, we had lockdown. You couldn't make it up!”

As soon as work became possible again the team really pulled the stops out and the structure of the new building was completed with flooring, drainage channels and internal walls soon installed. “By mid-October we had installed two DeLaval VMS robotic milking units, with a third one that will

Two DeLaval VMS robotic milking units were installed in October, with a third to follow for teaching.

GROUND CARE

WIDEST RANGE OF PROFESSIONAL WOODCHIPPERS

The woodchipping season is well underway and what better range of machinery to help you get through all your jobs this winter than Jensen?

Jensen offers the widest range of professional woodchippers in the industry, from 6" to 24" capacity, with trailed, tracked and PTO options available.

Almost every Jensen woodchipper model is available with 270 degree Turntable functionality too, meaning you can quickly and easily manoeuvre the machine into the safest and most efficient position to load and discharge. This makes working from dangerous roadsides, verges or even pedestrian walkways safer and easier, feeding material in from a convenient position and expelling it to your desired location using the 270-degree rotating chute.

The A530L and A540 models have been upgraded this year with new, Stage 5 certified diesel engines too,

Jensen A530L

ensuring low emission, high capacity and full compliance with any jobs requiring Stage 5 certification and in Clean Air Zones.

Jensen A540 tracked 'Spider'

The 6" A530XL and 8" A540 models are available on tracks, in both fixed and Jensen's patented 'Spider' formats, offering supreme manoeuvrability and access to even the most challenging terrain. These machines are ideal for challenging off-road positions, such as alongside railways, on embankments or in wooded areas where it just isn't feasible to take a towed chipper.

The patented Spider tracks offer ultimate flexibility and unrivalled

stability, with the ability to move each side track independently from the other, both up/down and in/out. This means you can move easily over rough terrain, lifting the machine high over obstacles as needed and levelling the woodchipper safely when ready to work. At only 1315mm wide, the A540 Spider woodchipper is compact enough to also fit between narrow gaps.

Another benefit of the Jensen range is the option for customers to choose a fully custom build – the only brand in the industry with that ability. Whatever your requirements, we can work with you and Jensen to produce a machine that is perfect for the work you do.

Jensen uses galvanised steel for almost every component, ensuring longevity and robustness, as well as improved resale value when it's time to replace your machine. Finally, the illuminated touchpads featured as standard on many models and available as an option on others, offer superior safety with immediate feed switch-off at the touch of a sensor with no water or vibration issues typically found with other electric systems.

If you would like to try a Jensen for yourself this winter, speak to our team to arrange an on-site, no-obligation demonstration. We would love to show you just what a Jensen can do for your business.

Request your free demo online at www.thwhitegroundcare.co.uk/get-in-touch

DeLaval cow brushes promote improved cow health and welfare.

It's no secret that cows that feel well also perform well. The swinging cow brush 1 is the cows' favourite, grooming all over and stimulating blood circulation.

An alternative is the stationary brush 2 which can be installed anywhere in

a barn or outdoors providing a safe way for cows to remove skin or parasites, also being suitable for calves and goats.

If you are farming smaller animals such as goats or you have calves, the mini swinging brush 3 is ideal, keeping the animals calm and clean as well as lowering the risk of skin disease. It's also easy to change height.

DeLaval Calf Milk Heater

This immersion heater has a curved, cross-shaped Teflon heating element for homogeneous heating and easy cleaning.

DAIRY

Although we are entering the coldest months of the year, it doesn't take much stretch of the memory to recall the blisteringly hot summer with air temperatures regularly exceeding 30 degrees.

If anything, summers in the UK are predicted to get even hotter, so although cooling may not be at the top of your concerns right now, it's the right time to start thinking about cow shed ventilation.

It's a fact that cool cows are productive cows. The more cows eat, the more milk they produce. But when temperatures rise above 22°C (72°F), cows begin to experience heat stress and lose their appetite. Reduced feed intake means lower milk yield and also decreases pregnancy rates. An effective ventilation system should help to reduce heat stress, increase yield, and clear the air in your barn.

A key element in good barn ventilation is an effective fan system. Dairy farmer Hugh Miles from Witham Friary, Somerset, decided to get ahead of the game in order to keep his cows cool this summer by installing barn fans before the heat started to rise.

Last year the T H WHITE Dairy Department installed two DeLaval V310 voluntary milking units at Hugh's farm and he contacted our Dairy specialists again for advice on the cooling systems.

"The T H WHITE team carried out a survey in the shed and, with input from DeLaval, they worked out the best configuration of

A COOL SOLUTION

Somerset dairy farmer Hugh Miles has increased his milk yield this year by keeping his cows cool. The simple solution was DeLaval DDF 1200 dairy fans...

fans and positioning to achieve maximum airflow," said Hugh. "We went for 12 DeLaval DDF1200 fans which were installed in April.

"Soon after that the temperatures were nudging 33 or 34 degrees, but the cows didn't have to go out in the sun. Instead, they stayed in the shed where the fans ensured they remained cool and comfortable. It wasn't just the cows that benefitted – it was a lot more comfortable for our people too!"

The unique frame design of the DeLaval dairy farm DDF1200 helps to push air-stream further, achieving a greater cooling effect with less energy than conventional fans. The highly efficient IE3 electrical motors, coupled with the ability to alter blade configurations to suit different airflow requirements, deliver the right balance of efficiency and performance. The durable, corrosion-resistant fan is both easy to install and easy to maintain.

"The fans have certainly proved their worth," Hugh added. "The cool atmosphere in the shed through the summer resulted in an increased yield of around 1½ litres of milk per cow per day."

The benefits are clear. If you are planning to keep your cows cool next summer, now is the time to think about DeLaval dairy fans. As well as supplying the fans, T H WHITE can take care of all the installation for you with an integrated system that regulates performance to suit conditions and keep your running costs to a minimum.

Milk monitoring:

Upgrade your milk meters or flow indicators

DeLaval yield indicator FI7 When milk yield from each cow is monitored accurately, you gain key data for efficient herd management. This compact yield indicator provides:

- Robust design with no moving parts
- Milk yield available cow side
- Additional monitoring of liner slips, kick offs and cluster inlet blocks**

Terms and conditions apply; * Blood and Conductivity function not available on MP100 series.** Not all functions available on all systems.

DeLaval milk meter MM27BC This is a highly accurate ICAR approved milk meter which also monitors any blood traces in the milk, conductivity levels, kick-off and air entry in the liners. It offers fast milk yield monitoring and better control of cow health.

- Milk is measured continuously
- Monitors blood presence, milk conductivity and milk out performances*
- It is not dependent on a central computer.

DeLaval Dairy Cleaning Unit C200

Top quality milk means higher profits. To achieve this requires efficient, consistent cleaning of your milking system.

Ask about our special offer

Milk deposits must be removed from the milking equipment after milking. If this is not done in an efficient and consistent way, it will have a negative effect on all milk passing through the system. DeLaval cleaning unit C200 is supplied as one unit, allowing efficient installation, operation and monitoring.

This fully programmable unit is electronically controlled, to provide a cleaning system that meets your exact milking plant requirements. This unit provides low running costs. The C200 is available in 40 litres, 80 litres, 160 litres and as a stand-alone unit. A wide range of accessories are available for the C200.

0+2 Annual payments OR 2+22 Monthly payments

SCRAPER SPECIAL!

T4.55: The ideal tractor for the daily scrape

This 'Mini Muck Mover' is focused on power, durability and reliability.

JUST £22,950

Offer closes 31 December 2020. Available on stock units only. Excludes T4 speciality tractors. Terms and conditions apply.

GOLF & UTILITY

PLANNING YOUR GOLF BUGGY FLEET

With years of experience supporting golf clubs across the country with quality fleet solutions, T H WHITE is the ideal partner to help you replace or add to your golf car fleet ready for 2021.

Working in partnership with you, we can tailor a competitively-priced package to meet your needs, with a range of vehicles and finance options for all requirements.

Our premium golf buggies and utility vehicles from market leaders E-Z-GO and Cushman always offer exceptional value for money, with industry leading

functionality including maintenance free lithium-ion batteries, or economical petrol engines, the industry's largest bagwells, impact resistant bumpers and much more.

E-Z-GO vehicles are the only buggies in the industry with the patented Intellibrake technology – electronic brakes which stop the vehicle when the accelerator pedal is released, hugely increasing safety and removing the need for brake maintenance.

Speak to us today about the options for replacing or adding to your fleet – visit www.thwhitegroundcare.co.uk/get-in-touch

DON'T MISS THE FINAL ROUND OF CPSG GRANTS HURRY! Deadline for applications is 4 November

The third and final round of the Government's Countryside Productivity Small Grants (CPSG) scheme is open for applications – the deadline is 4 November.

The Government is making grants between **£3,000 and £12,000** to help farmers buy new and innovative equipment.

Eligible items include equipment designed to help minimise soil compaction in fields, monitor ammonia levels in farm buildings, and increase machinery precision when applying slurry – plus many others.

Farmers who have been successful in applying for grants in previous rounds of the scheme will also be able to apply for different items within this final round, up to the scheme's limit of £12,000 per farmer.

The scheme is open for applications until midday on **4 November 2020** and can be made at www.cpsmall.org.uk
